TECHNICAL MANUAL

TECHNICAL ORDER

DISTRIBUTION SYSTEM

Prepared By: Automated Technical Order System (ATOS)

THIS PUBLICATION SUPERSEDES TO 00-5-2, DATED 1 APRIL 2000. THIS PUBLICATION HAS BEEN EXTENSIVELY REWRITTEN, THEREFORE REVISION BARS HAVE BEEN OMITTED.

Published under authority of the Secretary of the Air Force

1 APRIL 2001

LIST OF EFFECTIVE PAGES

NOTE: The portion of the text affected by the changes is indicated by a vertical line in the outer margins of the page. Changes to illustrations are indicated by miniature pointing hands. Changes to wiring diagrams are indicated by shaded areas.

Dates of issue for original and changed pages are:

Original .... 0................. 1 April 2001

TOTAL NUMBER OF PAGES IN THIS PUBLICATION IS 94, CONSISTING OF THE FOLLOWING:

LIST OF TABLES

CHAPTER 1

INTRODUCTION

1-1   GENERAL.

The Air Force Technical Order (TO) System is described in TO 00-5-1. This TO contains policies and procedures on the TO distribution system for use by Air Force and other organizations requiring TOs. It is used in conjunction with the Joint Computer-aided Acquisition and Logistics Support (JCALS) Desktop Instructions (DI) (for on-line JCALS users - see paragraph 1-1.7.3) and TO 00-5-2-102, Application Software for the Automated TO Management System (ATOMS). Tables 1-1 and 1-2 list related publications and forms and their titles.

1-1.1   Recommended changes to policies and procedures in this manual will be submitted on AFTO Form 22 in accordance with TO 00-5-1, or by the JCALS "Recommend a TM Change" process. Those proposing major policy changes require approval or disapproval of the AF Centralized TO Management (CTOM) Committee. Major Command and Base supplements are authorized according to TO 00-5-1: copies shall be provided to HQ USAF/ILMM, 1030 Air Force Pentagon, Washington DC 20330-1030; MSG/MMF, 4375 Chidlaw Rd Ste 6, WPAFB OH 45433-5006; and OC-ALC/TILDT, 3001 Staff Dr Ste 1AB100, Tinker AFB OK 73145-3042.

1-1.2   World Wide Web (WWW). A copy of this TO may be accessed through the TO System Information Page on the WWW at *http://www. pdsm.wpafb.af.mil/toprac/to-syste.htm.* Additional TOs and TO-related data (such as TO Improvement System (TOIS) status reports and information on training courses) are available at this same location. Many of the forms listed throughout this manual may be accessed on the Air Force Departmental Publications Page, URL *http://afpubs.hq. af.mil/.* TO Distribution Offices (TODOs paragraph 1-4) must take immediate action to obtain access to the WWW. They require access to at least the "*.mil" domain, and FTP capability for ordering TOs.

1-1.3   Training. Training on the TO Distribution System is available through AETC. There is a four-day in-residence course for TODOs and TODAs taught at Sheppard AFB TX (J3AZR 2E066-007, Technical Order Account Custodian Course). The General and Advanced TO System Courses are available in a Computer-Based Training (CBT) format (see TO 00-5-1, Appendix B). Enrollment is through the unit's local education office. The General course is required for all AF TODOs and library custodians, and is strongly recommended for all TO users. The Advanced course is required for all AF personnel who use the ATOMS Program to manage accounts or order TOs.

1-1.3.1   AETC may occasionally suspend one of the courses when required to develop and incorporate needed updates; during these periods, and for non-AF TODOs/TODAs, the TO System Information page (paragraph 1-1.2) has a non-credit familiarization program titled "How do I order Air Force TOs." This program does not eliminate the requirement to take the AETC courses when they are once again available.

1-1.3.2   Training on the use of JCALS is provided partly by the contractor and partly through base-level training using the General User and TM Process Interactive Courseware (ICW) courses on CD-ROM (available from the base JCALS POC after JCALS is deployed to the unit). Future training may be made available through the Internet.

1-1.4   Local Reproduction of TOs. Air Force activities may reproduce unclassified TOs or portions of TOs not under any restrictions such as limited rights or other special controls, under the below conditions. Classified and limited distribution TOs or portions of TOs may be reproduced under the same conditions, as long as the activity complies with the rules in DOD 5200.1-R and DODD 5230.24 and .25. If color is critical to understanding the TO data, reproduction must also be in color.

1-1.4.1   Only current TOs or portions of TOs may be reproduced for operation and maintenance (O&M) of operational equipment. Reproduced copies will be managed and filed like any other TOs. Digital TO files may be duplicated digitally as often as required, provided the copies are managed and controlled like paper TO copies.

1-1.4.2   General and Methods and Procedures TOs (MPTOs) available on the WWW and/or distributed on CD-ROM will not be distributed in paper unless computers cannot be employed at their primary point of use. If paper copies are required, they will be reproduced locally from the CD-ROM/WWW.

1-1.4.3   TODOs will use local reproduction to the maximum extent possible to avoid submitting emergency requisitions (paragraph 5-3) for missing or damaged TOs. If a TODO has missing or damaged TO pages or is missing TO Changes listed in the Air Force TO Catalog for more than 180 days, the pages or changes may be reproduced from digital or paper TO copies obtained locally or from other units with the same equipment. TO Managers cannot routinely locate and copy TO pages or obtain changes already bundled with basic TOs (changes older than 180 days) at the request of individual TODOs. However, if digital TO files are available, TO Managers/TCMs will provide copies of the files to individual TODOs when required to prevent work stoppages. The alternative is to requisition a replacement TO according to chapter 5.

1-1.4.4   To facilitate configuration control, all locally-printed copies of TO extracts will be stamped with the reproduction date and the parent TO's date and change number. Extracts from TO databases will only be authorized for a limited time period, to be established by the using MAJCOM. TOs or portions of TOs reproduced from superseded versions or reproduced for non-O&M use will be marked "FOR REFERENCE ONLY," and will not be used with operational equipment.

1-1.4.5   TOs will not be locally reproduced for use outside the US government or authorized government contractors.

1-1.5   Interim TO (ITO) and Rapid Action Change (RAC) Notification Messages. When disseminating ITO messages, the TODO may elect to copy only the message subject, classification and body for distribution to affected TO users. The complete message will be filed with the TODOs master copy of the TO (if the TODO has one) or in a binder of such ITO messages, filed by TO number. RAC Notification messages do not generally require further dissemination.

1-1.6   Digital TO Files. Some TOs may be distributed electronically as "sets" on digital media (CD-ROM, DVD, etc.), or be made available via the Internet or JCALS Reference Library. When digital copies will be used in place of traditional hard copy (paper) TOs, the TODO must take immediate action to reduce or eliminate initial distribution quantities of the paper TO. Digital TO file locations will be cross-referenced in the assigned library (paragraph 3-10.1).

1-1.6.1   The MPTOs currently available on the WWW are Indexed Adobe Portable Document Format (IPDF) files, and require use of Adobes *Acrobat Reader* for viewing. A free copy of *Acrobat Reader* is available for download from the same web site as the TO files.

1-1.6.2   While it is preferred that electronic versions of MPTOs be used (WWW or CD-ROM when available), it is not currently mandatory to do so. However, the Air Force Centralized TO Management (CTOM) Committee has decided that none of the MPTOs published on CD-ROM TO 00-CD-1 will be published in paper after 1 Oct 99.

1-1.6.3   If TODOs require one or more TOs which are available on a CD-ROM, and they can use the TO digitally to perform their mission, they should order the CD rather than the paper copy of the TO. Even if digital TOs can only be used for some functions, requirements for paper copies can be reduced by that number. Management personnel who require TOs to perform their jobs should definitely opt for digital versions rather than paper. Even if not all TOs on a CD are required, it is much cheaper to duplicate and ship quantities of a CD containing multiple TO files than it is to print and mail copies of each TO in paper to the same users. Submit ATOMS TO Publication Requests (TOPRs) to establish ID requirements for the CD versions and reduce or cancel ID for the paper copies of each TO on the disk.

1-1.7   Joint Computer-Aided Acquisition and Logistics Support (JCALS) System. The JCALS system applies state-of-the-art technologies to develop a technical infrastructure which supports creation, dissemination and use of information and data throughout the Department of Defense.

1-1.7.1   Joint Technical Manual System (JTMS). The first functionality to be implemented under JCALS is the JTMS, which will contain Technical Manuals (TMs) and TO System management data. The JCALS JTMS has replaced the G022 System at the ALCs. The JTMS will allow reduction of TO warehousing by digitizing existing TOs and using "Just-In-Time" printing and "print-on-demand" to satisfy user requirements. TOs will be available in multiple media formats (i.e., electronic transfer, CD-ROM, magnetic tape, or paper copies), facilitating improved methods for TO updating, publishing, distribution, receipt and use.

1-1.7.2   As JCALS is deployed to and implemented at bases AF wide, other TO system functions will be included. TODOs will use JCALS rather than the ATOMS program (next paragraph) to manage TO accounts (order TOs, review TO index information, maintain library records, etc.) JCALS will also allow limited "print-on-demand" using low speed laser printers in the using organization for priority TOs distributed electronically or one-time requirements (page replacements, missing changes, etc.).

1-1.7.3   "On-Line" versus "Off-Line" JCALS Customers. "On-line" JCALS customers have been assigned a JCALS user profile and a username and password to log into the JCALS system. "Off-line" customers merely interface with JCALS through ATOMS to establish ID for and order TOs.

1-1.8   Automated TO Management System (ATOMS - TO 00-5-2-102). ATOMS is a relational database application designed to assist with maintaining requirements and distribution records for TOs. It incorporates the account management functions of the paper AFTO Forms 110 and 131. ATOMS also automates the preparation of digital TO Publication Requests (TOPR) suitable for submission via Internet File Transfer Protocol (FTP) Service to OC-ALC. Air Force TODOs without on-line JCALS access **must** use ATOMS instead of manual processes for TO account record-keeping, library maintenance, and generation of a TOPR (paragraph 4-2.2). Other government activities must submit their TO requests via FTP of ATOMS-generated TOPRs, but are not required to maintain records in ATOMS.

1-1.9   Electronic Forms (EF). The AFTO Forms 110, 110A, 110B, and 131 will not be converted to electronic forms because their function is available electronically in ATOMS.

1-1.10   Security Assistance Program and Foreign Military Sales (SAP and FMS). TO 00-5-19, Security Assistance Technical Order Program, provides policy, procedures, and guidance to SAP and FMS participants (e.g. USAF, Contractor, Foreign Air Force personnel, etc.) All SAP and FMS participants must follow the provisions in TO 00-5-19 to obtain TOs.

1-2   MAJOR COMMANDS.

1-2.1   Focal Points. Command focal point(s) for matters pertaining to the TO distribution system must be appointed by each MAJCOM. A separate focal point may be established for each functional area. Current focal points will be listed in a letter or MAJCOM supplement to this TO, provided to subordinate activities, and copies provided as specified in paragraph 1-1.1. Focal points are responsible for:

1-2.1.1   Establishing MAJCOM policy and procedures for implementing this TO.

1-2.1.2   Assisting AFMC TO Managers to develop and maintain currency of Defense Message System (DMS) Personal Distribution Lists (PDLs) or Mail Lists (MLs) for command activities affected by each functional area of responsibility. TO Managers will use the PDLs/MLs for distributing RAC notification and ITO messages.

1-2.1.3   Ensuring subordinate activities develop written instructions on receipt notification and delivery of "Normal" and "Low" priority DMS messages for ITO and RAC Notifications (Reference AFI 33-113).

1-2.2   ATOMS Point of Contact. Each MAJCOM will identify an individual to provide subordinate activities with expert assistance on the operation of the ATOMS Application Program. The name, e-mail address, organization and DSN number of the POC will be provided to MSG/MMF via e-mail to *ATOMS@wpafb.af.mil* (DSN 787-8218). Current MAJCOM POCs for the ATOMS software application are listed on the TO System Information Page (paragraph 1-1.2).

1-2.3   JCALS Point of Contact. Each MAJCOM will identify an individual to provide subordinate activities with expert assistance on JCALS JTMS system issues and requirements. The name, e-mail address, organization and DSN number of the POC will be provided to MSG/MMF via e-mail *(michael.collier@wpafb.af.mil)*. Information on JCALS and other automation efforts can be found on the MMF, Integrated Digital Environment (IDE) Program Office Home Page on the WWW at URL *http:// www.pdsm. wpafb.af.mil.*

1-2.4   Centralized TO Management (CTOM) Committee Representative. See charter, TO 00-5-1. The directorate representing the MAJCOM on the AF CTOM Committee will:

1-2.4.1   Provide new installations and organizations with assistance in establishing TODOs.

1-2.4.2   Ensure TODO proficiency training requirements are developed and submitted to AETC.

1-2.4.3   Coordinate on AFTO Forms 43 for the establishment of Nuclear Weapon (NW) and Explosive Ordnance Disposal (EOD) TODOs (chapter 3).

1-3   AIR FORCE MATERIEL COMMAND (AFMC).

1-3.1   HQ AFMC/EN. The Directorate of Engineering and Technical Management (EN) is responsible for developing, coordinating, and obtaining approval for policy governing the Air Force TO distribution system.

1-3.2   MSG/MMF. MMF, the IDE Program Office, is responsible for developing and coordinating business practices and procedures for distribution and use of TOs, and for transition from the current paper-based processes to electronic processes using JCALS. MMF is responsible for the content of this TO. Contact MMF at DSN 787-8218, or e-mail *topp@wpafb.af.mil.*

1-3.3   OC-ALC/TILU. TILU is the AFMC central management office for operation of the Air Force TO distribution system. They operate a help desk function to assist users with questions relating to the TO distribution and numbering systems. Contact TILU at DSN 336-3868 or e-mail *recacct@tinker.af.mil.* TILU is responsible for:

1-3.3.1   Assigning, and controlling use of data code numbers. Reviewing and approving TO numbers.

1-3.3.2   TO Manager of the AF TO Catalog application CD-ROM. Responsible for CD labeling, production and distribution. Responsible for developing "XX" index CD-ROMs for release to FMS customers. Indexes for Joint Nuclear Weapons Publications System (JNWPS) TOs and Explosive Ordnance Disposal (EOD) TOs (chapters 7 and 10) are currently managed outside of JCALS by AAC/WNL and Det 63, AAC/CC, respectively.

1-3.3.3   Approving or disapproving AFTO Form 43 requests for the establishment of TODOs, assigning TODO Code numbers, and annotating JCALS TM Account numbers on the form.

1-3.3.4   Approving or disapproving AFTO Form 43 requests for Special Purpose TODO Codes (SPTODOCs, chapter 3) and entering other special data in the TODO address file established in the TO Management System.

1-3.3.5   Recommending new or revised distribution system policy or procedures. Assisting users with policy and procedure interpretation.

1-3.3.6   Receiving and processing Initial Distribution (ID) requirements and requisitions from contractor TODOs. Furnishing instructions to appropriate activities.

1-3.3.7   Monitoring FMS TO cases implemented in accordance with AFMAN 16-101 for AFMC.

1-3.4   Unit and Group Commanders. Commanders are responsible for ensuring TO users and distribution account managers have the required training (paragraph 1-1.3), and that distribution account management practices are periodically reviewed (table 1-3).

1-3.5   TO Warehouse Management and Operations. TO warehouses are normally located at ALCs, but their functions may be carried out by contractors or individual Single Manager (SM) organizations at other locations. Warehouses perform the "stock, store and issue" functions of the TO system for the SMs at their location. The Information Management Unit of the local Communications Squadron or Group is responsible for TO warehousing functions at an ALC. SMs not located at an ALC will develop local warehousing procedures for the TOs they manage.

1-4   TO DISTRIBUTION ACTIVITIES.

There are three levels of TO distribution activities that support TO users; TO Warehouses, TO Distribution Offices (TODOs), and TO Distribution Accounts (TODAs). The level and type of distribution activity required is based on TO storage and usage requirements and the physical location of TO-using activities. Table 1-3 is a checklist to be used by TODOs and TODAs for managing their accounts.

NOTE

> TODO and TODA personnel (AFTO Form 43, block 6) are titled TM Account Points of Contact (POCs) and "Sub-Account POCs" in JCALS. In this TO, these roles are abbreviated as simply "TODO" and "TODA." The person who has physical custody of a TO library is called the custodian.

1-4.1   Policies, Practices and Procedures.

1-4.1.1   TODOs are the single point between a unit and the TO system for identification, ordering and distribution of required TOs. Units request assignment of a TODO/TM account by submitting an AFTO Form 43 according to chapter 3. TODO/TM accounts are identified by a TODO code assigned by OC-ALC/TILUB and a JCALS-assigned TM account number. All TODO and TODA personnel must receive training according to paragraph 1-1.3.

1-4.1.1.1   All TODO and TODA personnel must either establish ID for TOs 00-CD-1 and 00-1-CD-1, or access TOs 00-5-1, 00-5-2, ATOMS and the TO Catalog from the Internet (see paragraph 1-1.2). Library custodians require access to TO 00-5-2.

1-4.1.1.2   To ensure using only the most current TO files, users should access the digital TO directly from the WWW every time it is needed. When this is not practical, the TOs may be downloaded onto file servers, floppy disks, or PC hard drives for use. When a TODO provides this service for the TODAs and users, they must verify TO file currency at least once monthly and notify their subaccounts when changes occur. When subaccounts or individual users download TOs themselves, they become responsible for ensuring they have the most current versions.

1-4.1.2   Only TODOs are authorized to establish ID (subscription) requirements and requisition TOs through the TO distribution system. Sub-account and individual TO requests must be routed through and consolidated by the TODO. Each TODO and TODA shall identify where digital copies of TOs can be used to satisfy end-use requirements. When feasible, TODOs shall submit ID requirements for digital TO versions and reduce paper copy requirements accordingly. Activities with Special Purpose TODO Codes (chapter 3) will follow procedures given in applicable sections of this TO.

1-4.1.3   Base TODO (BTODO). The BTODO services those base activities which maintain less than 100 TOs and are not part of an assigned or tenant unit or organization serviced by a TODO. Remote locations and forward deployment areas will normally be supported by the main operating base BTODO or a parent unit TODO.   According to HQ USAF/SC Program Action Directive (PAD) 99-03, MAJCOM, FOA, and DRU Publishing Management will "...direct installation commanders to assign Base TO Distribution Office (TODO) responsibilities from base PDO to appropriate base functional agency(ies) to meet the needs of their customers."

1-4.1.4   Each TODO/TM Account will have one or more sub-accounts, and each sub-account represents one or more TO libraries (see paragraphs 3-6 through 3-8). A TODO/TODA may be both an account POC and a library custodian if they maintain their own library.

1-4.1.5   TO Publication Requests (TOPRs). TOPRs must be prepared using the ATOMS program (TO 00-5-2-102) and electronically submitted to Tinker AFB via Internet File Transfer Protocol (FTP) (see chapters 3, 4 and 5). When the TODO has on-line access to the JCALS system, requests may be input directly to JCALS. Non-government TODOs not authorized FTP access will use procedures in paragraphs 4-2.2 and 9-6. See the User's Guide provided as part of TO 00-5-2-102 for ATOMS procedures.   Refer to the JCALS Desktop Instructions (DI), URL *http://www.pdsm.wpafb.af. mil/toprac/jcals_di.htm*, for JCALS procedures.

1-4.1.6   Library Maintenance.   TO library custodians are responsible for maintaining their own TO libraries.   Maintenance includes requesting new/replacement TOs as required, posting and filing TOs (paragraphs 3-10 and 3-11), and performing annual inventories (paragraph 3-14).

1-4.2   Responsibilities.

1-4.2.1   Base, Unit or Activity TODOs. TODOs perform all functions listed in paragraph 1-4.2.2, plus (a) servicing and assisting assigned units/activities, (b) encouraging and assisting activities to establish Special Purpose TODO Codes (chapter 3) when required to support special missions, and (c) assisting to establish new TODOs when required by mission changes or expanded TO library requirements.

1-4.2.2   TODOs will:

1-4.2.2.1   Submit AFTO Forms 43 to establish, change or cancel accounts (chapter 3).

1-4.2.2.2   Establish and maintain account requirements and distribution records for the TODO's own library and for sub-account libraries, using ATOMS (mandatory for AF TODOs) or the JCALS system. Update ATOMS records as TOs and status notices are received. Non-AF TODOs and TODAs may use local procedures to maintain records.

NOTE

>TODOs must back up ATOMS data files (see the User's Guide) based on frequency of use (i.e., if ATOMS is used daily, back up daily; if use is only weekly, back up weekly, etc.).

1-4.2.2.3   Establish ATOMS TO Distribution Accounts (TODAs) and assign sub-account numbers for management of TO libraries based on mission requirements. TODA account numbers may consist of the TODO number plus an extension, e.g., 0345-12. Furnish policy interpretation and procedural guidance to TODAs.

1-4.2.2.4   Consolidate all TODA TO requirements. For restricted distribution TOs and accounts (nuclear weapons or EOD TOs, contractor or FMS accounts, etc.), obtain the signature of the Government Approving Agent (AFTO Form 43, block 7) on the printed record copy of the ATOMS TOPR.

1-4.2.2.5   Review requirements to ensure only minimum essential TOs and quantities are requested. Cancel unneeded requirements promptly.

1-4.2.2.6   Submit TOPRs for validated user requirements. Retain an electronic or printed copy of the TOPR/ TM Request screen for two years, or until all actions are complete, whichever is longer.

1-4.2.2.7   Follow-up on TO request status according to paragraph 5-6.

1-4.2.2.8   Distribute TOs and TO increments to TODAs upon receipt, and notify them of backorder status and any follow-up actions being taken. Notify TODAs when digital TO files are updated.

1-4.2.2.9   Report discrepancies in TO shipments to the responsible TO Manager (discrepancies include the receipt of quantities higher or lower than ordered, TOs with missing pages, etc.)

1-4.2.2.10   Perform routine and annual ATOMS record checks and library inventories in accordance with chapter 3 for the TODO's own TO library. TODOs will assist and support their TODAs in performing annual inventories.

1-4.2.2.11   Process Account Reconciliation Reports (ARRs) according to paragraph 3-16. An ARR may be requested via e-mail request to *csrl@tinker.af.mil.*

1-4.2.2.12   Reproduce and distribute ITO messages and RACs (paragraph 1-1.5), and Urgent/Immediate Time Compliance TOs (TCTOs) to all affected TODAs by the fastest available means.

1-4.2.2.13   Approve and submit requests for local reproduction of TOs (paragraph 1-1.4).

1-4.2.3   TODAs will:

1-4.2.3.1   Obtain an account number from the TODO. Establish TO sub-accounts as required. Notify the TODO promptly of any personnel changes or deactivation of the TODA.

1-4.2.3.2   Maintain requirements and distribution records if TOs are redistributed to subaccounts. If the TODA redistributes to sub-accounts the ATOMS must be used. Other TODAs may maintain ATOMS records, based on library location and size, TODO workload, and/or special account requirements. Perform routine and annual records checks and assist custodians with sub-account library inventories.

1-4.2.3.3   Consolidate, validate and submit account TO requirements to the TODO. Redistribute TOs and increments upon receipt.

1-4.2.4   Library Custodians. Post and file TOs as they are received (paragraphs 3-10 and 3-11). A current record of TOs on hand and on order must be collocated with the library. Records may consist of ATOMS, applicable ATOMS listings (paragraph 3-14), or other documentry files showing receipts and orders. Notify the TODO/TODA of changed requirements (added, deleted or replacement TOs). Maintain control of TO copies. Perform annual inventories.

1-4.3   Transferring TODO Accounts. When a unit or activity is transferred, the libraries may be physically transferred and a change of address for the TODO account submitted using the AFTO Form 43 (chapter 3). When requirements change from the previous location, the account must be canceled or updated accordingly.

1-5   THE AIR FORCE METROLOGY AND CALIBRATION (AFMETCAL) PROGRAM.

The AFMETCAL program is managed by Det 1, WR-ALC/ML, and is the TO Manager responsible for Category 33K TOs. Det 1 may use an established electronic bulletin board system to distribute interim calibration TO changes to Precision Measurement Equipment Laboratories. These interim changes will be published as Supplemental Manuals, and will be incorporated into the parent manuals during the next routine update.

Table 1-3 is for guidance and reference. It may be used when establishing TODO accounts or subaccounts and during inspections and surveillance visits. A partial check may be made using any group of items in the list. Discovery of major discrepancies warrants a detailed inspection of all functions. References are to this TO unless otherwise specified. The applicability column indicates whether the item applies to TODOs or to accounts.

Table 1-3.   TODO and TO Account Checklist

ITEMS	APPLICABILITY		CHECK
	TODO	ACCT	
1. GENERAL			
a. Has a Base, Group, Unit or Activity TODO been established (paragraph 1-4.1.1)?	X		
b. Are Special Purpose TO Distribution Office Codes (SPTODOCs) requested when required (paragraph 3-3)?	X		
c. Is the AFTO Form 43 current (paragraph 1-4.2.2.1)?	X		
d. Have personnel authorized to submit TO requests been identified on AFTO Form 43 (paragraph 3-2.6)?	X		
e. Have TODO/TODA personnel completed training (paragraph 1-4.1.1)?	X	X	
f. Are current, complete copies of TOs 00-5-1, 00-5-2, 00-5-2-102, and the TO Catalog Application on hand or readily available (paragraphs 1-4.1.1, and 3-4)? 00-5-series TOs are available on the TO System Information page at URL *http://www.pdsm.wpafb.af.mil/toprac/to-syste.htm.*	X	X	
g. Are TODO personnel familiar with TO 00-5-2? (1) Responsibilities (paragraph 1-4)? (2) Terms (Acronyms and Glossary)? (3) Types and locations of libraries (paragraphs 3-7, 3-8 and 3-9)? (4) Procedures for filing and posting TOs (paragraphs 3-10 and 3-11)? (5) Procedures for use of the ATOMS and/or JCALS programs (paragraph 3-13)? (6) Requirements for checking Account records and libraries (paragraph 3-14)? (7) Procedures for establishing ID requirements (chapter 4)? (8) Emergency and urgent requisition procedures (paragraph 5-3)? (9) Procedures for ordering individual TOs, increments and TCTOs (paragraph 5-2)? (10) Use and meanings of TO Request Status Notification (TORSN) codes (paragraph 5-5)? (11) Procedures for TOPR follow-up (paragraph 5-6)?	X	X	

Table 1-3. TODO and TO Account Checklist - Continued

ITEMS	APPLICABILITY		CHECK
	TODO	ACCT	
h. Has the TODO obtained a user name and password to support FTP of TOPR files to Tinker (paragraph 4-6.2.1)?	X		
i. Is the policy on reproduction of TOs followed (paragraph 1-1.4)?	X	X	
j. Are ARRs processed and filed properly (paragraph 3-16)?	X		
2. **TO REQUIREMENTS.**			
a. Are libraries limited to mission needs (paragraph 3-6.3)?	X	X	
b. Are requirements submitted according to paragraphs 4-2 and 4-3?	X	X	
c. Are submissions made by FTP (paragraph 4-2.2)?	X		
d. Have requirement records (ATOMS AFTO Forms 110) been established (paragraphs 3-12 and 3-13)?	X	X	
e. Are records and requirements kept current (paragraph 3-14)?	X	X	
f. Are signed copies of ATOMS TOPRs or JCALS screen print-outs maintained on file until completion of all requested actions (paragraph 1-4.2.2.6).	X		
g. Are "Sponsor Approval" TO ordering procedures followed (paragraph 4-7)?	X		
h. Are individual TOs not ordered more frequently than every five days (paragraph 5-2.1)?	X	X	
i. Does the TODO understand TO shipment shortage and overage procedures (paragraph 6-3)?	X		
3. **DISTRIBUTION.**			
a. Is the TODO/TODA responsible for redistribution (paragraphs 1-4.2.2.2 and 1-4.2.3.1)?	X	X	
b. Are TOs and increments redistributed as soon as they are received (paragraph 1-4.2.2.8)?	X	X	
c. Are priority TCTOs, RACs and ITOs reproduced and distributed by the fastest available means (paragraph 1-4.2.2.12)?	X	X	

CHAPTER 2

AIR FORCE TO CATALOG

2-1   GENERAL.

2-1.1   The TO Catalog provides TO System customers with information about active AF TOs, flagged as "available for published index" in the JCALS Joint Technical Manual System (JTMS) TM Index data records. It also provides equipment and Technical Order cross-reference information.

2-1.2   JCALS TM (or TO) Index records document information about management and the configuration of AF TOs whether active or rescinded, published or unpublished. "On-line" JCALS users (paragraph 1-1.7.3) may view current TM Index data for any TO whether active or rescinded.

EXCEPTIONS: Nuclear Weapon TOs are indexed in the Electronic TO Management System (ETOMS-chapter 7); EOD TOs are indexed in the Automated EOD Publication System (AEODPS-chapter 10); and Country Standard TOs are indexed in the Security Assistance TO Data System (SATODS-TO 00-5-19).

2-1.3   The Catalog is used to help identify TO Initial Distribution (ID) requirements and to verify the accuracy of ATOMS TO requirements and distribution records as well as the currency of publications in TO libraries.

2-1.4   Legacy G022 Interservice Technical Information Exchange System information was converted and loaded into the JCALS JTMS July 1999.   The functionality of the ITIES system and its companion (microfiche) product TO 0-4-6-2 are now available in the TO Catalog Application as Equipment and TO Cross Reference.

2-2   DESCRIPTION.

2-2.1   The TO Catalog is available on the Internet and on CD-ROM.

2-2.1.1   The Internet version is updated monthly and is available through the TO System Information page at URL *http://www.pdsm.wpafb.af.mil/toprac/index.htm.*Access to the Internet version is limited to DoD personnel (*.mil Internet Protocol [IP]address).

2-2.1.2   The CD ROM version of the TO Catalog is distributed quarterly as TO 0-1-CD-1.   Users must establish an Initial Distribution (ID) requirement (chapter 4) for TO 0-1-CD-1 to receive distribution of quarterly updates. Distribution is limited to US government agencies and their contractors with a TODO/TM Account.

2-2.2   There are eight functions of the TO Catalog. Four provide principal TO catalog functionality while the remaining four provide general and support information.

2-2.2.1   Principal Catalog search functions include "Search TO Catalog;" "New, Updated and Rescinded TOs; Searching for TCTOs;" and Equip and TO Cross-Reference.

2-2.2.2   General and support functions include links to digital TOs, frequently asked questions (FAQs), what's new, and search tips.

2-3   USING THE AF TO CATALOG APPLICATION.

2-3.1   Starting the Application.

2-3.1.1   Using a web browser application (Internet Explorer v4.0 or higher recommended), select (click on) the TO CATALOG button (link) on the TO System Information web page. Add the URL for the TO Catalog to the browser's Favorites list to connect directly to the TO Catalog from the web browser application's home page.

2-3.1.2   The CD ROM version requires an IBM-compatible PC using MS Windows operating system (Win 9x or NT). To start the CD ROM version (TO 0-1-CD-1), simply place it into the PC's CD-ROM drive. If the TO Catalog Application does not automatically start, select Windows Start; Run, and then enter the CD-ROM drive letter and TO Catalog application start command "tocat.exe." For example, d:\ tocat.exe.

2-3.2   Searching the TO Catalog for Information – the principal TO Catalog functions.

2-3.2.1   Search TO Catalog. This is the basic TO Catalog search screen. Users may search for information about an entire series of TOs or a single TO, a TO Supplement or a TCTO. This function provides essentially similar information as could be found in Part 2 of legacy microfiche TO Index products.

2-3.2.2   The Search TO Catalog function provides access to TM Index for active TO/TCTO Series and rescinded TCTOs. Search criteria include TO Number, TO Publication Date, Publication Stock Number and Document Type (Basic, Change, Revision or Supplement).

2-3.2.3   To initiate a search, users must enter at least some part of the TO Number. Entering a complete TO Number and other information will limit the search and return results quicker.

2-3.2.4   Basic search results are presented in a table view and will include TO Revision number and date, Publication Stock Number, latest TO Change (if any), Proponent (TO Management) Organization identifier and other important information. More detailed information may be viewed by clicking on a TO number shown in the table view of search results.

2-3.2.5   Detailed information includes other pertinent information including TO title, Weapons System and Equipment, TO Manager, Equipment Specialist and Distribution Manager names, phone numbers and e-mail addresses. It also includes notes entered by the TO Manager relating special information about the TO and/or it's availability.

2-3.3   New/Updated and Rescinded TOs. JCALS TM Index data found in this function is extracted from JCALS TM Index data tables for new unpublished TOs, distributed TO updates and TOs that are rescinded (as entered by the TO Manager) sometime during the previous month (quarter for CD ROM). This function provides essentially the same information as could be found in Part 1 of the legacy TO Indexes.

2-3.3.1   Users may select to view all information for new/updated and rescinded TOs or select to view information separately. The Search button may be clicked without entering a TO Number to obtain a complete listing of TOs for each category.

2-3.3.2   The Archives section provides users access to previous three months' data for the Internet version and previous quarter's data for the CD ROM version.

2-3.4   Search for TCTOs. Users may obtain information on active or rescinded TCTOs by TCTO Series. Only those TCTO Series with at least one active TCTO will be included.

<div align="center">NOTE</div>

Searches for TCTO Series without active TCTOs may best be performed using the Search TO Catalog function.

2-3.4.1   A search for TCTOs/TCTO Supplements is initiated by selecting a TCTO Series Header from the list box. It is recommended that a specific TCTO Series always be selected before initiating search for TCTO information.

2-3.4.2   Searches may be tailored by indicating a publication date, selecting a single document type (Basic or Supplement) and/or publication status (active or rescinded). More detailed information may be viewed by clicking on a TCTO number shown in the table view of search results.

2-3.5   TO and Equipment Cross-Reference. Users may search for equipment information for a TO/TCTO Series or search for TOs established for equipment support. This function is essentially similar to the Equipment Number to TO Number Cross-Reference (TO 0-4-6-2-CD-1). The more complete and accurate the equipment or TO number entered, the shorter the list of possible matches.

2-3.5.1   To initiate a search for TOs Related to Equipment Number, users must enter at least some part of the equipment number and click the Search button (press Enter key). Search results will include all TO numbers related to the number initially entered. Clicking on the TO number in the initial search results screen will connect the user to the detail Catalog TM Index record for the TO.

2-3.5.2   To initiate a search for Equipment Related to TO Number, users must enter at least some part of the TO number and click the Search button (press Enter key). Search results will include all equipment number related to the TO number initially entered. Clicking on the equipment number in the initial search results screen will return detailed information about the Equipment item/s.

2-3.6   Obtaining useful and supporting information – TO Catalog general and support functions.

2-3.6.1   Digital TOs.   Links to the AF TO System Information web page (URL *http://www.pdsm. wpafb.af.mil/toprac/techord.htm)* where users may download digital TO files or link to other web pages where digital TO files may be downloaded.

2-3.6.2   FAQ.   This link connects to the TO Catalog function where documented answers to users' Frequently Asked Questions (FAQ) may be reviewed.

2-3.6.3   Search Tips: Displays guidance and tips for performing searches of TO Catalog.

2-3.6.4   What's New: Information found on this page is updated periodically to describe new features or modified functionality.

2-4   TO CATALOG PRACTICES AND PROCEDURES.

2-4.1   TO Publication and Distribution Dates.

2-4.1.1   Publication dates shown on TO title pages and in the Catalog indicate the "copy freeze date" for the data included in a TO update. It is after this date that TO updates are then produced and distributed. As a result, distribution of TO updates lags the TO publication date.

2-4.1.2   TO Managers will set the Available for Distribution flag in the JCALS TM Index record to "Yes"and enter the Estimated Distribution Date (EDD) when a TO/TCTO/TO update is produced and processed of Initial Distribution. The TO Catalog will provide both dates (when available).

2-4.1.3   When the Distribution element indicates "Yes," the TO may be requisitioned. If the Available for Distribution element in the TO Catalog indicates "No," requisitions for the TO will be rejected. If the Catalog indicates that the TO is available for distribution but does not list and EDD for the TO/TO Increment and the Publication Date is more than 60 days old, TM Account POCs should contact the TO Manager to determine if and when the TO update was distributed.

2-4.1.4   Even though requisitions for a TO or TO Update will be rejected unless marked as available for distribution, TM Account POCs must allow sufficient production and delivery time prior to submitting requisitions for "missing" TOs (see paragraph 3-14.2.1) - at least 60 days after the "Estimated Distribution Date (EDD) if shown in the TO Catalog or after TM Account POC first realizes the TO/TO update is available for distribution.

2-4.1.5   TOs on hand are current and should be used until a superseding/replacing update is received. This may be two to six weeks after the increment's EDD listed in the catalog.

2-4.2   Security Classification/Proposed Classification. The TO classification codes are U - Unclassified, C - Confidential, and S - Secret. When applicable, restrictions are shown following the classification as F - Formerly Restricted Data, or R - Restricted Data.

2-4.2.1   A TCTO series will be assigned multiple proposed classifications when it is expected that individual TCTOs in that series will require different levels of classification. The actual classification of individual TCTOs is printed as the first word of the title line unless it is unclassified.

2-4.3   Reporting TM Index and Catalog Errors.

2-4.3.1   Catalog users who discover errors with TM Index information for a TO or TOs should report discrepancies to the responsible TO Manager via telephone or e-mail as soon as possible.

2-4.3.2   Problems with data presentation or suggestions to enhance the Catalog application layout and function should be reported to the Webmaster (listed on the Catalog's web page). Users without access to the Internet version should submit these reports via e-mail to *topp@wpafb.af.mil.* If approved, corrections and enhancements will be made to both the Internet and CD-ROM applications.

CHAPTER 3

ESTABLISHING TO DISTRIBUTION OFFICES (TODOS); TO LIBRARIES AND REQUIREMENTS;

AUTOMATED TO MANAGEMENT SYSTEM (ATOMS)

3-1   GENERAL.

This chapter contains policy and procedures for establishing a TODO, determining and establishing TO requirements and maintaining TO libraries. Activities must be assigned TODO and JCALS TM Account Codes to order and receive Air Force TOs. Activities requiring Computer Program Configuration Items, related compendiums, and engineering documentation packages managed in the Computer Program Identification Numbering (CPIN) System should consult TO 00-5-17 for policy and procedures.

3-2   AFTO FORM 43 COMPLETION INSTRUCTIONS.

An AFTO Form 43 (figure 3-1) is used to submit requests to establish or cancel a TODO, or change TODO information. Completed forms are submitted according to paragraph 3-2.2.2. The form will be prepared as follows:

NOTE

- When a TODO address is changed or a TODO is canceled, it may require up to 60 days to clear the distribution system of shipping actions initiated before the change was made.

- This form may also be used by the TODO POC to record internal TODA personnel assignments.

3-2.1   Heading Information:

3-2.1.1   **TYPE OF REQUEST.** Enter an X in the appropriate block.

NOTE

To **CANCEL** a TODO/TM Account in JCALS, the TODO must first submit an ATOMS TOPR canceling ID (AFTO Form 110 Part 1 Delete TO) for all TOs, prior to submitting an AFTO Form 43 (temporary workaround).

3-2.1.2   **TODO/TM ACCOUNT CODE.** For a revised request or TODO cancellation, enter the assigned TODO and JCALS TM Account codes.

3-2.1.3   **DATE.** Enter the date the request is submitted. Use the all-numerical "yyyymmdd" format.

3-2.2   Address Blocks:

3-2.2.1   Block 1 - **FROM.** Enter the TODO's mailing address, including organization/office symbol, street address, city/base, state and complete nine-digit ZIP code. Addresses must not include names of individuals in the attention line. For address changes, enter the TODO's new address in this block and enter the old address in block 3.

3-2.2.2   Block 2, **TO.** This block has an associated "Help" function which lists required addresses. Requests involving EOD and NW TODOs are submitted to Det 63 AAC/CC or AAC/ WNL, respectively. All other requests are sent to OC-ALC/TILUB.

3-2.3   Block 3 - **TECHNICAL ORDER MAILING ADDRESS.** When TOs will be mailed to an address different from the TODO's address, enter the complete TO delivery mailing address, including organization/office symbol, street address, city/base, state and nine-digit ZIP code. For TODO address changes enter the old address, clearly marked as no longer valid. NW TODOs must enter their organization's Defense Message System (DMS) address, whether or not a street address is provided.

3-2.4   Block 4 - **TODO TYPE.** Place an X in the appropriate block(s) and enter corresponding information as applicable.

3-2.4.1   Blocks 4a, 4b and 4c - Government TODOs, including contractor-operated government TODOs, will mark one block (only) to indicate whether they will be a Standard (paragraph 1-4), NW (chapter 7) or EOD (chapter 10) TODO.

3-2.4.1.1   Block 4d - If the organization is an Air Force activity, mark this block and enter the parent MAJCOM (ACC, AMC, etc.)

3-2.4.2   Block 4e - If the organization is another government activity (not Air Force), mark this block and enter the department or agency (Army, Navy, DOE, etc.)

3-2.4.3   Block 4f - If the organization is a contractor with a Government contract, mark this block and enter the contract number(s) and issuing government agency. If the TODO will service more than one contract, enter additional contract and issuing agency information on the continuation sheet (include contract termination dates).

3-2.4.4   Block 4g - **CANCELLATION DATE.**

3-2.4.4.1   The responsible PCO or ACO will enter the contract termination date in this block and sign block 8. Use the all-numerical "yyyymmdd" format. (If block 4f is checked and the termination date is not entered, the form will be returned without action.)   This requirement does not apply to contractor-operated government TODOs.

3-2.4.4.2   For **CANCELLATION** type requests, TODOs will enter the cancellation effective date.

3-2.4.5   Block 4h - **OTHER.** Special Purpose TODOs other than EOD and NW TODOs will enter the special purpose TODO code type (paragraph 3-3) being requested. Enter "Contractor-operated government TODO" when applicable.

3-2.5   Block 5 - **SECURITY LEVEL AUTHORIZED.** Enter the security level (unclassified, confidential, secret, restricted data, etc.) that the organization has authorization and adequate facilities, equipment, and properly cleared personnel to receive and safeguard. Include Special Access Required (SAR) when applicable, in accordance with AFI 31-401. For NW-EOD-TODOs only, include the statement "Category 60N TOs are needed, Critical Nuclear Weapons Design Information (CNWDI) is required in accordance with AFI 31-401, and certification has been completed."

3-2.6   Block 6 - **TODO PERSONNEL.** Enter one primary and at least one alternate names, voice and fax phone numbers, e-mail addresses, and signatures of TODO personnel (TM Account POCs) authorized to submit TO Publication Requests (TOPRs). Individuals must be US citizens.

3-2.7   Block 7 - **GOVERNMENT APPROVING AGENCY.** Complete block 7 on all forms. For a government TODO, the blocks will be completed by the activity's command or maintenance/operations supervision personnel authorized to request establishment of a TO Distribution Office, and approve requests for NW and EOD TOs. For a contractor TODO, the blocks will be completed by the official(s) authorized to approve the contractor's TO requirements for the PCO or ACO (e.g., the Contracting Officer's Technical Representative [COTR] or government Quality Assurance personnel).

3-2.8   Block 8 - **COMMAND/CONTRACTING OFFICER APPROVAL.** Complete block 8 only when requesting a contractor, EOD, or Nuclear Weapons Special Purpose TODO Code. The blocks will be completed by the PCO/ACO for contractor TODOs, and by the MAJCOM approving official for EOD and NW TODOs. NW TODO requests must have the original MAJCOM approving official's signature, which must be the same as that provided according to paragraph 7-2.2.2. When there is more than one ACO or PCO monitoring contracts listed in block 4e, additional information and signatures will be shown on the continuation sheet.

3-2.9   Block 9 - **FOR AFMC TODO CODE MANAGEMENT ACTIVITY USE ONLY.** Leave blank. OC-ALC/TILUB, AAC/WNL or Det 63 AAC/CC will use this block for approval/disapproval of TODO requests in their respective areas.

3-2.10   The reverse side of AFTO Form 43 will be used to provide complete justification for NW and EOD TODOs. The justification on the form itself must be unclassified. Provide classified justification by separate letter with the AFTO Form 43 as an unclassified attachment.

3-3   SPECIAL PURPOSE TODO (SPTODO) ACTIVITIES.

Types of activities assigned special purpose TODO codes are listed below. Due to their specialized functions they may not be required to maintain ATOMS records except as needed to prepare TOPRs. The AFTO Form 43 requesting establishment will be accompanied by a cover letter containing justification. Activities must comply with directives and procedures provided with notification of code assignment; otherwise the code is subject to cancellation.

3-3.1   Defense Contract Management Command (DCMC) Offices (chapter 9). When the government office in charge of contract oversight determines that contractor-required TOs must be ordered and distributed through the oversight office, the TODO code will be issued to the DCMC office. TOs provided will be limited by requirements of the contract(s) involved. Release of TOs to the contractor after receipt is the responsibility of the DCMC.

3-3.2   Contractor. See paragraphs 9-5 and 9-6. A TODO code is issued when a contractor is authorized direct receipt of TOs required to fulfill the requirements of a Government contract(s).

3-3.3   OC-ALC/TILUB. This TODO receives a copy of every TO and increment for placement in the USAF TO Repository (paragraph 9-11).

3-3.4   EOD TODOs (chapter 10). Codes assigned and managed by Det 63, AAC/CC. Nuclear EOD (NW EOD) and Nonnuclear EOD TODOs are both required to maintain classified TO receipt records according to DOD 5200.1-R.

3-3.5   Nuclear Weapons (NW) TODO (chapter 7). NW-TODOs must use the ATOMS program to maintain account records. They may order NW TOs using either the electronic AFTO Form 187 or an ATOMS TOPR set for G022 format (see ATOMS User's Guide), and submitted according to chapter 7 of this TO.

3-3.6   Foreign Military Sales. These activities have codes assigned by the Security Assistance TO Data System (SATODS), according to procedures in TO 00-5-19.

3-3.7   Activities Removed from SPTODO Status. Special codes used to be assigned to civilian fire departments for distribution of TO 00-105E-9 (now distributed electronically) and to non-TODO TO managers for distribution of G022 management products.

3-4   OC-ALC ACTION ON AFTO FORM 43 REQUESTS.

3-4.1   OC-ALC/TILUB will return approved AFTO Forms 43 to the requesting organization, annotated with the TODO code and JCALS TM Account numbers assigned.

3-4.2   TILUB will include a cover memo providing the Internet address (URL) of the TO System Information Page (paragraph 1-1.2) and instructions to download the ATOMS program for TO ordering and account management. The memo will explain that this address also provides access to MPTOs, the Air Force TO Catalog Application, and other valuable TODO information. For US Government TODOs only, the memo will provide the IP address, username, and password required to submit ATOMS TOPRs via File Transfer Protocol (FTP) to the Tinker AFB Intersite Gateway (paragraph 4-6). Non-Government TODOs will be instructed to establish ID and requisition TOs 00-CD-1 and 0-1-CD-1.

3-5   TODO ACTION ON ACCOUNT APPROVAL.

TODOs with a JCALS user profile and TM Account POC privileges, may use JCALS TM processes in conjunction with the ATOMS program to order TOs and obtain information to assist with account management. TODOs without JCALS user profile will access relevant Methods and Procedures TOs (MPTOs) and obtain the ATOMS program (TO 00-5-2-102) from the TO System Information Page (paragraph 1-1.2). DoD TODOs may access the Internet TO Catalog application from this same page, and establish ID and requisition required TOs according to this TO, chapters 4 and 5. Non-DoD TODOs must establish ID for (order) the catalog application on CD-ROM, TO 0-1-CD-1. Access to TOs 00-5-1 and 00-5-2 (either on the TO System Information Page or TO 00-CD-1) is required by all TODOs for TODO account management.

3-6   TO LIBRARIES.

A TO library consists of one or more current TOs with all changes, revisions, and supplements maintained on a continuing basis. A special-purpose library might contain non-current TOs. Each library will be assigned a TO Distribution Account (TODA) number. A work or study copy issued for one-time use is not a TO library.

3-6.1   TO libraries are established to provide personnel at all echelons quick access to the TOs required for the efficient and effective performance of assigned duties. All base-level libraries are "limited" libraries. The TO Repository maintained by OC-ALC/TILUB is the only "complete" library authorized.

3-6.2   TO libraries may be of many types and uses; e.g., an organization's shelf library, an extra-copies library, a deployment support library, or one or more TOs for use by an individual.

3-6.3   Library contents will be limited to the Operations and Maintenance (O&M) TOs and necessary methods and procedures TOs (MPTOs) required to support the mission of the organization.

3-6.4   TO Repository. The repository consists of official record TO copies required for compliance with Air Force and federal records retention provisions (AFMAN 37-139). When ID is made, one copy of every TO and TO update is forwarded to OC-ALC/TILUB for placement in the TO repository.

3-7   AUTHORIZED TYPES OF LIBRARIES.

3-7.1   Operational Libraries. These libraries are established and located to support operations and maintenance missions. Operational libraries will contain only those TOs required to accomplish the operational and maintenance responsibilities of the activities they serve.

3-7.1.1   TOs in dispatch kits (used to support off-site operations) are either managed as part of the unit's operational library, or as separate sub-account libraries. Local procedures may be established to govern and control these kitted TOs.

3-7.1.2   Operational libraries may contain extra copies of TOs when required to support simultaneous maintenance actions.

3-7.2   Emergency Operating Instructions Libraries. Aircraft Emergency Operating Instruction libraries may be established and maintained in the control tower, base operations, or the command post as a local option. If established, the library will contain the title page, List of Effective ("A") Pages, and the Emergency Procedures chapter of each -1 Flight Manual for primary assigned aircraft, and Safety Supplements or other supplements determined applicable thereto. The "A" page will indicate which portions of these manuals are maintained in the library. A special notice is sometimes printed on the title page of a classified -1 Flight Manual, authorizing declassification of the Emergency Procedures chapter when it is withdrawn from the manual. In the absence of this notice, the chapter must retain the classification of the manual and be safeguarded, <u>but</u> radio transmission of instructions, in the clear, is authorized under emergency conditions.

NOTE

When classified emergency operating instructions have been transmitted in the clear, promptly report all available facts concerning the incident to the activity having technical responsibility for the manual. This activity will determine whether the information should be downgraded or declassified.

3-7.3   Aircraft Libraries.

3-7.3.1   MAJCOMs may direct retention of operations and maintenance TOs on board aircraft. Wing and Group commanders may specify other data to be carried in aircraft. Libraries will not be maintained in permanently grounded aircraft. The TODO will assign a separate sub-account number to each aircraft library.

3-7.3.2   Aircraft commanders may include additional publications as required.

3-7.3.3   Technical data required by other Air Force directives will be maintained as prescribed for each aircraft.

3-7.3.4   Current, serviceable technical publications must accompany aircraft when they are transferred.

3-7.3.5   Provisions of North Atlantic Treaty Organization Standardization Agreements (NATO STANAGs) 3462 and 3767, Central Treaty Organization (CENTO) STANAGs 3462 and 3767, and Air Standardization Coordinating Committee (ASCC) AIR STD 44/16D require that applicable -1, -5, and -9 TOs, and the Aircraft Weight and Balance Handbook, shall be carried on cargo-type aircraft to facilitate loading operations during international combined operations involving NATO, CENTO, or ASCC nations. Changes or deviations from this requirement will not be made without the authorization required by AFI 60-101. The US will limit the carrying of cross-servicing information to transport and bomber aircraft in accordance with AIR STD 11/16A.

3-7.4 Transient Aircraft Library. This library may be established on bases where it is common to service or perform organizational or intermediate level maintenance on transient aircraft not normally assigned to the base. The library will usually contain Category 1 aircraft TOs for each type or model of aircraft that would normally be expected to use the maintenance or service facilities of the base.

3-7.5 Reference Libraries. These libraries are authorized for use by activities whose duties do not include operating or maintaining equipment and will be marked "For Reference Purposes Only." TOs in reference libraries need not be current. Reference library records may be kept in ATOMS or as locally determined.

NOTE

> MAJCOM, Product Improvement and other maintenance staff activity librar-
> ies are not considered "Reference" libraries and must be current.

3-7.6 Training Libraries. These libraries are established to support training courses.

3-7.6.1 TOs used for training must be current, and may be loaned to students for use in the classroom (to be returned after the training). TOs will not be given to students as handouts, although portions of TOs may be reproduced for student retention if required.

3-7.6.2 Filing methods to facilitate issue of publications for training operations may be devised locally. See paragraph 3-11.6.7.

3-7.6.3 The TO Pub Date in the TO catalog will not be the sole criteria for determining currency of training TOs. The compatibility of the TO with the training equipment item, the criterion or enabling objective, the technique employed (as identified in the plan of instruction or other applicable course control documents), and TO changes that affect curriculum are factors that must be considered.

3-7.6.4 Training libraries used in non-equipment oriented instructions must be pertinent to the training exercise identified in the course control documents. Title pages for TOs that satisfy such course applicability requirements shall be marked "For Training Purposes Only" when the TOs are not and will not be maintained current according to the TO catalog.

3-7.7 Contractor Libraries. Commercial organizations with Air Force contracts are authorized to have TO libraries for use in accomplishing contract requirements, with the approval of the responsible PCO or ACO. This includes libraries for contractor personnel located on Air Force installations. The scope of contractor libraries is determined by the responsible PCO or ACO. These libraries are the property of the Air Force and are maintained in accordance with contract requirements.

NOTE

> A contractor operating a TODO in direct support of a government operation
> (e.g., a Systems Engineering and Technical Assistance [SETA] contractor) is
> considered a government TODO. Upon contract termination, the TODO code
> will return to the AF or transfer to a new contractor who will perform the
> service. However, if the contractor also maintains a separate TO library for
> company use, they must have a separate TODO Code and follow the same
> procedures as other contractor TODOs.

3-7.8 Rescinded Copies Libraries. Air Force activities may maintain a library of rescinded TOs when needed for special programs and projects. Immediately upon notice of TO rescission (Part I of the TO catalog), the copy to be retained will be placed in a library separate from active TOs; and the binder and TO title page will be conspicuously marked "RESCINDED." If an Air Force activity needs to obtain a rescinded TO, it may be requisitioned from the appropriate SM according to chapter 9 of this TO.

3-7.9 Reclamation Removal Package Library. (Authorized only for the Aerospace Maintenance and Regeneration Center (AMARC.) These packages are developed at AMARC for use in removing assets from reclaimed aircraft.

3-7.10 Work Package Libraries. Selected depot and intermediate maintenance manuals contain work packages (WPs) for specific tasks. Maintenance organizations are authorized to establish individual work package libraries at their option. This includes reproducing work packages and distributing them internally to designated work stations. It is the responsibility of the using maintenance organization to develop local instructions to ensure that individual work package libraries are properly maintained.

3-8   TOs TEMPORARILY ASSIGNED TO INDIVIDUALS.

Job-related TOs are authorized for assignment to individuals such as missile crew members, crew chiefs, system specialists, supervisors, research and development personnel, and others having justified requirements for personal-use copies. TOs temporarily assigned to individuals are not the property of the individual since they belong to the library from which they were distributed. Library custodians must keep accurate records of individually assigned TO copies. The individual will maintain the copies in current status; they are subject to inspection. Upon transfer or separation, the individual is required to return the copies to the appropriate library. Personal copies of Flight Manual Program (AFI 11-215) publications are given to pilots and flight crew members on active flying status.

3-9   LOCATION AND USE OF LIBRARIES; USE OF BINDERS.

3-9.1   TO libraries will be maintained in convenient locations for immediate reference by all using personnel. Activities maintaining a TO library will use a charge-out system to account for TOs removed from the library area. TOs will be filed in any type of binder which will protect and facilitate the use of the TO.

NOTE

Schematics may be laminated with a protective plastic covering, appropriately cross-referenced from the TO, and kept in a designated location when not in use.

3-9.2   Binders will be labeled to indicate contents. Optional markings, such as office symbol or type of equipment covered, may be included. For TOs not restricted to fixed libraries, the label should contain information on accountability (e.g., name of individual to whom issued, kit number, account to which assigned, or assigned local control numbers). Floppy disks and CD-ROMs may be marked with file identification and copy numbers using permanent felt-tip markers, either on the disk label or on its protective sleeve. DO NOT MARK ON THE UNPRINTED SURFACE OF A CD-ROM!

3-9.3   The AFTO Form 32 may be used to label standard 8 1/2x 11 TO binders, available through the GSA Catalog. The forms are available through normal forms supply channels and are authorized for computer generation, providing the CG version conforms to the published version.

3-10   FILING TOs.

3-10.1   The method of filing must facilitate locating and maintaining TOs. TOs are normally filed in TO index or alphanumeric sequence. TOs requiring nonstandard size binders and digital media may be filed separately within the library. Classified TOs will be filed in accordance with DOD 5200.1-R and AFI 31-401.

```
┌─────────────┐
│   WARNING   │
└─────────────┘
```

Classified TOs must not be transmitted over a non-EMSEC (EManation SECurity) protected LAN/WAN, or used on a non-EMSEC computer, and classified disks/hard drives must be protected according to DOD 5200.1-R.

NOTE

TO files on CDs can be downloaded onto a file server accessed through a Local Area Network (LAN), or downloaded from a CD drive on the LAN onto the computer's hard drive or a floppy disk, or used directly from a CD tower connected to the LAN. In these cases, one copy of the CD may replace multiple paper copies. Where the LAN is unavailable or hard drive space is limited, CDs may be ordered for each account and be used directly with individual computers having a CD drive.

3-10.1.1   A cross-reference sheet will be used to show the location of all TOs filed or stored away from the primary library, including the location of digital TO files and media.

3-10.1.2   No TOs will be removed from libraries and destroyed unless they are first listed as rescinded or superseded in the TO Catalog, or are declared excess to needs by the using organization.

3-10.1.3   Library custodians will prominently mark the title pages of "incomplete" and "superseded" TOs. Superseded TOs may be retained in the library at the discretion of the unit commander, pending receipt, documentation, and filing of superseding TOs.

3-10.2   When TOs are used together as a set the MAJCOM or unit may allow filing the sets in set binders numbered as "SET (X) of (Y)."

3-10.3   Each unit is authorized to devise its own method for filing Inspection Workcards, Code Manuals, TO Checklists, 33K and 33L Series TOs.

3-10.4   Renumbered TOs. When a TO has been renumbered, the old number will be lined out in ink on the title page, the new number inserted, and the TO filed in the new number's correct sequence.

3-10.5   Commercial Publications. Commercial publications with TO numbers assigned may be filed with other TOs or in a separate library. Identifying Technical Publication Sheets (ITPS) will remain with the publications. Base local purchase commercial publications will not be filed with TO-numbered commercial publications.

3-10.6   Preliminary TOs (PTOs). PTOs will be filed in sequence with formal TOs.

3-10.7   Other Preliminary Data. Preliminary publications may be shipped with newly acquired equipment for use until receipt of the formal TO or the approved commercial manual, according to TO 00-5-1. Preliminary data was formerly called "PACK-UP DATA" - this term is no longer used. File this data as locally determined, and establish ID requirements for the formal TO. All extra copies of commercial manuals will be returned to the appropriate TO Manager. Contact the TO Manager for guidance on extra copies of other manuals.

3-10.8   Mixed Media TOs. Each unit will devise and document its own method of maintaining mixed media files (e.g. a CD-ROM TO with paper supplement), should the use of mixed media become necessary.

3-10.9   Digital TOs. For digital TOs distributed on a physical medium (i.e., CD-ROM), the medium will be filed using the same sequence logic as the unit's paper TOs. TO files downloaded from the Internet or a CD will normally be kept in electronic folders named to facilitate finding the TOs. The folders can be hosted on a PC or server accessible via Local Area Network (LAN).

3-10.10   Other DOD Component Technical Manuals. DOD TMs assigned Air Force TO numbers will be filed like any other TO.

3-11   POSTING TOs.

"Posting" is the process of incorporating updates into individual TOs within a library to ensure they are maintained current and accurate for use.

3-11.1   Authorized Updates. Only update types listed in TO 00-5-1 are authorized for use. Questions about receipt of any other technical documents should be referred to the appropriate TO Manager. Interim Message Changes (IMCs) are not authorized.

<div align="center">NOTE</div>

> TOs on hand are current and may be used until a superseding/replacing update is received. This may be six to twelve weeks after the new increment's Estimated Delivery Date (EDD) listed in the TO catalog.

3-11.2   Supersedure Notices. Check the supersedure notice on the TO update's title page to ensure that only those supplements and pages being superseded are destroyed. If the supersedure notice states that only part of a TO is superseded, that part will be removed. If it cannot be removed, it will be marked out and a notation reflecting the update number that superseded the marked portion will be made on the title page.

3-11.3   Foldout Pages. Foldout pages collated at the back of a new basic, revision, or change will be posted in the sequence listed in the List of Effective Pages (LEP).

3-11.4   Interim TOs. Interim TOs (ITOs) will be posted in inverse numerical sequence (highest number on top) in front of the TO title page. When possible, digital ITO copies will be attached in the same order to digital TOs. When this is not possible, a note or comment will be added to the digital title page giving the location of the ITO file.

3-11.5   List of Effective Pages (LEP) Checks. LEP checks are a comparison of the page and change numbers on each page of a TO with the data on the LEP (or "A" page). LEP checks are **mandatory** when changes and revisions to paper TOs are posted. When changes are posted, only the changed pages are checked. When a revision is posted, all pages in the TO must be checked. If the LEP check is performed as part of an annual check all pages must be checked. If the TO is in Work Package format, then each Work Package must be checked against the "List of Effective Work Packages" page.

3-11.5.1   LEP checks on digital TO files are only required when the TODO/TODA electronically posts (merges) a digital TO change file into the baseline TO file, to verify that the two files were properly merged (no pages omitted, duplicated, inserted in the wrong place, or deleted pages left in the file). The LEP check must be performed using the TO's intended viewing software application (do not print a copy of the TO file to perform the LEP check).

3-11.5.2   The date of the LEP check and the reviewer's initials, as well as any discrepancies (missing pages, improper printing, etc.), will be annotated on the title page or LEP. For digital TO files, enter this data in the Remarks window of the corresponding ATOMS record for the TO. LEP discrepancies will be reported to the TO Manager shown in the TO catalog by any means, including "correction-type" AFTO Forms 22. Discrepancies on PTOs will be reported to the TO Manager's office indicated on the title page of the PTO.

NOTE

Blank pages might have been omitted from digital TO files. This could create an apparent discrepancy between the LEP total number of pages and the electronic file page count. This is **NOT** a reportable discrepancy.

3-11.6   Posting Time Limits. All TOs will be posted within five work days from date received by the library custodian except for the following:

3-11.6.1   Interim supplements will be posted in the affected TO prior to use.

3-11.6.2   TOs issued to individuals will be posted prior to operating or maintaining equipment.

3-11.6.3   TOs assigned to the library on a short-term (10 days or less) TDY/deployed aircraft will be posted within five days of its return to home station. When the TDY/deployment is expected to exceed this time, the TOs can be forwarded to the duty location for posting by aircrew personnel within five days of receipt.

3-11.6.4   Computer program operator's manuals received prior to receipt of related computer programs will be held for filing until receipt of applicable media. Superseded manuals and related programs will be used until both the new programs and companion manuals are received and verified.

3-11.6.5   Air Force Reserve Command (AFRC) units, which are fully staffed only two days a month, will post routine TOs, changes and revisions during those two days. Routine and annual checks may also be performed during these two days. Interim TO safety and operational supplements and immediate and urgent action TCTOs will be posted by permanent party personnel within two work days after receipt.

3-11.6.6   Routine updates to TOs maintained at unattended Communication-Electronic (C-E) sites will be posted prior to use of the affected TOs.

3-11.6.7   Updates to TOs used in training classes do not need to be posted to student copies between classes, but applicable TOs will be updated before the start of each new class and will be maintained current during the class.

3-11.6.8   When the length of a TDY/deployment permits, updates to TO dispatch kits can be forwarded to the TDY/deployment area. TDY/Deployed personnel will post the updates within five work days after receipt. Updates not mailed to the deployment area will be posted within five work days after kits are returned to home station.

3-11.6.9   When time permits, home stations will forward TO updates to TD instructor personnel on extended TDY, who will post TOs within five work days of receipt. Otherwise, the instructors will post TOs within five work days after return to their home station.

3-11.6.10   TODOs will distribute TOs and updates with effective dates upon receipt like any other TOs; however, existing TOs in the active library will not be updated or replaced until the effective date.

3-11.6.11   The time limit for posting newly-received TO increments will not start until all earlier increments have been received (see paragraphs 3-11.8.2 and 3-11.8.3).

3-11.7   Revisions.

3-11.7.1   The title page, including the "supersedure notice" will be checked against the title page of the superseded TO.

3-11.7.2   If no discrepancy exists, the old TO will be removed and the revision posted. When checked data are not in agreement, the discrepancy must be resolved; contact the appropriate TO Manager if necessary. Posting will be completed if possible, and discrepancies will be annotated on the LEP.

3-11.8   Changes.

3-11.8.1   The basic date on the title page of the change will be checked against the basic date of the title page to be replaced. Annotations will be transferred from the old to the new TO title page, as required. The changed and added pages will be inserted into the TO. The replaced and deleted pages will be removed and destroyed according to the Handling and Destruction Notice, when applicable.

3-11.8.2   Changes received for missing basic TOs will be held (not posted) until receipt of the basic. Records will be checked to ensure that initial distribution requirements for missing TOs have been established and that missing TOs have been requisitioned.

3-11.8.3   If an earlier change is missing, the later change on hand will be held for receipt of the missing change. The TO title page will be annotated to reflect the missing change. The missing change or complete basic TO, as appropriate, will be requisitioned and records checked to ensure that ID requirements have been established. When the missing change is received, all changes will be posted.

3-11.8.4   When a page is listed on the LEP as a changed page, but the change number has been omitted from the supposedly changed page, request clarification from the TO Manager.

3-11.8.5   When a changed page is received that is not listed as such on the LEP, the correct page listing will be written in the proper place on the LEP.

3-11.8.6   When the LEP reflects a changed page which is not included in the change, the LEP will be marked "page not received with change." The page which was supposed to be replaced will also be marked, and the TO Manager will be notified.

3-11.8.7   When a change is received with a publication date later than the date reflected on the LEP, the LEP will be corrected.

3-11.8.8   If the basic date on a changed title page does not agree with the basic date in the library, the TO catalog will be checked to determine the correct basic date and appropriate action will be taken to obtain the correct TO or correct the discrepancy.

3-11.8.9   Changes to some new TOs may contain a "Change Record" page to provide a permanent change record. The change record page will be posted as the first right-hand page following the LEP.

3-11.8.10   When a change to the TO supersedes TO Page Supplement (TOPS) pages that are part of a cumulative TOPS, line out the superseded TOPS and its data pages and indicate supersedure by the TO change on the TOPS LEP. Remove superseded data pages.

3-11.8.11   TODO Processing and Incorporation (posting) of RACs.

3-11.8.11.1   RACs will normally be merged with digital TO files by the TCM or TO Manager, and the merged file (along with a copy of the RAC itself) will be uploaded on an Internet FTP site for distribution. TODOs will be notified by DMS ML/PDL message of the FTP site, and will download the appropriate files for redistribution to their TODAs. For users of paper TOs, the RAC file will be printed and/or copied double-sided for posting like any other TO change. For digital TO users, the merged digital file will be used in place of the previous digital version. LEP checks are not required for the merged digital file.

3-11.8.11.2   If the RAC was not merged with the baseline TO file before distribution, the TODO must use the Digital TO (DiTO) Change Management Software (available on the web at URL *http:// www.pdsm.wpafb.af.mil/field/ToolsMenu. htm)* and Adobe® *Acrobat Exchange*™ *3.x* or lower to merge the RAC with the affected TO file using procedures provided in the Quick Start Instructions that are included with the DiTO software. (A new version of DiTO, compatible with *Acrobat 4.0,* is currently being developed.) The merged TO then replaces the original file. Two situations could exist with TOs used digitally:

- TOs accessed directly from a distribution CD-ROM (from a CD tower on a LAN or CD-capable desk-top computer):
    - The TO file with the RAC merged must be downloaded or copied to the appropriate server or PC hard drive.
    - The CD-ROM directory/index must be edited to change the path for that TO from the CD-ROM itself to the server/hard drive where the new file is located.
    - The CD itself must be marked to indicate that the affected TO on the CD is no longer current.
- TOs accessed directly from the WWW or copied to a LAN server, floppy disk or PC hard drive prior to use:
    - TOs accessed from the WWW will have been updated by the TCM/TO Manager.
    - Affected IPDF TO files on LAN servers, floppy disks or PC hard drives will be overwritten with the merged TO file.

3-11.8.11.3   TODO/TODA account records (ATOMS files) must be updated to indicate the new Change number for the affected TO, and that all affected TOs have been updated.

3-11.9   Supplements (Figure 3-2). Supplements (except Emergency IOS/ISS, and MAJCOM and Base supplements - see TO 00-5-1) are not authorized for use with digital TO files.

3-11.9.1   Supplements are integral parts of the basic publication and will be maintained in all libraries where the basic is required. EXCEPTION: When supplements are assigned a security classification higher than the classification assigned to the basic, each may be filed separately according to its classification.

3-11.9.2   Reference to supplements will be made on the title page of the basic manual. Reference to TCTO supplements will be made on the first page of the basic TCTO. Reference to a supplement affecting an individual maintenance work package will be made on the title page of the basic TO. When the work package is separated from the basic TO, reference will also be made on the title page of the work package.

3-11.9.2.1   If a supplement is missing, the latest title page will be annotated to reflect the missing supplement.

3-11.9.2.2   To indicate that a particular paragraph is supplemented, circle the paragraph number and write the supplement number next to the paragraph in pencil.

3-11.9.2.3   Do not obliterate or physically remove deleted or replaced paragraphs and pages from the TO unless specifically directed to do so by the supplement.

3-11.9.3   Supplements to aircraft flight manuals need not be referenced on the title page. Each flight manual and flight manual supplement contains a status page which lists all outstanding supplements as of the publication date. Annotating items in Flight Manual TOs is mandatory in accordance with AFI 11-215.

3-11.9.4   Safety and operational supplements will be posted in reverse numerical sequence in front of the title page of the basic manual (and any applicable TOPS title page) regardless of the type of manual. When a single block of sequential numbers has been used to number both types of supplements, they will not be separated by type; otherwise, the safety supplements will be posted in front of the operational supplements. The supplement status page will remain with the supplement.

3-11.9.5   If work packs are filed separately from the basic TOs, a copy of applicable safety and operational supplements must be posted with each work pack.

3-11.9.6   MAJCOM and base supplements will be posted in alphanumeric sequence following the basic publication with MAJCOM supplements first and base supplements next.

3-11.9.7   ANG units will file gaining MAJCOM supplements after any base supplements in the affected TO, marked for reference only.

3-11.9.8   Temporary pages to checklists and workcards received with a supplement to the TO or Flight Manual will be posted in accordance with the instructions provided in the supplement. Receipt of these temporary pages will not be recorded in ATOMS or JCALS.

3-11.9.9   If TO users determine that a TO has become a problem due to the number and character of supplements, they should notify the weapon system OPR at their parent MAJCOM of the problem. The parent MAJCOM, if not Lead Command for the Weapon System, will notify the Lead Command and request

them to notify the Single Manager (SM). The SM will direct a TO review to verify the problem and determine the most effective remedy (change or revision).

3-11.10   TO Page Supplements (TOPS).

NOTE

TOPS are not usable in digital TOs because they cannot be viewed as "facing pages." Therefore, TOPS will not be used to update TOs for any reason. Information formerly provided in TOPS will be included in regular TO changes. The following information is provided to allow posting of those TOPS still in existence.

3-11.10.1   TOPS may be an accumulation of data from several TOPS (cumulative), or be independent. A new cumulative TOPS will contain only new or changed TOPS data pages. Unchanged TOPS data pages previously issued will not be reissued. Users shall not remove the unchanged TOPS pages from TOs. Perform a LEP check prior to posting to ensure the TOPS is complete.

3-11.10.2   The TOPS title page will be filed in front of, and facing the same direction as, the existing TO title page. The title pages of active TOPS are posted in reverse numerical sequence in front of the basic title page (cumulative TOPS title pages supersede previously issued title pages).

3-11.10.3   The TOPS data pages will be posted facing the affected TO page.

3-11.10.3.1   When pages from more than one TOPS affect the same TO page, they will be posted with the most recent TOPS page directly facing the affected TO page (TP-3 on top of TP-2, etc.)

3-11.10.3.2   When the data supplementing an individual page cannot be accommodated on a single TOPS page, the TOPS continuation pages will be posted opposite the supplemented page in ascending sequence. For example, when supplementing page 3-10, TOPS page 3-10 will be posted facing page 3-10. TOPS continuation page 3-10.1 will be posted behind TOPS page 3-10, etc. When a TOPS continuation data page is superseded by another TOPS continuation data page with the same page number, the new page will be posted in page number sequence instead of TOPS number sequence.

3-11.10.4   Annotating the TO paragraphs or sentences affected by a TOPS is a MAJCOM option.

3-11.10.5   TOPS pages will not be removed from active TOs unless the TOPS is listed in the supersedure notice on the title page of a standard change, TOPS, supplement, or revision; or the specific TOPS number appears as deleted or replaced in the TO catalog or latest TOPS title page.

3-11.11   Appendixes. Appendixes are continuations of basic TOs and are posted in alphanumeric sequence following the basic TO or the preceding appendix.

3-11.12   Identifying Technical Publications Sheets (ITPS). ITPS are issued to identify a change or supplement to a commercial or contractor manual, and are numbered as routine supplements. Upon receipt of an ITPS, annotate the TO number in the upper right corner of the basic manual's title page if it is not already shown. Reference the supplement on the title page. Post any insert pages within the manual. Post ITPS in alphanumeric (or date) order immediately following the basic publication.

3-11.13   Department of The Army (DA) Publication Changes. Changes to unbound (loose-leaf) DA publications are normally issued on a replacement page basis, and are handled like Air Force TOs. Changes to DA bound publications will be posted intact in numerical sequence following the basic publication.

3-12   AUTOMATED TECHNICAL ORDER MANAGEMENT SYSTEM (ATOMS).

NOTE

Sections 3-12 and 3-13 do not apply to on-line TODOs who manage their accounts using JCALS exclusively.

The Automated TO Management System (ATOMS - TO 00-5-2-102, Application Program and User Guide) will be used to establish and maintain records for all TOs required and distributed to organization shops and offices serviced by a TODO. Air Force TO Distribution activities (TODOs/TODAs) that provide TO distribution services to subordinate accounts will use the latest version of the ATOMS program. The ATOMS program incorporates the functionality of previous manual forms and processes: AFTO Forms 110, 110A and B, 131 and 187. See chapters 7 and 10 for options applicable to Nuclear Weapons and EOD TODO activities.

NOTE

A new version of the ATOMS program - ATOMS 2000 - has been released. A complete installation package (Introduction presentation, Program installation files and User's Guide) may be downloaded from URL *http://pdsm.wpafb.af.mil/toprac/tosyste.htm.* Click on the ATOMS 2000 button. ATOMS 2000 is a totally Windows compliant data base application. It has been significantly redesigned to eliminate the AFTO Form 110 Requirements and Distribution record keeping format. ATOMS 2000 design provides all the functionality of previous versions of the ATOMS while increasing capability to effectively track TO increments requisitioned, received and distributed to TODA. The ATOMS 2000 also includes a built-in FTP application to submit TO Request files. Existing files will be converted to the ATOMS 2000 format upon program installation. TODOs have the option to use the new ATOMS 2000 or the current version of the ATOMS. After a period of time, the ATOMS 2000 will become the only version of the ATOMS that AF TODOs may use.

3-12.1   Obtain TO 00-5-2-102, ATOMS Program Application and User Guide for program installation, set up and operating instructions. This TO (program installation and User Guide document files) is included in the set of digital TO files contained on TO 00-CD-1 or may be downloaded from URL *http://www.pdsm.wpafb.af.mil/toprac/atoms.htm.* Distribution of the ATOMS is unrestricted (Distribution Statement A).

3-12.2   The organization's TODO will create a separate ATOMS AFTO Form 110 record for every TO or TCTO Series Header required or on hand in the organization's TO libraries. The ATOMS may be used to establish records for NW TOs and Computer Program Identification Number (CPIN) software media provided G022 System/TO Request Format is selected (ATOMS Utilities Menu option 3). Refer to TO 00-5-17 for information about the CPIN system.

NOTE

As an option, separate AFTO Form 110 (Part 1) records may be added for each TCTO in addition to the TCTO Series Header record, and/or for safety or operational supplements released against f light manual publications.

3-12.3   The ATOMS program will be used by the TODO to prepare TO Publication Request (TOPR) data files for electronic submission to the Tinker Intersite Gateway. Transferred files are uploaded to the JCALS system for processing.

NOTE

Although the ATOMS can generate a CPIN or JNWPS request file (G022 TO Request Format), they may not be submitted using TOPR file submission practices described in this TO. Refer to chapter 7 for JNWPS and TO 00-5-17 for information about the CPIN system.

3-12.4   ATOMS records for TOs on order and on hand in organization TO libraries are routinely compared with information published in the AF TO Catalog Application to ensure up-to-date TOs are on hand or on order in organization TO libraries (see paragraph 3-14). ATOMS records will be used directly (AFTO Form 110, Part 3) or indirectly (ATOMS generated listings) by TO library custodians to inventory shop or office TO libraries. Documentation of these checks will be made according to paragraph 3-14.5.

3-12.5   All TODOs, both government and commercial, must use ATOMS to prepare TO Publication Requests (TOPRs) unless otherwise exempted by this TO. ATOMS must be set to JCALS System/TO Request Format (ATOMS Utilities Menu option 3) to generate a JCALS-format TOPR, unless otherwise specified.

3-13   USING ATOMS.

The ATOMS program has five functions; Account Files, AFTO Form 110, TO Request, TODO Listings and Utilities. The purpose and use of each of these functions is described below. Refer to the ATOMS User's Guide, part of TO 00-5-2-102, for detailed operation instructions.

3-13.1 Account Files - TO Distribution Account Custodian Records. This function provides a TODO or TODA capability to establish and maintain a current list of organization accounts/ subaccounts, locations, telephone numbers and custodian names.

NOTE

If the ATOMS Account Record is for a TODA that will maintain ATOMS records (redistributes TOs) only, enter the names of the primary and alternate TODA POC. If the Account record is for a TODA that does not redistribute TOs, the record will reflect names of the primary and alternate library custodian.

3-13.1.1 An ATOMS Account profile record must be created before ATOMS AFTO Form 110 Parts 1 and 2 records may be established for that Account's TO requirements.

3-13.1.2 Add Accounts. Enter office symbol, location and phone number of the organization office or shop and information about the primary and alternate TO Distribution Account/Sub-account custodian (contact point). Enter a date when annual inventory of the Account's TO library will be due.

3-13.2 ATOMS AFTO Form 110 - Account TO Requirements and Distribution Records. This function is an automated version of the paper AFTO Form 110 manual process. It contains detailed Account TO requirements and distribution records in four parts. The purpose and function of each of these parts is described below.

3-13.2.1 Part 1, ID Requirements and TO Sets/CPINs on Hand. A Part 1 record is created for every TO that is required or on hand within the organization serviced by the TODO. The Part 1 record shows which Accounts (shop/office library) have an ID requirement for the TO, the number required, and the number and status of TOs on hand.

3-13.2.1.1 If no record exists for a particular TO, a record for the TO is added. The Accounts that will have ID Requirements for the TO are then added. The record for the TO will include TO classification, distribution symbol, status and the month scheduled for annual review of the record.

NOTE

- The ATOMS program uses distribution symbol "E" for TOs indexed in JCALS as requiring Sponsor Approval, and marked "Y" in the "Sponsor" column of the TO catalog.

- When the TO status is "Rescinded," enter a date to reflect the documented or actual TO/TCTO rescission date.

3-13.2.1.2 The number of TOs on hand and status are automatically updated from the Part 3 record when receipt and distribution of a TO increment is documented. However, this information may be changed as required. The "Shortage" field indicates the status of TOs on Hand. A minus sign (-) is entered when a TO on hand has an increment missing. No entry is required when an entire TO is missing. No quantities are entered in this block.

3-13.2.1.3 A "Remarks" function is available from any Part of the AFTO Form 110 to record TO catalog Routine and Annual check documentation. The Remarks function is also used to record important information about the distribution of the TO.

3-13.2.2 Part 2, Initial Distribution (ID) Quantities Submitted. The Part 2 is a record of Account TO ID changes (increases and decreases). The quantity of ID increase or decrease is entered for each Account. The Total ID quantity for the TO is automatically adjusted and a corresponding TO Request database transaction record created when the Part 2 record is completed. The ATOMS user is then given the option to update the Part 4 to create a onetime requisition record and corresponding TOPR database transaction.

3-13.2.2.1 G022 Format (only applicable to NW TODOs). When new Part 2 records are added, the TO Request Number and Date fields will contain the number and date established for the G022 format TO Request "Setup G022 TO Request" screen. After the corresponding TOPR file is prepared and submitted, the next TO Request Number and Date should be entered before creating new Part 2 ID records.

3-13.2.2.2   JCALS Format. When new Part 2 records are added, the Requisition (Rqn) serial number (S/N) and Rqn Julian Date are automatically computed and entered. The Rqn S/N restarts with "0001" on each Julian date.

3-13.2.3   PART 3 - Initial Distribution Record. The Part 3 is a record for receipt (full or partial) and distribution to Accounts of TCTOs, TO revisions, changes, and supplements in response to established ID requirements and one-time requisitions as required to satisfy and document Account needs.

NOTE

Delete Part 4 one-time requisition records upon receipt and completion (update) of the corresponding Part 3 receipt and distribution record.

3-13.2.3.1   Part Three database records (lines) for each TO/TCTO Series Header record should be added or deleted as necessary to show only the most current active revision, change and supplements for the TO. This information is included in the TO Series Inventory by Accounts that sub-account custodians must have to maintain their TO libraries current. Enter the basic TO/TCTO Series Header number in the first database record (line). When changes are received, enter ("add") only the latest change in the next record for that TO. In subsequent records enter the suffixes of all current supplements received. Delete records for superseded changes or supplements and rescinded TCTOs. When interim supplements are received, enter an "I" in front of the number. When a revision is received, enter "REV." When TCTOs are received, either enter them under the TCTO Series record or establish a new ATOMS Part 1 record for the TCTO. If a TCTO is not required, enter "NR" in the TO Increment field of the TCTO Series record.

3-13.2.3.2   When the quantity received is less than indicated on the ID (shipping) label, follow procedures for handling ID shortages (paragraph 6-3.2).

3-13.2.3.3   Enter the date, classification, quantity, date received and Account distribution date for the TO increment received. The ATOMS automatically updates the appropriate Part 1 Account record TOs On Hand. If fewer TO Increments are received than required, enter the quantity distributed to each Account. The ATOMS will then compute the shortage and update the appropriate Part 1 Account record TOs On Hand and Shortage fields. A minus sign is placed in the Part 1 Shortage field for each Account not receiving the TO increment.

NOTE

When an error is made entering account distribution information into the Part 3 record, complete the record as it is; then change the record to fill the shortage. Then, delete the record and create a new Part 3 record after determining how the TO increment (less than required) will be distributed. This practice will ensure that the Part 1 record contains correct TO Status information.

3-13.2.3.4   When the shorted quantity is received, change the Part 3 record for the TO increment to fill the shortage. The ATOMS automatically updates the Part 3 to enter the date the missing copies are received and increases the appropriate Part 1 Account TOs On Hand quantity and removes the Shortage field minus sign.

3-13.2.4   Part 4, Requisition Distribution Record. The Part 4 is a record of individual Account one-time requisition actions and receipt of TOs. Enter the quantity required for each Account. The total number requisitioned is computed by ATOMS, and a corresponding TOPR database record created when the Part 4 record is completed. The Part 4 record must be changed when requisitioned TOs are received or when follow-up or cancellation of back-ordered requisitions is necessary.

NOTE

If ID for a TO is increased in Part 2 and the increase needs to be requisitioned, choose to Update Part 4 from the Part 2 record. This will automatically create a corresponding Part 4 and TO Request database transaction record. In the G022 format (NW and FMS TODOs only), if the ATOMS user chooses not to update the Part 4 from the Part 2, zeros will be entered in the G022 format TOPR one-time requisition quantity field.

3-13.2.4.1   When a complete TO is requisitioned (Basic and all active changes and supplements), enter the word BASIC. When a supplement is requisitioned, enter the supplement suffix (e.g., C, S-1, SS-2, TP-1 or -503 [TCTO number]). When a change is requisitioned enter "CHG" followed by the change number.

3-13.2.4.2   The Requisition Serial number and Julian Date are automatically entered. Edit the appropriate Part 4 record to enter the date and quantity of TOs/TO increments received.

NOTE

> All one-time requisition receipts required to satisfy Account needs should be documented in the Part 3 record only. Manually update corresponding Part 1 and Part 3 records and close out (delete) Part 4 record when one-time requisition is received.

3-13.2.4.3   A Part 4 Follow up or Backorder requisition record will be created when the original requisition record is changed to indicate follow up or cancel requisition. A separate follow up requisition will be created immediately following the original requisition record. If cancel requisition is selected, the original requisition record is changed to reflect cancellation of the backorder. Backorder status code must be entered before a cancellation record may be created. The Part 4 FU/Cancel field will be automatically updated (F or C) when the record is completed.

3-13.2.4.4   Delete Part 4 records when requisitions are received.

3-13.3   TO Request - Preparing TOPR File to be Submitted. This function provides capability to set up, review and generate TOPR files. Review TO Request database records for accuracy before generating a TOPR file. The TOPR file generated may be viewed on screen, saved to a file or printed. The TOPR generated must be saved to a file before it can be electronically submitted. TODOs must limit ID and requisition transactions to one each per TO per day. Review the TO Request database (ATOMS TO Request Browse screen) prior to generation of the TO Request file, and combine multiple requisitions for a TO into a single requisition transaction for the total quantity desired. Multiple ID transactions must be combined into a single transaction for the desired total ID quantity. Refer to paragraph 4-5 for information concerning submission of TOPR files.

3-13.3.1   Set Up TO Request Header. Information required to prepare TOPR file headers is entered. When G022 format is selected, the TO Request Number and Date for TOPR records is also entered.

3-13.3.2   Browse TO Request Database. Database records may be reviewed and/or manually created at the TO Request Browse screen before TOPR file is generated.

NOTE

> Refer to paragraph 3-13.6 and table 3-1 for detailed information to manually prepare JCALS format TOPR file.

3-13.3.3   Generate TO Request File. Two header records are generated containing information necessary for processing of the TOPR file by the Tinker Gateway when the TOPR file is submitted. The TOPR file may viewed on screen, saved to file or printed. The TOPR must be saved to a file before it may be electronically submitted for processing (paragraph 4-5).

3-13.3.4   G022 Format TO Request Files. NW TO TOPR files may be generated using the G022 format. These TOPRs must be printed and mailed to AAC/WNL according to chapter 7. TO Request database records for previously generated and submitted TOPR files may be retained in the G022 TO Request database until specific action is taken to delete them. Records for a G022 format TOPR files are selected from the G022 TO Request database based on TO Request number entered on G022 TO Request Setup screen.

3-13.3.5   JCALS TO Request Files. Unlike G022 format operation, there is no requirement to submit separate requests for E symbol ("Proponent Approval" in JCALS), CPIN or Preliminary TOs. Proponent Approval and Preliminary TO request transactions can be included with regular TOs in a single TOPR file. Proponent Approval TO requests (ID or requisition), are forwarded to the responsible TO Manager by the JCALS system in an electronic workfolder. The TO Manager will accept or reject the request when appropriate justification is received from the TODO (separately provided). CPIN Requests cannot be prepared when ATOMS is set for JCALS format operation. Finally, once a JCALS format TOPR is prepared (saved to file), corresponding TO Request database records are automatically deleted. However, ATOMS provides users the option to retrieve most recently generated JCALS Format TOPR file data.

3-13.3.6   <u>TOPR File Submission and Processing.</u> Do not change the TOPR filename extension.   The receiving communications system keys on filename extension *.tpr for correct processing. The TOPR file is then forwarded to the JCALS system depending upon information contained in the TOPR file header records.

3-13.4   <u>TODO Listings - Information for Record and Account Management.</u> Eleven different listings designed for ATOMS record or Account TO library management may be generated. All listings may be viewed, saved to a file or printed. Listings are generated as ASCII text files and may be modified to supplement information provided.

3-13.4.1   <u>TO Series Inventory Listing (TOs On Hand).</u> This listing provides AFTO Form 110 Part 1 quantity (ID Req. and TOs on Hand) and all Part 3 information for a single TO, a series of TOs or for all TO records.

3-13.4.2   <u>TO Series Inventory by Account.</u> This report contains similar information as the previous listing except that it can be generated for a specific account. This listing is generated and provided to Accounts serviced by the TODO periodically as a record of TOs in the Account's TO library. This listing is also used by Account TO library custodians to inventory their TO library.

3-13.4.3   <u>Distribution/Receipt.</u> The Receipt listing is generated to show information about TOs that were received (Part 3) for a specified period of time. The Distribution listing is generated whenever TOs are redistributed to accounts. It is typically provided along with the TO/TO increment(s) distributed to the account

3-13.4.4   <u>Annual Review.</u> These listings provide information to schedule ATOMS record and TO library inventory checks. Annual Review by Index and by TO listings are used to schedule annual ATOMS record checks. Annual review by Index shows the month chosen (Part 1) for annual review of ATOMS Records for TOs in selected TO Categories. Annual review by TO is similar except it is limited to a specific TO. Annual Review by Account shows the month (Accounts Menu option) when an Account's TO library is due annual inventory check.

3-13.4.5   <u>Display Deletes and Rescinds.</u> This listing shows TO numbers for all TO records (Part 1) where the Status is Deleted or Rescinded. The listing may be generated to show TOs deleted or rescinded prior to a specified date or all TOs with deleted or rescinded status.

3-13.4.6   <u>Display TOs That Require Follow-up.</u> This listing shows all requisition records (Part 4) where requisition dates are older than 60 days and that do not contain backorder status or date received.

3-13.4.7   <u>AFTO Form 110.</u> This listing shows all AFTO Form 110 information for specified TO/TO Series or for all TOs.

3-13.4.8   <u>Code Selected Reconciliation List (CSRL).</u> This listing corresponds to the Account Reconciliation Report (ARR) produced by JCALS, and is used to aid TODOs with conducting annual or periodic reconciliation of their accounts with JCALS records.

3-13.4.9   <u>TO/Classification/Symbol.</u> Separate listings may be generated that show information about all TO in the ATOMS or all TOs with specified classification or distribution symbol.

3-13.4.10   <u>Part 4 TO Request Status.</u> This listing shows TO/TO increment requisitions (Part 4) that contain a backorder status code and that have not been received.

3-13.4.11   <u>Requisition Status by Account.</u> This listing provides requisition information for TO/TO increments on order for a specified Account.

3-13.5   <u>Utilities - Tools for System Function or Operation.</u> ATOMS Utilities provide capability to set up system operation, maintain ATOMS databases and modify system features.

3-13.5.1   <u>System Operation and Set-up.</u> Options for selecting System/TO Request format and for entering TODO (G022) and TM Account (JCALS) numbers are provided. An option is provided that enables the user to examine ATOMS master TO database for duplicate records (ID, distribution and requisition data may appear to be in error if duplicate TO records exist). The user also has the option to view and modify TO classification and TO distribution symbols.

3-13.5.2   <u>Database Maintenance.</u> Two utility options are provided to Pack and Re-index ATOMS databases. ATOMS databases must be periodically re-indexed and packed (at least annually) to ensure error free operation of the ATOMS.

3-13.5.3 System Features. Utility options are available to change the current date used by the ATOMS, change system color scheme and to select dot matrix or laser default print driver.

3-13.6 JCALS Format TO Request Description. A JCALS TO Request generally conforms to MILSTRIP format and practice with one very significant difference: the TO number may be appended to the end of an 80 position MILSTRIP request. This design enables AF TODOs to establish ID or one-time Requisitions for TOs, TCTO Series, TCTOs or TO Supplements without having to know (look up) the corresponding JCALS Publication Stock Number (PSN) assigned to it. See table 3-1, JCALS Format TO Request Record Layout, for a description of each data element of the JCALS format TO request.

3-13.6.1 The JCALS System does not support dual actions, ID and Requisition, on a single transaction (Rqn S/N). Therefore, separate ATOMS transactions are required to establish or change ID and to requisition corresponding quantities of the TO. The ATOMS Document Identifier field for all initial transactions for both ID and one-time Requisition is A0D. The transactions are differentiated in ATOMS by using an asterisk (*) to identify ID transactions or an "N" to identify one-time requisition transactions (see table 3-1 and figure 4-2). Back-order cancellation and follow-up requisition transactions, whether automatically generated by the ATOMS program (from AFTO Form 110 Part 4 entry), or manually created, utilize the same document number (TM Account, Julian Date and Serial Number of Request) as the original (A0D) transaction, However, the Document Identifier used for these transactions will be AC1 (cancellation) and ATD (follow-up).

3-13.6.2 A TO may be requested (using either ATOMS or JCALS) by TO Number only, or by the JCALS Publication Stock Number (PSN) along with the Routing Identifier Code (RIC). The PSN is the stock number assigned to a TO and the RIC code identifies where the TO is stocked (managing ALC).

3-13.6.2.1 When using ATOMS to order (requisition) by TO number, the ATOMS/JCALS interface "explodes" the transaction into separate JCALS transactions for each active increment of the TO. When ordering TOs on-line through JCALS, separate transactions must be generated for each active increment. Individual TCTOs and TO Supplements may be ordered (in ATOMS or JCALS) using the TO number only.

3-13.6.2.2 The most recent TO Change increment may be ordered for 180 days after initial distribution. In ATOMS, manually enter the requisition transaction for the TO Change into the TO Request Browse Screen, using the PSN and RIC only (do not enter the TO number). In JCALS, choose the most recent increment from the list of TO increments presented for the TO (see the DI for "One Time Requisitions" procedures).

3-13.7 Status of TOs. Rescinded, canceled, or deleted status will be made in the Part 1 record for the TO. Enter information indicating that the TO was renumbered or replaced in the Remarks function for the affected TO. These records should be checked against the next revision of the TO catalog in case the TO is reinstated. If TOs are not listed or 18 months after their inactive status was listed, the AFTO Form 110 record may be deleted.

3-13.8 When transfer of TOs between accounts causes individual account ID requirements to change but total ID requirements remain the same the transfer will be recorded in the ATOMS records of the TODO or TODA servicing the account. Check and update Part 1 to verify Account data was properly changed. Transfer of TOs between accounts may also affect transaction such as ID shortages and requisitioned TOs pending receipt recorded in Parts 3 and 4. Account numbers affected will be changed accordingly.

3-13.9 Optional Entries. Entries such as the TO Manager, Central TO Control Unit, etc. may be made in Remarks area of the affected TO record.

3-13.10 Preliminary TOs (PTOs). When an AFTO Form 110 record is for a PTO, the distribution symbol for PTO (P) will be entered in the Part 1.

3-13.11 Locally Prepared Workcards. ATOMS AFTO Form 110 created for locally prepared workcards and checklists (TO 00-5-1, chapter 3) may be part of the TODO/TODA primary ATOMS installation or may be maintained in a separate ATOMS installation. If desired, a distribution symbol for locally prepared technical data may be developed in ATOMS.

3-13.12 Work Packages. ATOMS AFTO Forms 110 will be used for records of individual maintenance work packages. Enter "WP" or "SWP" and the work package number or subordinate work package number in the Remarks area for the affected TO number. Account numbers already assigned may be used or they may be changed to identify the various work stations serviced by the TODO/TODA.

Table 3-1.   JCALS Format TO Request Record Layout

Record Position	Length	Format	Field name/Range of Data Value
1-3	3	AN	**Document Identifier:** Required field (automatic or manual entry). **AOD** - requisition for shipment (all) **AC1** - cancellation by requisitioner **ATD** - follow-up (process as requisition if original requisition not received)
4-6	3	A	**Routing Identifier Code (RIC):** Left blank if TO Request will contain TO Number. If used, Request must also include the PSN for the TO. **FH8** - OC - Tinker AFB, OK **FL7** - WR - Robins AFB, GA **FP7** - SA - Kelly AFB, TX **FF7** - SM - McClellan AFB, CA **FG7** - OO - Hill AFB, UT
7	1	AN	**Media and Status Code:** Will always default to "L." **L** - Exception supply/shipment status to requisitioner by readable document.
8-22	15	N	**Publication Stock Number (PSN):** Left blank if TO Request contains TO Number. If used, Request must also include the RIC.
23-24	2	A	**Unit Of Issue:** This will always be "EA"
25-29	5	N	**Quantity:** Required field (automatic or manual entry). Right justified and zero filled.
30-35	6	AN	**TM Account:** Required field (automatic or manual entry). Unique number assigned by JCALS. For AF organizations, this will be F* followed by a four digit alpha
36-39	4	AN	**Julian Request Date:** Required field (automatic or manual entry). Format: YJJJ **Y** - last digit of the year requested. **JJJ** - Julian day of year requested.
40-43	4	N	**Serial Number of Request:** Required field (auto or manual entry). Four digit sequence number. Each day starts with 0001
44	1	AN	**Demand Code:** Required field (automatic or manual entry). ∗ - Initial Distribution (ID) new, increase or decrease **N** - non-recurring demand (one-time requisition)
45-50	6	AN	**Supplementary Address:** Optional field. automatically entered) **Y_TTTT** - where TTTT = TODO number

Table 3-1. JCALS Format TO Request Record Layout - Continued

Record Position	Length	Format	Field name/Range of Data Value
51	1	AN	**Signal Code:** **D** - No billing required (Free issue). This will always be set to "D"
52-53	2	AN	**Fund Code:** Not used. Filled with spaces.
54-56	3	AN	**Distribution Code:** Not used. Filled with spaces.
57-59	3	AN	**Project Code:** Not used. Filled with spaces.
60-61	2	N	**Priority Code:** The default value will be 15 (routine urgency). May contain additional values pending processing impacts but for now, always process as 15.
62-64	3	AN	**Required Delivery Date:** Not used. Filled with spaces.
65-66	2	AN	**Advice Code:** Normally blank. If used, Codes must be manually entered. **Possible values:** 2L, 22, 2C, 2G, 2T, 2J, 2W, 31, 32, 33.
67-80	14	AN	**Filler:** Not used. Filled with spaces.
81-120	40	AN	**TO Number:** Requests must always include a TO Number unless a PSN and RIC is provided instead.

Format Legend: A = alpha character; AN = alpha-numeric character; N = numeric character.

3-14   CHECKING TO ACCOUNT DISTRIBUTION RECORDS AND LIBRARIES.

3-14.1   General. After TO libraries and corresponding ATOMS account Distribution Records (AFTO Forms 110) are established, these records must be periodically checked to ensure that they are accurate and that libraries contain the most current TO distributed.

3-14.1.1   Every Account POC and/or library custodian must review the Internet "TO Catalog Updates" monthly, for distribution of new and updated TO publications needed to accomplish assigned activities, and for newly rescinded, superseded or renumbered TOs.

3-14.1.2   TODO Account records are checked against the TO Catalog Application (Internet or CD version) at least annually to verify account accuracy.

3-14.1.3   The contents of TO libraries must be checked for completeness and currency at least annually, against either a current ATOMS TO Series Inventory by Account listings or the TO catalog (Internet or CD version).

3-14.1.4   Rescinded and reference TO libraries are exempt from currency checks. The currency of TOs in training libraries is based on the criteria set forth in paragraph 3-7.6.

3-14.2   Routine Checks.

3-14.2.1   Routine checks are performed by all TODOs and by all TODAs that maintain ATOMS records, within one month of a catalog revision. (If the routine check is performed using the Internet catalog update, there is no need to repeat the check using the CD-ROM version.) Check the TO Catalog "New, Rescinded and Updated TOs" function to ensure that ATOMS records show that all newly-updated TO increments have been received (AFTO Form 110 Part 3) or are on requisition (AFTO Form 110 Part 4) (see Note below). Update the ATOMS records to reflect changes to the status of TOs (rescinded, renumbered, replaced or superseded); and requisition missing TOs/TO increments as required (see notes below). Prepare an updated ATOMS TO Series Inventory listing and provide it to affected sub-account custodians. Circulate a copy of the catalog CD-ROM to custodians who cannot access the Internet and are not on ID for the CD so they may perform their portion of the routine check.

NOTE

- JCALS implementation has significantly changed TO indexing practices. TO Managers enter information about new TOs/TO updates into the JCALS TM index record before they are distributed. An Estimated Distribution Date (EDD) data element has been added to the TO Catalog to enable TO users to determine whether or not a particular TO/TCTO or TO update has been distributed. TODO/TM Account POCs MUST NOT order "missing" TO/TCTOs or TO updates for at least 60 days (90 days for overseas TODOs) after the EDD shown in the TO catalog (or determined from the TO Manager) to allow sufficient time for distribution.

- TO and change dates shown on title pages indicate when the TO/update data was "frozen" for publication. These dates do not reflect when the TO/update is distributed. Delays encountered in publication sometimes make the initial distribution appear to be weeks or even months late.

3-14.2.2   TO library custodians (not required to maintain ATOMS records) must review the TO Catalog "New, Updated and Rescinded TOs" function monthly, and notify the servicing TODO or TODA of any newly published, deleted or reduced TO requirements.

NOTE

The TODO or TODA may save TO Catalog New, Updated and Rescinded TOs information to a file and circulate the file for TO library custodian review within the month.

3-14.3   Annual Checks.

3-14.3.1   Annual TO account records checks are performed once during the year by all TODOs and TODAs that maintain ATOMS records. The TODO/TODA may stagger the check schedule throughout the year by TO Category or by another locally-devised grouping. AFTO Form 110 Part 3 records are checked against the TO Catalog. ATOMS records are updated, and missing TOs and TO Increments are requisitioned as required.

3-14.3.2   TO library custodians perform annual library inventories once during the year. The contents of TO libraries are checked against ATOMS TO Series Inventory by Account listings provided by the servicing TODO or TODA, or against the TO Catalog, to ensure TOs contained in shop/office TO libraries are current and complete (current basic and all increments posted). When there are too many TOs in a library to permit inventory during a single month, the library custodian may establish an incremental schedule to ensure a complete inventory of all TOs within the year. See notes following paragraph 3-14.2.1. Procedures specified elsewhere in this chapter will be used as required to correct deficiencies. LEP checks **may** also be required (see below).

3-14.4   Annual LEP Checks. LEP checks (see paragraph 3-11.5) are **optional** during annual TO library inventory checks (MAJCOM or Base option), but are recommended for high-use paper-copy TOs (due to increased chance for lost or damaged pages). LEP checks performed during posting of a TO update may satisfy the requirement for an annual LEP check.

3-14.5   Documentation of Required Checks. Records checks (Routine and Annual) as well as annual TO Library Inventories must be documented. Library custodians may document annual TO library inventory checks on the ATOMS TO Series Inventory by Account listings. Documentation shall include the range of TO

records checked or inventoried, type of check, date performed and the name of the responsible individual. The method of documentation (computerized or manual) may be determined locally. All documentation records must be retained for two years. LEP checks are documented according to paragraph 3-11.5.2.

3-15   DISPOSITION OF TOs AND FORMS.

A TO number may be omitted from the catalog in error; therefore, no TOs will be removed from TO libraries or destroyed unless they are first listed as rescinded or superseded in the TO Catalog New, Updated and Rescinded and Updated TOs section, or are declared excess to unit requirements. If a TO is listed as rescinded, but is still required to perform the unit's mission, the TODO will immediately notify the TO Manager. TOs, TCTOs, tapes, cards, checklists, workcards and file documentation removed from active libraries will be disposed of as follows:

3-15.1   TOs needed for special programs or projects may be kept in "Rescinded" or "Reference Only" libraries.

3-15.2   If the TO is "Unlimited Distribution," it may be placed in recycle or regular trash receptacles as a whole document. If it has a distribution limitation statement, it may be recycled by placing different parts of the manual in different recycling bins, or it may be torn into three or more pieces or shredded and placed in one bin, or it may be burned. Proprietary data should be shredded before recycling.

3-15.3   If the document is classified, destroy in accordance with DOD 5200.1-R and AFI 31- 401.

3-15.4   Destruction of Digital Media. Some TOs and data may be provided on digital media (floppy disks, CD-ROM, magnetic tape, etc.). Media containing unlimited distribution data may be recycled as is. Media containing restricted distribution data must be "cleared" before recycling: floppy disks and hard drives must be reformatted; magnetic tapes must be erased; and CD-ROMs will have both surfaces scratched before recycling (see MIL-HDBK-9660). Media containing classified data must be handled according to DOD 5200.1-R and AFI 31-401. Instructions for destruction of nonnuclear Category 60 EOD TOs, Automated Explosive Ordnance Disposal Publication System (AEODPS), are in chapter 10.

3-15.5   TOs no longer required because of changed missions will be reported as excess to the TODO. Such TOs may be retained to be reissued to other organizations, or disposed of in accordance with this section.

3-15.6   When a function transfers from one activity to another, transfer of TO libraries is subject to the approval of the gaining activity.

3-15.7   Library maintenance forms are disposed of according to AFMAN 37-139.

3-16   ACCOUNT RECONCILIATION REPORT (ARR) AND TODO INFORMATION VALIDATION.

The ARR for each TODO contains the account information recorded in JCALS as of the date of the report. OC-ALC/TILUB will validate TODO information in conjunction with the annual ARR review.

3-16.1   TILUB will automatically send one copy of the ARR, along with a copy of the account's AFTO Form 43, to each TODO as scheduled below. (In lieu of the AFTO Form 43, TILUB may provide a printout of the relevant information from the JCALS system.) TODOs may request out-of-cycle ARRs by mail from OC-ALC/ TILUB, 7851 Arnold St Ste 201, Tinker AFB OK 73145-9147, or by e-mail to *csrl@tinker.af.mil* (include the TODO code/TM account number), or directly through on-line access to JCALS.

3-16.2   A TILUB cover letter will direct TODOs to review and correct both the ARR and the AFTO Form 43 as necessary. TODOs must either return the AFTO Form 43 copy annotated "current" or submit an updated form within 30 days from receipt of the letter. Failure to meet this suspense could lead to cancellation of the TODO account.

3-16.3   After allowing a reasonable time for mailing delays, TILUB will notify the responsible MAJCOM CTOM representative (see the TO System Information page, paragraph 1-1.2) of the pending TODO cancellation. For contractors and other non-AF accounts, TILUB will notify MSG/MMF. The MAJCOM will then have a further 30 days to resolve the problem, before the cancellation takes effect.

3-16.4   The ARR is used to reconcile TODO account records with the records in JCALS. If the TODO's ATOMS records do not agree with the ARR, the TODO must either correct the ATOMS listing or submit an

ATOMS TOPR to correct JCALS according to this TO. (Submitting a corrected ARR will NOT change JCALS records.) Certify the reconciliation on the ARR and reproduce as required for sub-accounts' use.

3-16.5   Each certified ARR will be retained until receipt of the next one. The current ARR, plus any requirements submitted within plus or minus ten days of the ARR date, will be considered the TODO's complete, current requirements.

3-16.6   The approximate months that ARRs will be processed and sent to TODOs are listed below for TODO Codes.

TODO CODES	MONTH	TODO CODES	MONTH
00AA - 0286	JUN	3360 - 3629	DEC
0287 - 0634	JUL	3630 - 6095	JAN
0635 - 1078	AUG	6096 - 6481	FEB
1079 - 1438	SEP	6482 - 6866	MAR
1439 - 1799	OCT	6867 - 69TZ	APR
3000 - 3359	NOV	69UA - 999	MAY

Filed in reverse
numerical sequence.
(For example: SS-5,
S-4, S-3, SS-2, S-1)

| TOPS |

Filed in reverse
numerical sequence.

| BASIC TECHNICAL ORDER |

| ITPSs (COMMERCIAL MANUALS ONLY) |

Filed in alphanumeric
sequence.

* | ROUTINE SUPPLEMENTS |

Filed in alphanumeric
sequence. (For example:
C, D, E, F)

* | MAJCOM SUPPLEMENTS |

*   Indicates Annotations on Title Page and All Affected Pages.

**   Safety and Operational Supplements will not be separated by Type but will be Filed in Reverse Numerical Sequence as shown above. Older TOs may contain Safety and Operational Supplements bearing the same Numerical Supplement Number. (For Example: SS-2, SS-1, S-2, S-1.) In this case, the Safety Supplements will be Filed (in Reverse Numerical Sequence) in Front of the Operational Supplements (in reverse numerical sequence).

Interim Supplements will be Filed as if they were Formal Supplements and then removed when replaced.

Figure 3-3.   ATOMS AFTO Form 110 (3 of 4)

CHAPTER 4

INITIAL DISTRIBUTION REQUIREMENTS

4-1   DETERMINING TO LIBRARY REQUIREMENTS.

TO requirements are determined by library users reviewing the organization, mission, and equipment of the using activity. Pertinent source documents are Lists of Applicable Publications (LOAPs), the Air Force TO Catalog (index), and Time Compliance TOs (TCTOs). Known and anticipated programs, including training programs and transfer or receipt of aerospace systems or equipment, should also be reviewed.

4-2   ESTABLISHING REQUIREMENTS.

ID requirements must be established for each TO requiring automatic issue of future changes, revisions, and supplements to maintain TO currency. ID requirements do not cause shipment of the existing (current) TO and increments - a separate requisition (chapter 5) must be submitted. The ATOMS program consolidates TO ID requirements and requisition transactions into TO Publication Request (TOPR) files.

4-2.1   TODOs may submit ID requirements for new unpublished TOs as soon as they are listed in the TO Catalog. ID requirements are established by TO number or TCTO series header number. When more than one classification is reflected for a TCTO series header, a separate ID requirement must be established for each required classification of header. When a TO or TCTO must be distributed before ID requirements can be gathered, the TO Manager will use JCALS TM processes to develop a distribution list. TODOs receiving TOs so distributed will promptly adjust ATOMS account ID quantities, and requisition additional quantities if required.

4-2.2   All TODOs, not on-line with JCALS, will prepare and submit Technical Order Publication Request (TOPR) files using the ATOMS Application Program (TO 00-5-2-102) set to the JCALS format.

4-2.2.1   DoD and US Government TODOs must submit TOPR files to the Tinker Intersite Gateway using a File Transfer Protocol (FTP) application (PC program) (paragraph 4-6).

NOTE

> See paragraph 4-6.3.1 for procedures to obtain authorization (IP address, user name and password) for establishing an Internet connection to the Tinker Gateway.

4-2.2.2   Non-government organizations and contractors assigned a TODO code (chapter 9) will submit TOPR files via floppy disk according to paragraph 9-6.1.1.

NOTE

> The Government Approving Agency (see Glossary) may elect to FTP the contractor's TOPR for them.

4-2.3   Supplemental Manuals. These manuals, identified in the TO catalog by the note, "This manual is incomplete without TO XX-XXXXX-XX," are not stand-alone publications. Although they are ordered like any other TO, the basic TO must also be ordered to provide complete procedures/data.

4-2.4   Preliminary TOs (PTOs). PTOs are shown in the TO Catalog with no Pub Date and/or with a Preliminary code of "1" (for "Yes"). ID requirements for PTOs will be submitted as soon as they are listed in the "TO Catalog New, Updated and Rescinded TOs" Section of the catalog, to establish the JCALS distribution list for use when the TO is formalized.

4-2.5   Special Types of TOs. Requirements for "Sponsor (Proponent) Approval" TOs (formerly known as "E" symbol TOs) are submitted according to paragraph 4-7. Sponsor Approval TOs require justification and manager approval prior to distribution. Nuclear weapons TOs and nuclear Explosive Ordnance Disposal (EOD) manuals (Categories 11N and 60N) are ordered according to chapter 7. Non-nuclear EOD manuals are ordered according to chapter 10.

4-2.6   ID requirements cannot be submitted on an emergency basis. ID requirements cannot be established for individual TCTOs, TO or TCTO supplements, or TO changes. However, these increments can be requisitioned (chapter 5) separately.

4-3   CHANGING REQUIREMENTS.

When ID requirements are entered into the JCALS system, they are retained until the requirements are changed or canceled by someone authorized to do so (in JCALS, having the correct roles and privileges). This includes the TODO, the approving/validating agency, the TO Manager, and OC-ALC/TILUB.

4-3.1   To cancel a TODO/TM Account code in JCALS, the TODO must first submit an ATOMS TOPR canceling ID (AFTO Form 110 Part 1 Delete TO) for all TOs, prior to submitting an AFTO Form 43 according to paragraph 3-2. This is a temporary workaround due to JCALS system inability to delete accounts, which should be corrected in the next major upgrade.

4-3.2   ID requirements are automatically canceled when a TO or TCTO series is canceled, rescinded, or replaced.

NOTE

> TODO/TM Account POCs will receive CJ Reject Status (item obsolete or inactive) when trying to add or change an ID requirement for a TO that has been rescinded.

4-3.3   When a TO/TCTO series is rescinded or superseded, it will appear in the "New, Updated & Rescinded TOs" section of the TO Catalog. If it is later reinstated, it will reappear in New, Updated & Rescinded TOs section as a new TO/TCTO. A new ID requirement must be submitted.

4-3.4   When a TO is renumbered, existing ID requirements are transferred to the new TO number. For reclassified TOs, requirements for TODOs authorized to receive the new classification will be transferred. TODOs not authorized to receive the new classification will be notified of cancellation of requirements. ATOMS records will be adjusted as necessary.

4-4   TO PUBLICATION REQUESTS (TOPR).

TOPRs can be submitted using either ATOMS procedures (paragraph 4-4.1) or JCALS TM processes (paragraph 4-4.2).

4-4.1   ATOMS TOPRs. These files must be prepared using the latest version of ATOMS (TO 00-5-2-102) set to the JCALS option, and are submitted electronically using a File Transfer Protocol (FTP) application program. Contractor TODOs (except Systems Engineering and Technical Assistance [SETA] contracts and privatized government activities) must submit ATOMS TOPR files according to the procedure described in paragraph 9-6.

NOTE

> Notify the organization's LAN support personnel or Network Control Center that use of the FTP process is required. FTP application programs are provided with every personal computer (PC) that has a Windows 95/98/NT operating system, and may also be provided as part of the Internet browser package. Detailed instruction on FTP program use is available from the TO System Information web page (paragraph 1-1.2) under the link to "ATOMS Program Files."

4-4.1.1   ATOMS Document Numbers. A JCALS TOPR generated by the ATOMS contains separate transactions for ID requirements and requisitions. A unique ATOMS document number identifies each transaction. Document numbers are composed of the JCALS TM Account number, Julian date and a serial number (see table 3-1, record positions 30-43).

4-4.1.2   Approval. A printed copy of all TOPRs for classified nuclear weapons TOs or from contractor TODO codes must be signed by the Government Approving Agency (AFTO Form 43, block 7), and either submitted with the TOPR on floppy disk or retained by the agency for two years.

4-4.2   JCALS TOPRs. Two separate JCALS TM processes are used to establish ID requirements and to requisition TOs. Refer to the Desktop Instructions (DI), Section 14, for specific procedures. Each transaction is automatically assigned a unique number by the system.

4-5   COMPLETION OF ATOMS TOPR (FIGURE 4-1).

4-5.1   A digital TOPR file will automatically be generated by the ATOMS application based upon information entered in ATOMS automated AFTO Form 110 Parts 1, 2 and/or 4. A TOPR file may also be manually prepared by entering TO request transaction data at the ATOMS Browse JCALS TO Request database screen. See figure 4-1 for examples of typical JCALS format TO Request transactions, with explanations in table 4-2.

4-5.2   The ATOMS generated TOPR file includes two special file and segment header records. These header records are required by the remote system to validate TOPR file format when electronically transferred from a PC to the Tinker Intersite Gateway computer system.

4-5.3   TOPR Batch Confirm Transaction. The ATOMS application automatically appends a "Batch-Confirm" transaction to the end of all TOPR files. The JCALS System will generate a TO Request Status Notification (TORSN) document for the "Batch-Confirm" transaction with the "CG" transaction reject code. This is the TODO's confirmation that TO Request transactions were received and processed by the JCALS system. See paragraph 5-5 for more information on TORSN documents.

4-6   SUBMITTING ATOMS TOPR FILES.

4-6.1   Government TODOs will submit ATOMS TOPRs either from their computer or the base Network Control Center. Contractor TODOs must follow procedures in paragraph 9-6.

NOTE

> TOPR files may be submitted as required, but should be limited to once per day. ID and Requisition transactions must be limited to one per day per TO, due to the way that JCALS processes orders. Multiple orders can cause JCALS to reject the later ones as duplicates.

4-6.2   TOPR files are electronically transferred via the Internet using a File Transfer Protocol (FTP) application program to the Intersite Gateway (M024B) at Tinker AFB.

4-6.3   Submitting TOPRs from the TODO computer.

WARNING

> Three failed attempts to connect to the Intersite Gateway will lock the site for all users. **Stop** after the second failure, and verify that you are using the correct username and password.

4-6.3.1   The government TODO or other submitting official must obtain the IP address, user name and password required to access the Tinker AFB Intersite Gateway system and authorize transfer of TOPR files. If the data was not supplied by OC-ALC/TILUB with the approved AFTO Form 43 (paragraph 3-4), send a request to *recacct @tinker.af.mil* (e-mail) or via USPS to TILUB, 7851 Arnold St Ste 201, Tinker AFB OK 73145-9160. The subject must be "TOPR FTP." The body of the request must include the TODO mailing address, TODO and TM Account codes, POC name, and DSN phone number. Authorization information will be supplied by return post mail.

NOTE

> A Government Approving Agency may request authorization to electronically transfer TOPR files via Internet FTP for a contractor TODO. The authorization request must cite the contract number and end date, include a copy of the contractor's approved AFTO Form 43, and be submitted via post-mail. Authorization information will be returned to the agency.

4-6.3.2   Using a suitable FTP application program (see Glossary), connect to the Tinker Intersite Gateway using the IP address, user name and password provided. Transfer (copy) the TOPR file to the Gateway log-in directory (folder) and close the connection to the Gateway. The TO Request file transactions will be processed by JCALS within one day after the transfer.

4-6.4   Submitting TOPRs from the Base Network Control Center. When the TODO does not have direct access to Internet FTP services, TOPR file transfer support may be obtained from the base Network Control Center (NCC). Provide the NCC with the IP Address, user name and password to access and transfer TOPR files to the Tinker Intersite Gateway system. The NCC is a host base Communications Group organization.

4-7   SPONSOR APPROVAL TOs.

A "Y" appearing in the "Sponsor" column in the TO catalog identifies a TO with limited distribution controlled by the TO Manager (JCALS "Proponent"). Sponsor approval is required for TOs with limited reproduction rights (some commercial manuals), high-reproduction-cost/limited use TOs (some manuals for single/few-user equipment), and TOs with Special Access Required (SAR) (e.g., B-2 aircraft TOs). Sponsor approval "Y" is also used when other symbols, classification, or a DODD 5230.24 distribution statement impose controls. All unclassified 11N nuclear TOs will be "Y" coded.

4-7.1   Users may challenge the "Y" designation on specific TOs or TCTO-Series by letter to the responsible TO Manager. The letter must contain specific rationale for the challenge and be approved by the parent MAJCOM.

4-7.2   ATOMS/JCALS Interface. ATOMS-generated JCALS format TOPR files may contain both regular and sponsor approval "Y" TO ID and requisition transactions. When received by the JCALS system, the sponsor approval ID/requisition transaction will be electronically forwarded to the responsible TO manager for approval. The TODO (TM Account POC) will be notified via TORSN status code "1S" that the TO transaction was suspended for sponsor approval.

NOTE

> A letter of justification is not required when reducing or canceling ID requirements for TOs marked for Sponsor Approval. When submitting ID or requisitions for sponsor approval TOs on-line using JCALS, the justification is included in the request screen. No separate letter is required.

4-7.3   Send the responsible TO Manager a separate letter of justification (paragraph 4-7.4) for each ID requirement increase and/or one-time requisition transaction when the TOPR is submitted. The responsible manager for each TO is listed in the TO Catalog. Sponsor Approval TO Requests may be cancelled by the TO Manager in the event that justification is not received within 30 days.

4-7.4   Letters of Justification. Letters of justification must identify the TO Number, the Publication Stock Number (PSN) for the TO, TODO and TM Account numbers, and using organization address. They must indicate the quantity for ID or requisition (or both) and the reason for the request.

4-7.5   Once approved the ID or requisition transaction will be processed and/or shipped. If the ID or requisition transaction is disapproved or backordered, an updated TORSN will be sent to the TODO.

4-8   INTERIM TOs (ITOs) AND RAPID ACTION CHANGES (RACs).

ITOs and RACs (see TO 00-5-1) are developed by the TCM for the affected TO, and are distributed electronically by Defense Message System (DMS), WWW, e-mail or FAX, depending on circumstances. An appropriate DMS precedence will be assigned, based on the urgency of the update. Authorized types of ITOs are Interim Operational or Safety Supplements (IOS or ISS) and Interim TCTOs or TCTO Supplements (ITCTO or ITCTOS). Interim Changes (ICs, formerly "IMCs" - see AFI 33-360V1) are NOT authorized TO updates. If information in an interim operational supplement or interim TCTO/supplement must be changed, a replacement ITO is issued.

4-8.1   The responsible SM or other issuing agency, in conjunction with the Using MAJCOMs, will establish and maintain DMS Mail Lists (MLs) or Personal Distribution Lists (PDLs) for ITO and RAC notification message distribution in accordance with AFMAN 37-126, AFMC Sup 2, AFMCI 21-302 and applicable MAJCOM directives. Using Commands will assist the SM with identification of the appropriate addressees within their respective commands. MLs and PDLs established solely for distribution of ITOs shall be maintained by the TO Manager. OC-ALC/TILUB will be an addressee in each ML or PDL notification.

NOTE

Countries not supported through a publications case are entitled to receipt of ITOs provided disclosure is authorized. However, the country must request to be placed on distribution for these ITOs through an authorized USAF approving agency (TO 00-5-19). Upon receipt of such an approved request, the authorized issuing activity will include the organization in its ITO address list.

4-8.2   When a TO-related ML is established, the ML OPR will post the ML number, applicability (MDS, TMS, commodity area), OPR e-mail address, office address, and voice and fax Defense Switched Network (DSN)/commercial telephone numbers on the weapon system/commodity web page.

4-8.3   When an ITO is published, it will be reflected in the TO catalog with a "Y" in the INT IND (Interim Indicator) column. When field activities determine that they have not received a specific ITO, they shall request a copy from the TO Manager listed in the TO Catalog.

4-8.4   To ensure receipt of future ITOs, units will periodically review the lists of MLs on applicable SM web sites to verify they are included as appropriate. If not, refer to AFMAN 37-126 and perform the procedures below.

- Contact the ML OPR to ensure your organization is added to the ML.

NOTE

If you cannot determine the ML originating authority, contact the system or commodity TO Manager to determine the OPR's identity.

- If your organization was already on the ML, work with the base DMS center to correct local distribution problems.

- If any organization information changes (add, delete, address, etc.) contact the ML OPR with the information.

4-8.5   TODOs will reproduce/forward ITO messages to their TODAs. A complete copy of the message (with all forwarded addressees) will be maintained by the TODO.

4-8.6   The AFMETCAL Program, Det 1/ML, 813 Irving-Wick Dr West Ste 4M, Heath OH 43056-6116, DSN 366-5174 periodically issues routine Category 33K and 33L ITOs with distribution limited to USAF Precision Measuring Equipment Laboratories (PMELs) who require the changed calibration data.

Figure 4-1.   ATOMS G022-Format TO Publication Request
*(For JNWPS requests only - see chapter 7)*

H0100760

Figure 4-2. ATOMS JCALS-Format TO Publication Request

NOTE

G022 formats assigned the same document number to each transaction on an AFTO Form 187 or individual ATOMS TO Request submittal. JCALS processing standards require separate transaction numbers for each TODO transaction (ID requirement or one-time requisition). For JCALS, each line (transaction) is ended with a pound sign (#).

TO NUMBER	EXPLANATION
8A3-12-2-3	This entry reflects one of three types of transactions: a. An Initial Distribution (ID) requirement for a new (unpublished) TO. After processing, the system will establish an ID requirement for a quantity of eight for this TODO. The warehouse will immediately ship eight copies of the basic manual when it is published. The warehouse will continue to ship future revisions, changes, and supplements until the TODO cancels the requirement or the TO is rescinded. b. An increase in ID requirements. The absence of a quantity in positions 47 - 50 of the G022 format, and lack of a Demand Code "N" transaction in the JCALS format, indicates that the TODO does not need distribution of the difference in quantity between the existing and new ID requirement at this time. c. A decrease in an existing ID requirement. The computer's database, containing the TODO's requirement file, recognizes a decrease in ID based on previous transactions and processes it accordingly. After processing, the system will contain the new ID quantity of eight for the TODO.
2G-GTCP85-24	The entry reflects an increase in an existing ID requirement. After processing, the system will contain the new ID requirement for a quantity of seven. In the format, the entry of "0003" in positions 47 - 50, and in the JCALS format, a separate demand code "N" transaction for a quantity of three, will cause the warehouse to ship three copies of the TO and all active changes/supplements to the TODO. The system does not retain the TODO's previous ID requirement for four.
2J-J79-83-1TP-2	This is a requisition for a technical order page supplement. ID cannot be established for a TP or any other TO increment.
8D1-8-146-3	An Initial Distribution (ID) requirement is being established. After processing, the G022 or JCALS system will contain the ID requirement for a quantity of fiv The TODO does not require existing copies of the TOs and indicates this in the G022 format by placing 0000 in positions 47 - 50, and by lack of a Demand Code "N" transaction in the JCALS format. The warehouse will ship future revisions, changes and supplements when they are published, based upon the ID requirement.
33DA38-15-1	This entry will cancel the ID requirement for this particular TO. In the G022 format, enter "XXXX" in the ID Quantity (positions 43 - 46). In the JCALS format, quantity of "0000" (positions 25 - 29). **NOTE:** If there are any existing backorders, they must be separately cancelled in JCALS using an "AC1" document ID code (see entry for TO 33A1-10-38-1, below).

Figure 4-3. Explanation of Technical Order Publication Request (TOPR) Entries (Sheet 1 of 3)

TO NUMBER		EXPLANATION
9H2-2-64-3		An example of a requisition to fill a one-time need. The TODO is not establishing any ID requirements (G022 format, positions 43 - 46). The JCALS format one-t The warehouse will ship the TO with any active changes or supplements. This entry will not affect the TODO's previously established ID requirements (if any) for the TO.
2J-TF34-6		The first entry for the basic manual reflects an increase in ID requirements with a difference of four constituting the one-time requisition requirement.
2J-TF34-6S-11 2J-TF34-6S-12	(G022 only)	The TODO can indicate individual supplements not required by listing them separately and entering 0000 in positions 47 - 50. When ordering a TO by number using the JCALS format, the TODO must accept all supplements.
2J-TF41-3		This entry reflects an increase in ID requirements with a difference of five constituting the requisition requirement.
2J-TF41-3S-16		The TODO may requisition individual TO supplements for any TO.
2J-J57-16		This is a requisition for six copies of a TO and current changes, to fill a one-time need. In the G022 format, the "3" in position 79 prevents shipment of any must either accept all increments, or order the basic ands changes individually by publication stock number.
1E-3A		This entry establishes ID requirements for all TCTOs occurring in this TCTO Series.
	(G022)	The warehouse will ship all current, active TCTOs. If the entry in ship the increased amount without a quantity for the difference in positions 47 - 50.
	(JCALS)	A separate one-time requisition ("N" code) transaction must be submitted for each existing, active TCTO needed.
1F-102-1148		This is a requisition for an individual TCTO to fill a one-time need. The system does not establish an ID requirement from this entry, and the entry will not exists.
2J-J57-17C		This is requisition for a supplement to fill a one-time need.
33A1-10-38-1		A previous requisition action (transaction #8 on 98/04/15 [8105 day]) placed this TO on backorder. The TODO no longer has a requirement for the TO and request requisition number in positions 51 - 56 and 58 - 62, and use "C1Z" in positions 78 - 80 to cancel a backorder. In the JCALS format, use an AC1 Document Identifier Code with the original transaction document number in positions 36 - 43 to cancel a specific backorder.
1F-15A-2-33JG-50-1	(G022 only)	This is a follow-up transaction (indicated by the "2" in position 79), on the basic manual only (indicated by a "blank" in position 57), from requisition #8 previously submitted on the 98/04/15 day.
1F-15A-2-2-3		This G022 follow-up action is for the basic as well as its related supplements, indicated by the insertion of ''A'' in position 57.

Figure 4-3.   Explanation of Technical Order Publication Request (TOPR) Entries (Sheet 2 of 3)

TO NUMBER	EXPLANATION
	The JCALS follow-up on a previous requisition is an ATD document identifier code transaction against the original transaction document number (number 0003 on the 9246 day). If JCALS did not receive the original transaction, the system will process an "ATD" transaction as a req uisition. The Advice Code "2L" in positions 65 and 66 indicates that this is a request in excess of the Maximum Issue Quantity (MIQ).
01T009982001306 (PSN–JCALS only)	Requisition for Change 13 only of TO 1C-130H-2-00GE-00-1. The TO number is <u>NOT</u> used.
BATCH-CONFIRM	The ATOMS program automatically adds this transaction to both G022 and JCALS format TOPRs. The transaction will generate a JCALS TORSN (figure 5-3) with notic TO request was received and the date it processed.

Figure 4-3.   Explanation of Technical Order Publication Request (TOPR) Entries (Sheet 3 of 3)

CHAPTER 5

REQUISITIONING

5-1   GENERAL.

5-1.1   TO and TCTO requisitions are established to fill one-time needs or increases in ID requirements, and are submitted by TO or TCTO number. Requisition transactions (orders) are created using the ATOMS program and included in a JCALS-format TO Publication Request (TOPR) file. TOPR files are submitted via FTP to the JCALS system for processing (see paragraph 4-6.2).

5-1.2   ATOMS requisition transactions for a TO/TCTO number are "exploded" into JCALS transactions for distribution or backorder of a TO/TCTO basic, all current TO changes and all TO/TCTO supplements. The Batch Confirm transaction automatically added to every ATOMS TOPR will cause JCALS to generate a TO Request Status Notification (TORSN, paragraph 5-5) for mailing to the TODO. See paragraph 3-13 for information about using the ATOMS to prepare ID requirement and TO requisition transactions.

5-1.3   Personnel with on line access to the JCALS system (JCALS profile, username and password) may requisition TOs using the JCALS "Manage One Time Requisition; Order a Publication" TM process. However, the basic TO and each TO increment must be ordered individually, rather than merely using the basic TO number as with the ATOMS.

NOTE

> TODOs must allow sufficient production and delivery time prior to submitting requisitions for "missing" TOs (see Note, paragraph 3-14.2.1).

5-1.4   Requisitions cannot be submitted for a TCTO Series Headers, Preliminary TOs (PTOs) or Interim TOs (ITOs). Only individual formal TOs, TCTOs and TCTO supplements may be requisitioned. Contact the POC for the ITO shown in the TO Catalog to obtain copies of an ITO (see also paragraph 4-8). The TO Manager controls and distributes copies of PTOs (shown in the TO Catalog with no Pub Date and/or with a Preliminary code "1"). Activities participating in testing and verifying procedures in PTOs, AETC activities developing training programs, and other AF organizations with acceptable justification are authorized to request copies.

5-1.5   Requisition actions are not retained in JCALS records except for backorders. If TODOs are required to keep a record of the transaction, they may either print the ATOMS TOPR file or do a "screen print" of the JCALS "Order a Publication" screen.

5-2   REQUISITIONING TOs.

5-2.1   New TOs may be requisitioned only after appearing in the TO Catalog "New, Updated and Rescinded TOs" section, or when listed in the "Search TO Catalog" section or JCALS TM Index with a distribution date (currently shown in the TO Catalog as EDD - Estimated Distribution Date). Previously distributed TOs may be requisitioned unless rescinded. One-time requisition transactions for TOs/TCTOs must be prepared and submitted when establishing new or increased ID requirements for TOs/TCTO Series, to replace damaged/ missing TO/TCTOs, or to obtain additional books for one-time need. See paragraph 3-13.3 for information on preparing an ATOMS TOPR file. See Desktop Instructions (DI) "One Time Requisitions" for JCALS procedures.

5-2.2   Under normal circumstances, TODO/TM Account POCs should submit only one ATOMS TO Request file per day. In any case, ID and Requisition transactions must be limited to one per day per TO.

5-2.3   Requisitions for Classified TOs. One-time requisitions for classified TOs may be included in any JCALS format ATOMS TO Request file. However, the JCALS record for the TODO/TM Account must show authorization to receive and safeguard classified TOs (see paragraph 3-2). Requisitions for classified TOs will be suspended for Sponsor Approval. The TODO/TM Account POC must provide need-to-know justification to the TO Manager before the requisition will be released. Requisitions for classified TOs when the TODO/TM Account POC does not have authorization will be rejected with NC status (Account not allowed to receive classified item).

5-2.4   Requisitions Exceeding TO Maximum Issue Quantity (MIQ). ATOMS requisitions for quantities exceeding MIQ for a TO publication will be rejected (status code "DQ") unless the one-time requisition transaction contains Advice Code 2L.

NOTE

> The MIQ for any TO is in the TO Catalog Application (Internet or TO 0-1-CD-1).

5-2.4.1   ATOMS users must resubmit requisitions if TORSN status code DQ Reject (Requested Quantity Exceeds MIQ) was received for any requisition transaction. Replace (delete and re-create) the Part 4 one-time requisition record to generate a new TO Request database transaction record. Manually edit the TO Request transaction (ATOMS TO Request Browse screen) to include Advice Code 2L in record positions 65 - 66 (figure 4-2).

5-2.4.2   Requisitions containing Advice Code 2L will be treated as Sponsor Approval requisitions. The TODO POC must provide justification to the TO Manager for the excess quantity (see paragraph 4-7.3).

5-2.5   Requisitioning TO Changes. While the TO warehouse continues to "bundle" TOs (shrink-wrapping the basic and all changes to save space and man-hours), the latest TO change may only be separately requisitioned for up to 180 days after the distribution date (TO Catalog EDD) shown in the TO catalog. Use the ATOMS program (see below) or the AFTO Form 276 (figure 5-2) to order changes.

5-2.5.1   Using ATOMS. The latest TO Change may be ordered using the ATOMS program by entering the Publication Stock Number (PSN) and Routing Identifier Code (RIC) only (no TO Number) for the change in the ATOMS TO Request Browse screen (see figure 4-2). The TO Change requisition will be included in the next ATOMS TO Request file generated. On-line JCALS users will order the changes using the procedure for requisitioning TOs or TCTOs.

5-2.5.2   Using the AFTO Form 276. DoD and other government activities will mail or e-mail the form to the applicable TO Manager. Nuclear weapon and EOD TODOs will submit the form according to chapters 7 and 10. Contractor activities will submit the form through the Government Approving Agency (AFTO Form 43, block 7) to OC-ALC/TILUB according to chapter 9. The AFTO Form 276 will be completed as follows:

NOTE

> - The AFTO Form 276 may be used for "walk-through" requisitions in the TO warehouse.
> - The AFTO Form 276 electronic file (EF) has two copies of the form - the second copy is auto-filled from the first copy. When printed for walk-through, required signatures or mailing, this becomes the file copy.

- Enter the mailing address of the responsible TO Manager in the "TO" block of the form.
- Enter the requesting TODO/TM Account numbers and complete mailing address in the "FROM" block of the form.
- Block 1. Enter the complete TO number. When applicable, enter "CHG," the change number, and its date beneath the TO number (example: CHG 1, 18 April 86).
- Block 2. Enter the security classification of the TO/change.
- Block 3 (manifold set) or 4 (EF version). Enter quantity desired.
- Block 4 (manifold set) or 3 (EF version). Enter an eleven-position requisition number constructed as follows:
  - ◊ Positions 1 and 2: Two-letter ALC symbol for the TO Manager having prime responsibility for the TO (AG=AFMETCAL, OC=OC-ALC/TILDT, NU= OC-ALC/TILUB, OO=OO-ALC/TIEDT, NW=AAC/ WNL, SA=SA-ALC/TILD, SM=SM-ALC/TICDA and WR=WR-ALC/TILT).
  - ◊ Positions 3 and 4: Enter the last two digits of the current year.
  - ◊ Positions 5 thru 8: Enter the requesting TODO code.

◊ Positions 9 thru 11: Enter a three digit control number, assigned consecutively by the TODO, beginning with 001 each calendar year (example: WR990444001).

- Block 5. When the requested item is classified, enter "**SHIP IAW DOD 5200.1-R AND AFI 31-401**;" otherwise leave blank.

- Block 6. Enter JCALS TM Account number.

- Block 7. US TODOs leave blank (see TO 00-5-19 for FMS entries).

- Block 8. Enter type of requisition: "R" for routine; "P" for priority.

- Block 9. Enter year, month, and day the AFTO Form 276 is prepared (example: 20000909).

- Block 10. Enter the initiator's initials in this block.

- Block 11. Enter the TODO's signature (on paper forms), name, grade, and DSN/Commercial phone number OR e-mail address.

- Block 12. When applicable for EOD, NW or contractor orders, the Government Approving Agency (AFTO Form 43, block 7) signs in this block.

- Blocks 13 thru 23. Reserved for TO Manager and TO warehouse use only.

- Block 24. When the request is for an unclassified change and the basic TO is classified, enter: "**THIS IS AN UNCLASSIFIED CHANGE TO A CLASSIFIED BASIC.**"

5-3   EMERGENCY REQUISITIONS.

NOTE

Use local reproduction (paragraph 1-1.4.2) to the maximum extent possible prior to resorting to submission of Emergency requisitions. Establish ID if required.

5-3.1   Emergency requisitions are used when an account requires published, current TOs immediately because of a critical safety hazard or work stoppage condition. Requisition messages (figure 5-1) must include the TM Account code, Requisition Serial Number and Julian Date, the TO number and security classification, the one-time requisition quantity required and whether supplements are also required. The requisition must also list the name, title and DSN number of the TODO and (if required) the Government Approving Agent. Emergency requisitions may NOT be used to establish ID requirements. A separate ATOMS TOPR or JCALS One Time Requisition must be submitted if ID of the TO is also required.

5-3.2   Emergency requisitions will be submitted by DMS message, fax or e-mail directly to the TO Manager listed in the TO catalog, **not** FTP'd to the Tinker Gateway. A telephone call may be made to alert the TO Manager of an emergency need, but the written requisition must be received prior to shipment of requested TOs.

5-3.3   Emergency requisitions will be sent using "Normal" DMS precedence (equal to AUTODIN "Immediate" priority), and will be processed immediately during ALC duty hours. For processing DMS messages after normal duty hours, addressees must forward incoming messages to the base 24-hour DMS delivery account by establishing an "Out of Office Assistant" rule (unless DMS has established an automated forwarding rule based on normal duty hours). The DMS delivery account monitor will review incoming messages' address and subject lines and notify the after-hours POC for the addressees duty location. TOs will be shipped using priority mail or express routing.

5-4   REQUISITION PROCESSING.

5-4.1   The JCALS system processes ATOMS TO requisition transactions to ship the current TO basic or revision and all active changes and supplements. JCALS processes ATOMS requisitions for a TCTO to ship the active TCTO and supplements. Requisitions for a TCTO Series will be rejected. JCALS processes on-line requisitions ("Manage One-Time Requisition; Order a Publication") by individual TO increment (TO basic or revision, change or supplement).

5-4.2   When a change or revision is in printing or is temporarily out of stock, an automatic backorder is made for the TODO and a TORSN document is printed and mailed to the TODO. No action is required by the

TODO. When stock is received by the prime ALC, the backorder is released for shipment on a DD Form 1348-2.

5-5 TO REQUEST STATUS NOTIFICATION (TORSN).

5-5.1   The JCALS system generates a TORSN document that is mailed to the TODO for all TO ID or requisition transactions that are suspended, backordered, rejected, or otherwise not successfully processed. No status is generated for a TO requisition transaction when the TO is in stock and will be shipped.

5-5.1.1   The TO System Information Page on the Internet [URL *http://www.pdsm.wpafb.af.mil/ toprac/ status.htm* at the link to "ATOMS (off-line Users)] provides a listing of JCALS Notification Status Codes, status description, cause, corrective action and whether to resubmit or not.

5-5.1.2   A TORSN document (figure 5-3) will provide three lines of information for each TO requisition. The first line is a copy of the ATOMS TOPR ID or Requisition transaction submitted. The second line contains the TO Number and the third line contains the two-letter JCALS notification status code and a short text description.

5-5.2   When the TORSN second line is BATCH-CONFIRM" (from the TOPR Batch Confirm transaction), a "CG Reject" status is generated by JCALS because BATCH CONFIRM is not a valid TO number (see figure 5-3). This is confirmation that the TOPR file was successfully processed by the JCALS system.

5-5.3   TODOs and TODAs may provide copies of the TORSN document to affected account POCs as notification of TO Request transaction status.

5-5.4   When the notification status code indicates improper processing, it means the request was improperly completed or routed. Due to the variety of combinations, it is essential the TODO follow proper procedures when submitting TO requests and when requesting special types of TOs (those assigned symbols, classifications, special categories, or status).

5-5.5   When a requisition is partially shipped, a TORSN is not issued for the backordered quantity. The DD Form 1348-2 will reflect partial shipment. This form may be retained in the TORSN file until completion of the original TO request, i.e., receipt of the TO or cancellation of the request.

5-6 REQUISITION FOLLOW-UP TRANSACTIONS (ATOMS AND AFTO FORMS 276 ONLY).

NOTE

Follow-ups are not required for on-line JCALS users because they can verify and correct order status directly.

5-6.1   Follow-ups may be submitted 60 days after the initial transaction is submitted, and every 30 days thereafter. A requisition follow-up transaction is generated for the following conditions:

NOTE

Failure to receive any requisitioned TO(s), or at least "CG Reject" status for the TOPR Batch-Confirm transaction indicates that the TOPR file was either not received or not correctly processed by the JCALS system. Resubmit the entire order.

- When a TO or TORSN providing its status is not received within 60 days (90 days overseas), and the TO requisitioned is listed as current and available in the TO Catalog, and it is known that initial distribution was made prior to submission of the original requisition.

- When the requisitioned TO is not received within 60 days (90 days overseas) following receipt of backorder status or submission of a prior follow-up transaction.

5-6.2   An ATOMS requisition follow-up transaction will be generated when the TODO changes the ATOMS Part 4 record for the requisition transaction to select the "Follow-up Requisition" option (paragraph 3-13.6.1). A requisition follow-up transaction (ATD–record positions 1 - 3, figure 4-2) will be included in the next ATOMS TOPR file generated.

5-6.3   When JCALS receives an ATOMS follow-up transaction, it looks for the original request transaction. If this is not found, a new requisition is generated and either the TO is shipped, or the TODO receives a

backorder status notification. If the original request was found, the order status is verified and reported back to the TODO on a TORSN.

5-6.4   Follow-up on AFTO Form 276 requisitions will be prepared the same way as the original order with the following statement added in block 24, "**FOLLOW-UP ON REQUISITION SUBMITTED** (enter date), **REQUISI-TION NUMBER** (enter original requisition number)."

5-6.5   Contact the TO Manager when updated requisition status is not received within 30 days (60 days overseas) after submitting a follow-up transaction. When a TORSN is received in response to a follow-up, any subsequent follow-ups should be directed to the TO Manager, with an information copy e-mailed to the MAJCOM weapon system manager.

5-7   REQUISITION BACKORDER CANCELLATION TRANSACTIONS.

5-7.1   A backorder may be canceled by the TODO at any time after receiving backorder notification status (BB), but prior to shipment.

5-7.1.1   A backorder cancellation transaction will be generated when the TODO changes the ATOMS Part 4 record for the requisition transaction to select the "Cancel Requisition" option. The backorder cancellation transaction (AC1–record positions 1-3, figure 4-2) will be included in the next ATOMS TO Request file generated.

5-7.1.2   Backorders are cancelled on-line in JCALS by using the DI TM process "Cancel Backorder."

NOTE

> Separate transactions for the same TO can result in establishing more than one backorder record for the TO. When more than one requisition is on backorder for the same TO, a separate entry is required to cancel each backorder.

5-7.2   A backorder may be canceled when the TO is replaced, rescinded, deleted or for numerous other management actions. If a backorder is canceled in this manner, a TORSN will be sent to the TODO with a code explaining the reason for cancellation.

CHAPTER 6

DISTRIBUTION

6-1   INITIAL DISTRIBUTION (ID).

ID is the first distribution of a TO, TCTO, change, revision, or supplement after initial printing. ID is made based on requirements (subscriptions) established in JCALS as described in chapter 4. Nuclear Weapon TOs (chapter 7), are distributed according to records maintained in the Technical Manual Data System (TMDS) by SA-ALC/NWTD. Nonnuclear EOD TOs (chapter 10) are distributed according to records maintained by NAVEODTECHDIV. Requisitions also cause distribution of TOs and increments, but only to the unit/activity making the requisition.

6-1.1   Preliminary TOs (PTOs, paragraph 4-2.4) are listed in the Air Force TO Catalog to allow establishing ID for the formalized TO. They are only distributed for specialized acquisition/training purposes, according to paragraph 5-1.2. When a PTO is formalized, distribution is accomplished using the ID requirements in the normal manner.

6-1.2   Interim TOs (ITOs, paragraph 4-8) are NOT distributed using ID records, but are distributed via messages sent to Mail Lists established for the system or commodity covered by the TO.

6-1.3   Requirements for depot level TCTOs will be determined by the TODO. No screening action will be accomplished by the TO Manager to prevent shipment to organizational and field level activities.

6-2   DISTRIBUTION SHIPMENTS.

6-2.1   ID shipments of Immediate and Urgent Action TCTOs and certain nuclear weapons TOs of immediate urgent nature are made in envelopes marked with a red border and the word EXPEDITE across the top (figure 6-1). When cartons are used, the same marking surrounds the label.

6-2.2   JCALS uses the DD Form 1348-2 shipping label in MILSTRIP format for both requisition and ID shipments of TOs.

6-2.3   For classified TOs, a mailing label is placed on the outer and inner wrappers and the record portion is placed inside the package with a classified material receipt/record of destruction when required by applicable directives. When more than one TO is included in a package, the label for one TO is used as a mailing label and the others are placed inside the package. Classified and unclassified TOs are not intermixed, except that changes and supplements classified lower than the basic TO may be shipped with the basic.

6-2.4   When more than one package is needed, each package is identified (such as: 1 of 3, 2 of 3) and for classified TOs the record portion of the mailing label is placed in the first package. Labels for classified TO shipments will not show the TO classification.

6-2.5   When mailing export-controlled TOs, the TO Manager will ensure the warehouse encloses one copy of the export control notice (AFPD 16-2) per shipment package.

6-2.6   Replacement Pages. TOs and TO increments distributed with missing or mis-printed pages may be corrected by redistributing the missing/reprinted pages using the JCALS "Specify ID by Like Item" or "Specify ID by Account Profile" processes to develop a distribution label deck. An Errata cover sheet (see Glossary) will provide instructions to insert/replace the pages into the affected TO(s). This method will not be used to replace pages when the content of the data must be changed. Print or overstamp the words "MISSING PAGES" in block 27 of the DD Form 1348-2. Because these errata packages do not change TO data or change numbers, they will not be documented in the ATOMS program. However, "A" page annotations documenting the missing/damaged pages will be erased. The TO Manager will also add omitted pages to all copies of the publication in stock.

6-3   RECEIPT AND REDISTRIBUTION, MISDIRECTED SHIPMENTS, EXCESS RETURNS.

6-3.1   All shipments will be checked to ensure the label bears the correct TODO code number and address. Misdirected shipments of unclassified TOs will be forwarded to the correct address when possible.

6-3.2   Shipments will be opened promptly and checked to ensure the TO number and the quantity agree with that shown on the label or record portion and document receipt. Classified document receipts will be signed and promptly returned to the address shown on the receipt. When a shortage exists, enter the words "Shortage, quantity received (number)" on the face of the label and forward it to the appropriate TO Manager for shipping action. When the TO is unclassified, any extra copies received may be held or destroyed, except when a significant number is involved. When there are a significant number of excess copies of unclassified TOs or when the TO is classified, request disposition instructions from the appropriate TO Manager.

NOTE

No return shipment of TOs shall be initiated without the approval of the TO Manager.

6-3.3   When incorrect TOs are received, notify the appropriate TO Manager of the pertinent details. The TO Manager will then advise the TODO what action is required.

6-3.4   TODOs will distribute routine TOs to subaccounts within two work days after receipt. Urgent and immediate TOs will be redistributed immediately.

6-4   NEW ORGANIZATION OR MISSION INITIAL TO DISTRIBUTION LISTS.

If new organizations are established or new missions are assigned to existing organizations, it may be beneficial to establish ID lists for initial "push" distribution of required TOs. These lists, formerly called "List of Applicable TO (LATO)" distribution, can be established as required, based on weapon system or organization profiles stored in JCALS.

6-4.1   The affected MAJCOM determines which TOs are required to establish and maintain an operational and/or weapons system library. Preparation and application of a profile ID list will establish ID and provide automatic requisition action for all TOs listed in the profile.

6-4.2   Since ID requirements for sponsor approval "Y" TOs established as the result of a profile list are considered approved by the TO Manager, separate justification letters are not required.

6-4.3   Detailed procedures for establishing and maintaining profile lists will be developed when the need arises.

CHAPTER 7

NUCLEAR WEAPONS TOS

7-1   INTRODUCTION.

7-1.1   Purpose. This chapter contains policy and procedures used to obtain, manage, and distribute TOs indexed in 0-1-11N and 0-1-11N-C. Although some of these TOs may now be considered non-nuclear, this chapter will refer to these manuals as nuclear. Requests for all nuclear weapons data, including technical manuals and videotapes, will be submitted to AAC/WNLD, 1651 First Street SE, Kirtland AFB NM 87117-5617, for processing in accordance with the distribution statement. Terms applicable to this chapter are in the Glossary.

7-1.2   General. Procedures in other chapters of this TO apply, except as otherwise specified herein. For nuclear weapons data, direct matters concerning management policies, procedures, requirements, requisitions, assignment, and cancellation of TODO codes, assignment of new TO numbers, status of forthcoming TOs, and changes not yet indexed to AAC/WNLD. Questions concerning content should be referred to the appropriate TO management agency, listed in the index. Order nuclear weapons TOs and other data, whether managed at AAC/WNLD or other locations, using the paper or electronic AFTO Form 187 or ATOMS TOPR set for G022 format. Send this form attached to e-mail to AAC/WNLD, **not** by FTP to the Tinker Gateway. Electronic forms may be e-mailed to *todata@nwpsc.af.mil* by the Government Approving Agent (AFTO Form 43, block 7); paper copies may be mailed or faxed to DSN 246-8911, commercial (505) 846-8911.

7-1.2.1   Joint Nuclear Weapons Publication System (JNWPS) videotapes are obtained and managed through procedures outlined in this chapter for TOs. Distribution of TOs and videotapes is normally limited to those who perform hands-on procedures. Recommendations for development of new videotapes to cover specific procedures in JNWPS manuals are submitted to AAC/WNLD.

7-1.2.2   All unclassified nuclear TOs are "E" coded (sponsor approval "Y" coded in JCALS) and will require justification in a letter attached to the AFTO Form 187 when requirements are established.

7-1.2.3   Matters relating to packaging and shipping, including faulty packaging, postal registration numbers, and security violations resulting from inadequate packaging, will be directed to the appropriate warehouse (TO shipment point). For TOs managed at Hill AFB UT, the address is 75 CS/SCSA, 7535 8th Street, Ste B, Bldg 820, Hill AFB UT 84056-5008 (message address 75CS HILL AFB UT// SCSPT//). For TOs managed at Tinker AFB OK, address is 72 CS/SCSPT, 7851 Arnold St., Bldg 3, Door 56, Tinker AFB 73145-3021 (message address 72CS TINKER AFB OK//SCSPT//). For TOs managed at Kirtland AFB NM, the address is AAC/WNLD, 1651 First Street SE, Kirtland AFB NM 87117-5617 (message address is NUC WPNS PROD SUP CTR KIRTLAND AFB NM// WNLD//). The Cryptologic Systems Group (CPSG/LGLI) will make distribution directly from their office (message address is HQ CPSG SAN ANTONIO TX//LGLI//).

7-1.3   Approving Agencies. The offices listed below are responsible for monitoring and approving USAF or other US government agency requests for classified TOs, assignment/change/ cancellation of NW TODO codes for Category 11N or 60N TOs, and approval of all contractor requests for TOs. These agencies are:

NW TOs	NW EOD TOs	NW TOs	NW EOD TOs
ACC/LGWN	ACC/CEXE	USAFE/LGWN	USAFE/CEXE
AETC/LGMW	AETC/CEOX	AFSPC/LGMW	AFSPC/CEPX
AFMC/DRRW	AFMC/CEPR	ACO/PCO (contractors)	ACO/PCO (same)
ANG/LGM	ANG/CEXE	AFSC/SEW	
AMC/DOOO	AMC/CEOX	AFRC/LGWN	
PACAF/LGWX	PACAF/CEOOD	OL-EL/ELO	

7-2   RESPONSIBILITIES.

7-2.1   AAC/WNLD will:

7-2.1.1   Manage the requirements, distribution, and control for all nuclear TOs indexed in 0-1-11N-C, regardless of the managing agency, and any related publications, including nuclear EOD TOs, JNWPS manuals with AF users, and requests from foreign governments.

7-2.1.2   Manage and assign NW/NW-EOD/NW-FMS TODO codes.

7-2.1.3   Act as final screening and distribution approving agency for USAF requirements and requisitions submitted for all nuclear TOs.

7-2.1.4   Suspend/cancel distribution to TODOs who fail to comply with this chapter. AAC/WNLD shall notify the TODO and approving agency when an account is suspended due to discrepancies that require correction (e.g., change of address).

7-2.1.5   Single Managers (SMs) will provide the appropriate warehouse with a letter listing the names, grades, duty titles, telephone extension, and representative signatures of personnel authorized to approve TO distribution.

7-2.1.6   Manage and maintain the NW TO data in the Electronic Technical Order Management System (ETOMS).

7-2.2   Approving Agencies will:

7-2.2.1   Ensure that users are placed on distribution for classified nuclear TOs on a need-to-know basis. Approve or disapprove requests for all classified nuclear TOs.

7-2.2.2   Furnish AAC/WNLD with a letter listing the names, grades, titles, functional address symbols, telephone extensions, and representative signatures of personnel authorized to act as approving agent. Submit a revised letter promptly when changes occur.

7-2.2.3   Approve/disapprove requests for NW TODO codes (AFTO Forms 43), changes to AFTO Forms 43, or cancellation of accounts.

7-2.3   Country validation agencies will approve and coordinate establishment of NW-FMS-TODOs. Prepare an AFTO Form 187 with required justification when one is not provided by the requesting government.

7-2.4   Each SM's warehouse will perform all functions related to receiving, shipping, and storage of nuclear data (paragraph 7-6.7).

7-2.5   User organizations will:

7-2.5.1   Initiate AFTO Forms 43 and forward through the approving agency for assignment of nuclear weapons TODO codes used to obtain all TOs indexed in 0-1-11N and 0-1-11N-C. Submit a revised AFTO Form 43 promptly when changes occur.

7-2.5.2   Prepare and submit requisitions.

7-2.5.3   Maintain nuclear TO libraries (paragraph 7-4).

NOTE

> When contract personnel manage the government TODO account, submit requests for unclassified nuclear TOs with justification directly to AAC/ WNLD, and submit requests for classified TOs through the approving agency.

7-2.5.4   Validate their nuclear TO requirements annually during January, or as required by AAC/WNLD.

7-2.6   Contractor organizations will:

7-2.6.1   Submit a DD Form 2345, Militarily Critical Technical Data Agreement, along with their AFTO Form 43 when the account is established. The data custodian (block 3 of DD Form 2345) must be one of the individuals appointed as TODO (block 6 of the AFTO Form 43). The addresses provided on both documents must be the same. If a contractor wishes to certify more than one individual to request and receive export controlled data, a separate DD Form 2345 will be provided for each individual. If the contractor requires data

at several locations, a DD Form 2345 will be submitted, along with an AFTO Form 43, and a separate TODO code will be assigned for each location.

7-2.6.2   Submit all TO requirements through the ACO/PCO for approval.

7-2.7   ACOs/PCOs will:

7-2.7.1   Assist contractor personnel in preparing AFTO Form 43 to request assignment, change or cancellation of NW TODO code and AFTO Form 187 to establish or change requirements or requisition nuclear TOs.

7-2.7.2   Approve distribution of nuclear TOs to contractor personnel and upon contract termination, ensure classified TOs are returned to DOD control.

7-3   INDEXING NW TOS AND RELATED PUBLICATIONS.

7-3.1   TO 0-1-11N, Numerical Index to Joint Nuclear Weapons Publications, lists all joint-use technical publications and videotapes applicable to the Joint Nuclear Weapons Publication System (JNWPS).

7-3.2   TO 0-1-11N-C, Numerical Index to Joint Nuclear Weapons Publications - AF Supplement, lists all nuclear TOs published for exclusive use by the Air Force, regardless of the SM location. The new managing agency for each TO is listed in this index.

7-4   NUCLEAR WEAPONS TO PUBLICATION LIBRARY.

7-4.1   All nuclear TO libraries will be maintained according to chapter 3 of this TO.

7-4.2   Advanced Interim Changes (AIC) and Interim Changes (IC) issued in support of JNWPS manuals are filed in the same manner as interim operational supplements and operational supplements.

7-5   REQUESTING NUCLEAR WEAPONS TODO CODES.

The following procedures apply to US government and contractor organizations (see paragraph 7-7 for FMS procedures).

7-5.1   User Organization. The AFTO Form 43 will be used to request assignment, change, or cancellation of an NW-TODO or NW-EOD-TODO code. NW-EOD-TODOs may use their assigned code to obtain all NW TOs. The AFTO Form 43 will be completed in accordance with chapter 3. Five copies of the form will be prepared; one copy is retained for suspense, the original and three copies will be forwarded to the appropriate approving agency. Approving agencies may fax an approved or corrected AFTO Form 43 to AAC/WNLD at (505) 846-8911 or DSN 246-8911. This will allow immediate shipment of TOs for a period of 30 days only. The original AFTO Form 43 must be provided to AAC/WNLD for continued shipments after the initial 30-day period.

7-5.2   When TOs are required at the time of initial request for TODO code assignment, a completed AFTO Form 187 may be attached to the AFTO Form 43.

7-6   DISTRIBUTION REQUIREMENTS.

7-6.1   Establishing Requirements for New TOs. ID requirements for nuclear TOs and videotapes will be submitted as soon as they appear in the index, using an AFTO Form 187. Route requests for classified nuclear TOs or videotapes through the approving agency. Submit requests for unclassified nuclear TOs or videotapes with justification directly to AAC/WNLD. When the TO is printed, distribution will be made automatically.

7-6.2   TCTOs. All requirements for nuclear TCTOs will automatically be shipped to the TODO in the same quantity as the unit's established requirement for the governing maintenance TO. TCTOs not applicable to their unit may be disposed of in accordance with the destruction notice on the title page.

7-6.3   Classified TOs. Requirements for all classified TOs will be submitted as a separate request through the approving agency.

7-6.3.1   Classified nuclear TOs will be wrapped in accordance with DOD 5200.1-R and AFI 31-401. A label will be placed on the outer and inner wrappers of the package. When more than one nuclear TO is included in a package, the label for one TO will be used as a mailing label. The other labels will be placed inside the package. Classified and unclassified TOs will not be combined in one shipment.

NOTE

The TODO will initiate a security investigation IAW AFI 31-401, table 6-1, for classified copies lost, not received or received incomplete. AAC/WNLD and AAC/WN-Security will be promptly notified if a compromise has occurred so that a damage assessment can be accomplished.

7-6.3.2   All shipments of secret nuclear TOs will be accompanied by an AF Form 310. This form serves as a shipping document and record of receipt. These receipts must be signed and returned to the SM's servicing TO warehouse, immediately after verification of shipment. Failure to return the signed copy to reach the TO warehouse within 30 calendar days (45 calendar days for overseas TODOs) from date of dispatch constitutes a violation of security requirements. All shipments of TOs will be opened promptly and checked to ensure the TO number and the quantity agree with that shown on the mailing label. All shortages will be reported to the appropriate warehouse immediately, with an information copy to AAC/WNLD.

7-6.4   Unclassified TOs. Requests for initial, one-time, or changing requirements will be forwarded directly to AAC/WNLD for processing. Each request must have a justification attached when the TO is initially requested, since all unclassified nuclear TOs are E-coded (sponsor approval "Y"). The forms and attached justification are submitted according to paragraph 7-1.2.

7-6.5   Annual Validation of TO Requirements. In January, AAC/WNLD will provide every TODO with a Master Requirements List (MRL) for review. If no changes are required, the certification will be signed by the TODO and returned directly to AAC/WNLD. If increases, decreases, or deletions are required, an AFTO Form 187 will be completed to adjust requirements.

7-6.6   Completion of AFTO Forms 187. Enter the NW or NW-EOD TODO address and code number in blocks 1 and 2, respectively. All paper AFTO Forms 187 will be signed in block 3 by the TODO, and the name will be typed in the electronic version. For classified requirements, block 4 of all paper AFTO Forms 187 will be signed by the authorized individual at the approving agency, or type in the signature block on the electronic versions. E-mail submissions must be sent by an authorized TODO or the government approving agent, respectively. The rest of the form is completed according to figures 4-1 and 4-3.

7-6.7   TO Distribution. When stock is received by a TO warehouse, a copy of the TO and an AFMC Form 145 will be sent to the TO manager for a printing quality review. The AFMC Form 145 will include the TO number, date, classification, type, quantity and date received.

7-6.7.1   The TO manager approves the data for distribution and prepares the appropriate shipping labels for the TO warehouse. An AF Form 310 or equivalent is also prepared when TOs are classified SECRET. An MRL will be included with each package. The package is sent to the appropriate TO warehouse for action. When ID is completed, the warehouse will mail a copy of the AFMC Form 145 to the TO manager indicating the shipment date. This information will then be entered into the TOMS.

7-6.7.2   When increases or one-time requirements are submitted to AAC/WNLD, the appropriate managing agency will be notified. The managing agency will prepare shipping labels and an MRL (by Technical Order Number) for the TO warehouse to make distribution. When shipment has been made, the warehouse will provide the TO manager with a copy of the AF Form 310 or MRL with the shipping date annotated. The TO manager will enter this information in the TOMS. AAC/WNLD will enter all initial distribution requirements in the TOMS.

7-7   FOREIGN MILITARY SALES (FMS) PROCEDURES.

Nuclear TO support to foreign governments is provided according to AFMAN 23-110, AFI 16-201, AFI 31-401, AFMAN 16-101, and Allied Command Europe (ACE) Directive 80-6/European Command Directive 60-12. The following procedures implement those directives:

7-7.1   USAF Agency Actions for Nuclear TOs.

7-7.1.1   SAF/IAD is the USAF release approving agency for nuclear TOs required by foreign countries. SAF/IAD will furnish AAC/WNLD with a letter containing the names, grades, duty titles, office symbols, telephone extensions, and representative signatures of officials authorized to approve release of classified nuclear TOs to foreign governments. IAD will submit a revised letter when changes occur.

7-7.1.2   Annually, all nuclear TO distribution requirements to foreign countries must be validated by the TODO through the Country Validation Agency.

7-7.1.3   OL-EL/ELO, as European validation agency, will provide a letter to AAC/WNLD listing the names, grade, duty titles, office symbols, and telephone extensions of the individuals authorized to sign AFTO Forms 43 and 187.

7-7.2   Establishing a NW-FMS-TODO (applies to Non-US NATO organizations only). After verifying the host nation requirement for a new TO distribution account, OL-EL/ELO will prepare five copies of an AFTO Form 43 to establish an NW-FMS-TODO. One copy will be retained for suspense, while the original and three copies will be forwarded to AAC/WNLD for action. The following instructions will be used with the procedures in chapter 3 to complete the AFTO Form 43.

7-7.2.1   Block 3: Add a line indicating "Non-US recipient (identify country and unit)."

7-7.2.2   Block 4g: Check "Other" block and enter "NW-FMS-TODO." On the back explain that the requested TODO will be used to provide releasable unclassified nuclear TOs to foreign national units or agencies. Provide enough information (i.e., systems and equipment being used by the foreign unit or agency) to support release requests. If classified information must be used to justify requests, it will be submitted in a separate cover letter.

7-7.2.3   Block 6: This block will contain the signatures of OL-EL/ELO personnel responsible for the NW-FMS-TODO.

7-7.2.4   Block 7: Not used.

7-7.2.5   Block 8: Used by OL-EL/ELO to indicate the NW-FMS-TODO is approved.

7-7.3   Validating FMS requirements and requisitions for nuclear TOs.

7-7.3.1   An MRL will be provided to each TODO in January to validate TO requirements. TODOs will review the listing and provide an AFTO Form 187 if there are additions or deletions. If no changes are needed, the certification will be signed by the TODO and returned directly to AAC/WNLD.

7-7.3.2   Non-US Air Force agencies in Europe will forward their AFTO Forms 187 through OL-EL/ELO, Unit 8745, APO AE 09094-8745, for approval of both classified and unclassified additions or deletions.

7-7.4   FMS Release Approval.

7-7.4.1   AAC/WNLD will release unclassified nuclear TOs to foreign countries after validation by OL-EL/ELO and approval by SAF/IAD.

7-7.4.2   Requests for classified nuclear TOs will be forwarded through OL-EL/ELO to SAF/IAD for coordination, approval and assignment of the case number. AAC/WNLD will then make distribution of requested TOs through SAF/IAD to the country.

7-7.5   FMS Distribution.

7-7.5.1   When directed by SAF/IAD, the Single Manager's technical content manager will prepare a sanitized nuclear TO.

7-7.5.2   The TO Manager will arrange for printing the required number of copies of the sanitized nuclear TO.

CHAPTER 8

INTERSERVICE DISTRIBUTION OF TECHNICAL PUBLICATIONS -

AIR FORCE, ARMY, NAVY, MARINE CORPS, AND DEFENSE

LOGISTICS AGENCY (DLA)

8-1   GENERAL.

Air Force, Army, Navy, Marine Corps, and DLA will exchange technical publications as provided for in AFJI 21-301. This chapter contains policy and procedures on interservice distribution of technical publications not integrated into the Air Force TO system. Administrative publications are obtained in accordance with AFI 37-161.

NOTE

> These procedures may change if JCALS will allow ordering other-service manuals without establishing special accounts.

8-2   REQUIREMENTS.

AF activities will submit requirements for publications of another service to the TODO, with justification. For orders of more than 25 copies of a publication of another service, see paragraph 8-7. The TODO will verify the requirements and forward the initial package with justification to OC-ALC/TILUB. Questions concerning receipt of manuals and follow-up action will be directed to OC-ALC/TILUB.

8-3   OBTAINING ARMY PUBLICATIONS AND RELATED FORMs.

8-3.1   To obtain unclassified Army technical publications on a one-time basis, a TODO that does not have an Army account will submit a letter request to OC-ALC/TILUB. The letter will include the TODO and TM Account codes and DSN number, the publication number, the quantity required, the address to which the publication should be shipped, and justification for the request. Classified publications cannot be requested on a one-time basis through OC-ALC/TILUB.

8-3.2   With proper justification, a TODO may establish an Army technical publications account to enable continuing distribution of the technical publications listed in DA PAM 25-30, Consolidated Index of Army Publications and Blank Forms. Procedures are specified in DA PAM 25-33, User's Guide for Army Publications and Forms. The request for assignment of an Army account number will be submitted on a DA Form 12-R, Request For Establishment of a Publications Account, sent through OC-ALC/TILUB for approval or disapproval. If approved, TILUB will forward the package to the appropriate Army organization for processing. If disapproved by TILUB or the Army, the package will be returned with reasons for disapproval. DA Form 12-R is available from the US Army Publishing Agency (USAPA) web site, *http://www.usapa.army.mil/*. After the Army technical publications account is established, other DA-12 series forms, with the exception of the DA Form 12-R, will be submitted according to AF PAM 25-33.

8-3.3   All DA Forms 12-R for technical publications accounts, including those marked as a change in Block 3b, must be sent to TILUB for AF authorization and forwarding to the Army. The DA Forms 12-R will be completed as follows:

8-3.3.1   Blocks 1 - 3: Leave Block 1 blank when requesting a new account. Enter the current date in Block 2. Check the appropriate box under Block 3.

8-3.3.2   Block 4 (FROM): Include the TODO code in addition to the complete 3/4-line address information and 9-digit ZIP code.

8-3.3.3   Block 5 (THRU): Enter "OC-ALC/TILUB, 7851 Arnold St Ste 201, Tinker AFB OK 73145-9147."

8-3.3.4   Block 6 (TO): Enter "U.S. Army Publication Agency, ATTN: DOF, 1655 Woodson Road, St. Louis MO 63114-6181."

8-3.3.5   Block 7a (REQUEST AN ACCOUNT BE ESTABLISHED FOR THE FOLLOWING SERVICE): Check the publications block only. Leave Block 7b blank.

8-3.3.6   Block 8 (UNIT DESCRIPTION DATA): Check "Air Force" in Block 8a and enter the DODAAC in Block 8g.

8-3.3.7   Blocks 9a, b, and c: Must be completed with the TODO's information.

8-3.3.8   SECTION II, ACCOUNT CLASSIFICATION LEVEL: Check the appropriate box under Block 10. If Confidential or Secret are checked, the organization's security officer will complete Blocks 11a, b, and c to confirm the capability to handle classified.

8-3.3.9   SECTION III, CHANGE OF ADDRESS: Complete only if Block 3b was checked.

8-3.3.10   SECTION IV, AUTHENTICATING OFFICIALS: The organization commander will complete the first line (Blocks a, b, and c). OC-ALC/TILUB will complete the second line.

8-3.4   Initial Distribution (ID or subscription) is similar to ID for Air Force TOs - it provides for delivery of all future editions and updates in the quantities requested. The primary method for establishing ID requirements for most Army technical and administrative publications is through the Army Publications and Forms Ordering and Subscription System found on the USAPA web site listed above, using option 4 (the "DA Form 12-99-R" format). TODOs who do not have access to the Internet may order a CD-based version of the ordering system and publication/forms index by sending a request to the Commander, USAPA, ATTN: DOF, 1655 Woodson Road, St. Louis MO 63114-6181. TODOs will consolidate requirements for all the units they support and submit them under a single account. The forms will be completed according to DA PAM 25-33.

8-3.5   ID of EOD and Nuclear Weapons publications is authorized only with MAJCOM and OC-ALC/TILUB approval. DA Form 12-29-R, Subscription For Explosive Ordnance Disposal (EOD) Technical Publications; and DA Form 12-35-R, Subscription For Nuclear Weapons Publication; are included in TM 39-0-1A, which also provides instructions for completing and submitting the forms.

8-3.6   The Army requires use of a different format for requisitioning copies of publications. The "Resupply" system (options 1 or 2 of the Army Publications and Forms Ordering and Subscription System) is used to replace lost or worn publications, order publications not received through continuing distribution, and to requisition current editions for the unit library. (Current editions are not automatically shipped when initial distribution is established.) Replacement copies are requested using the "DA Form 4569" format either from the web page or the CD (paragraph 5-3.4) according to DA PAM 25-33.

NOTE

At this time, USAPA cannot accept requisitions via Defense Information Services Network (DISN).

8-3.7   Additional Guidance.

8-3.7.1   If an obsolete or incomplete DA 12-series form is submitted, it will be returned without action for re-accomplishment.

8-3.7.2   After a technical publications account has been established with the US Army Publications Distribution Center at Baltimore, the unit will receive all continuing distribution directly from the applicable Army Publications Distribution Center.

8-3.7.3   When items are deleted from the system, requirements are automatically deleted without submission of a DA-12 series form.

8-3.7.4   SAF/AAIPD is responsible for administrative, doctrinal, and training publications support. Requests for these publications should be processed through SAF/AAIPD according to AFI 37-161.

8-4   OBTAINING NAVY PUBLICATIONS.

Navy technical manuals are under the cognizance of several Navy components: Naval Air Systems Command (NAVAIR); Naval Sea Systems Command (NAVSEA); Space and Warfare Systems Command (SPAWAR); Naval Facilities Engineering Command (NAVFAC); and Naval Supply Systems Command (NAVSUP). Other types of Navy publications include departmental directives (instructions) and technical directives (power plant changes/bulletins). The following procedures apply to establishing requirements and requisitioning Navy publications. Since Naval Air Technical Data and Engineering Service Command (NATEC) at NAS

North Island, San Diego CA no longer accepts manually prepared requests, manual procedures are addressed only when referring to actions between the TODO and OC-ALC/TILUB.

8-4.1   Automatic Distribution.

8-4.1.1   Air Force TODOs can be assigned a NAVAIR account number by NATEC to allow automatic distribution of NAVAIR technical manuals.

8-4.1.2   To obtain a NAVAIR account and establish initial requirements for NAVAIR publications, go to the NATEC web site (URL *http://www.natec.navy.mil/*) and apply for an account under "Technical Manuals; New Account Request," and follow the instructions. If the request is disapproved by NATEC, the requesting activity will be notified with reason for disapproval.

8-4.1.3   Establishing requirements for NAVAIR technical manuals does not cause the existing publications to be shipped. TILUB will take additional action to requisition the existing publications, if required, when processing the request for assignment of an account number. Automatic distribution will begin with the next increment that is distributed.

8-4.1.4   After an account number is assigned, submit NAVAIR requirements to the Navy by DISN or floppy disk. Navy publications can also be ordered through the Navy web site at (URL *http://www.nll. navsup.navy.mil).* A password must be obtained through this address to allow access and use of the site.

8-4.1.4.1   Requirements transmitted by DISN will be addressed to the Defense Automatic Addressing System (Message Address: DAAS DAYTON OH). Follow DISN instructions provided by your local communications center and DAAS. (The DAAS computer electronically transmits to the Navy computer daily.)

8-4.1.4.2   To submit requirements by floppy disk use the Automatic Distribution Requirements List from the NATEC Technical Publications Library (TPL) program. The microcomputer software package can be obtained from Commanding Officer, Naval Air Technical Data and Engineering Service Command, ATTN: ADRL Request, NAS North Island, Bldg 90, Code 3.3, P.O. Box 357031, San Diego CA 92135-7031. Follow instructions in the program and those provided by NATEC.

8-4.1.5   Submit initial distribution for Navy publications, other than NAVAIR, by letter of justification to OC-ALC/TILUB. Include TODO number, address, point of contact, DSN number, publication number, quantity, and signature of the TODO or alternate. Adjustments to these requirements will also be sent to TILUB by letter.

8-4.1.6   When address changes occur for a NAVAIR account, notify TILUB in addition to NATEC.

8-4.2   Requisitions:

8-4.2.1   Organizations assigned a NAVAIR account number and also a Department of Defense Activity Address Code (DODAAC), as identified in DOD 4000.25-6-M, shall submit requisitions for stock numbered publications shown in NAVSUP 2002, Navy Stock List of Publications and Forms, to the Navy according to procedures listed on the Navy Inventory Control Point (NAVICP) web site, URL *www.navicp.navy.mil.*

8-4.2.2   Organizations assigned a Navy account number but not a DODAAC, will submit requisitions for stock numbered publications shown in NAVSUP PUB 600 by letter to TILUB. Include assigned Navy account number in the letter. A DODAAC is required to allow ordering of Navy publications directly from the Navy. Air Force organizations should send a letter of justification to AFMC LSO/LOTA, Attn: DODAAC Monitor, 4375 Chidlaw Rd Ste 6, Wright Patterson AFB OH 45433-5006, DSN 787-7223, Fax 787-4351, for assignment of a code. Non-AF organizations contact DAASC/DSDC, 5250 Pearson Rd, WPAFB OH 45433-5328, DSN 986-3247, Commercial (937) 656-3247, for information and assistance.

8-4.2.3   One time requisitions from organizations not assigned a Navy account number, or for which a stock number cannot be identified, should be submitted by letter of justification to OC-ALC/TILUB. Include TODO number, publication numbers, quantity, address, point of contact, and DSN number.

8-5   OBTAINING MARINE CORPS PUBLICATIONS.

Submit requests for Marine publications to OC-ALC/TILUB by letter of justification. The letter should include publication number, quantity, state whether continuing distribution or requisition to fill one-time need is required, TODO code and address, point of contact, DSN number, and signature of the TODO or alternate.

8-6   FURNISHING TOs FOR OTHER DOD ACTIVITIES.

Non-AF DoD organizations that will request TOs must first establish a TODO code (paragraph 3-2). Detailed instructions for preparation and submission of Air Force TO Publication Requests (TOPR) are described in chapters 3, 4, and 5.

8-6.1   An Air Force TODO code allows users to establish both ID (subscription service) and one-time requisition (distribution) of TOs. Request TODO codes according to chapter 3. A letter of justification must accompany the AFTO Form 43. Before requesting a TODO code, determine if a code already exists at the installation. If a code is already assigned, all activities on the installation should obtain TOs through the assigned code. Information can be obtained from the interservice coordinator at OC-ALC/TILUB concerning TODO codes presently assigned.

NOTE

> ID for AF TOs cannot be established until the requiring organization has a TODO code.

8-6.2   After assignment of the TODO code, initial distribution/requisition requests for up to 25 copies are submitted by FTP using an ATOMS TOPR according to instructions in paragraph 4-6.

8-6.3   Submit one-time requests with justification by USPS, e-mail, or ATOMS TOPR (mailed, not FTP'd) to TILUB. Include TO number, quantity, address, point of contact, and DSN number.

8-7   BULK SHIPMENTS.

A request for more than 25 copies must be submitted as a bulk requirement with printing funds chargeable to the Air Force. Follow procedures in AFJI 21-301/AR 25-36/OPNAVINST 5600.22/MC0 5215.16A/DLAR 4151.9 to procure joint use technical publications.

8-8   COMMERCIAL MANUALS.

Only one copy of commercial manuals will be furnished. When an AF activity requires more, the TODO will advise the applicable TO Manager and arrangement will be made to purchase additional copies from the contractor.

8-9   CONTRACTORS.

Requests from contractors for Army, Navy, Marine Corps, and DLA technical publications required to support a government contract must be submitted to the service which has primary responsibility for the technical publication.

Table 8-1.   MILSTRIP Message Entries

Col	Title	Entry
1-3	Document Identifier:	Enter AOD
4-6	Routing Identifier:	Enter NFZ
7	M&S Code:	Enter S
8-20	Stock Number:	Enter stock number given in NAVSUP 2002, with no dashes.
21-22	Blank	Leave Blank
23-24	Unit of Issue:	Enter EA
25-29	Quantity:	Enter a five-digit number (i.e., 00001)
30-35	Unit Identification Code:	Enter assigned DODAAC (DOD 4000.25-6-M)
36-39	Julian Date:	Enter last digit of calendar year and Julian date (Example: 12 May 92 is entered 2133).
40-43	Serial Number:	Enter a number starting with 0001 each day and number consecutively with each publication requested.
44	Demand Code:	Enter R
45-50	Supplementary Address:	Enter USAF TODO code preceded by YT. (Example: YT5555)
51	Signal Code:	Enter D
52-53	Fund Code:	Enter XX
54	Blank	Leave Blank
55-56	Distribution:	Enter OI
57-59	Project Code:	Leave blank
60-61	Priority:	Enter two digit code as determined by the Force Activity Designator Code from NAVSUP 409 or 437.
62-64	Required Delivery Date:	Enter Julian date (at least 20 days after request date).
65-66	Advice Code:	Leave blank

CHAPTER 9

SPECIAL DISTRIBUTION

9-1   TOs FOR UNITS ON DETACHED SERVICE.

When detached service is for six months or less, units will normally receive TO support from the parent installation. For longer deployments, units may request establishment of, or submit their requirements to, a TODO where they will be located, 30 - 60 days before the desired effective date. Delete requirements at the former location as of the same date.

9-2   TOs FOR SECURITY ASSISTANCE ORGANIZATIONS (SAOS) AND DEFENSE CONTRACT MANAGEMENT COMMAND (DCMC) OFFICES.

9-2.1   The Air Force section of an SAO or a DCMC office shall keep its organic requirements separate from country or contractor requirements.

9-2.2   Organic requirements will be established by SAOs in the same manner as any other USAF activity.

9-2.3   DCMC offices will develop TOPRs using ATOMS and mail them on floppy disk to the applicable TO Manager. A printed copy will accompany the floppy disk, with "REQUIRED FOR FOREIGN CONTRACT" printed in red at the top. The ALC TO Manager will contact the local Foreign Disclosure Office (FDO) for releasability of TOs required for foreign contractors.

9-3   TOs FOR OTHER GOVERNMENT ACTIVITIES.

9-3.1   The Air National Guard, AF ROTC, AF Aero Clubs, and comparable activities will obtain TOs in the same manner as active AF activities.

9-3.2   Other DoD agencies will obtain TOs under procedures in chapter 8.

9-3.3   Other US Government agencies are authorized TOs in connection with assigned duties. Reimbursement requirements will be determined by the TO Manager based on stock level and quantity requested.

9-3.4   Releasable TOs shall be provided without charge to state, city, and local governments; disaster control and civil defense organizations; and hospitals and schools when the TOs are required to support the operation and maintenance of equipment used in the interest of the general public.

9-4   TO REQUESTS FROM FOREIGN COMPANIES AND INDIVIDUALS.

A request for a USAF TO from a foreign company or individual that is not Security Assistance Program (SAP) support related must be submitted through their embassy to the FDO at the appropriate ALC. A US based foreign contractor representative responding to a procurement or competition advocacy announcement must submit their request to the announcing office for processing through the FDO to the TO Manager.

9-5   REQUEST FOR TOs BY QUALIFIED US CONTRACTORS.

Requests for TOs shall be processed under procedures outlined in AFI 61-204. Requests will be answered within 30 calendar days or the requester will be notified of the reason for the delay.

9-5.1   Individuals and enterprises who have been assigned a qualified US contractor's code by the Defense Logistics Service Center (DLSC), United States/Canada Joint Certification Office, Battle Creek MI 49016-3412, in accordance with AFI 61-204, may request unclassified TOs for which they have been certified and registered by DLSC. Requests for TOs should be addressed to the responsible TO Manager listed in the Air Force TO Catalog. Requests must be accompanied by a copy of their approved DD Form 2345 and the signature and business purpose on the request must coincide with the signature and business purpose on the DD Form 2345. Information on obtaining a qualified US contractor code may be obtained from DLSC, at 1-800-352-3572.

9-5.2   Requests for TOs approved for public release with unlimited distribution shall be processed by the TO Manager without the need for supporting material. Requests for non-public-release TOs must be accompanied by full justification, and must be approved by the TO's technical content manager.

9-5.3   Fees for data released for use by domestic purchasers will be limited to the direct cost of search and reproduction in accordance with DoD 7000.14-M, Vol 11A, User Fees. Normally, collection of charges and fees will be made in advance of rendering the service. Charging appropriate fees for TOs is the responsibility of the prime TO Manager. Following receipt of a request for TOs, the prime TO Manager will provide a price quote to the requester which will be valid for 60 days.

9-5.4   A request for a commercial manual that has been assigned a TO number shall be denied and the requester provided the name and, when available, the address of the commercial concern named on the manual. (Commercial manuals adopted as USAF TOs are exempt from public release under AFI 61-204 and the AF Supplement to DoD 5400.7-R.)

9-6   TOs REQUIRED FOR SUPPORT OF US GOVERNMENT CONTRACTS AND RELATED ANNOUNCEMENTS.

NOTE

"Government Approving Activity" (AFTO Form 43, blocks 7 or 8) is used generically in the following subparagraphs to identify the Administrative Contracting Officer (ACO), Procuring Contracting Officer (PCO), or other designee, such as the Contracting Officer's Technical Representative (COTR), responsible for approving TO requests for the specific contract.

9-6.1   TODO Codes for Contractors with Existing Contracts. The Government Approving Activity may request assignment of a special purpose TODO code (chapter 3) to provide TOs directly to contractors. When such a code is assigned, the Government Approving Activity will immediately notify OC-ALC/TILUB by revised AFTO Form 43 of any changes in the contractor's address, classification of TOs authorized, or reason to cancel the code.

9-6.1.1   Authorized Contractor TODO Requests for TOs. Contractors with valid TODO codes must prepare a TOPR file using ATOMS (see chapters 3, 4 and 5) for their contract-related TO requirements. TOPR files are then provided to the Government Approving Activity for submittal.

9-6.1.1.1   The Government Approving Activity will validate that TOs requested are necessary to support contracts they administer. This includes ensuring the contractor has a valid DD Form 2345 before approving requests for export controlled TOs.

9-6.1.1.2   The Government Approving Activity will print, sign and retain a copy of the TOPR file and either submit the file via FTP to the Tinker Gateway (paragraph 4-6) or direct the contractor to mail the file on floppy disk with a Government Approving Activity-signed copy of the TOPR to OC-ALC/TILUB.

9-6.1.2   TOs required as government furnished property in aircraft delivered to the AF by contractors shall be obtained by requisition through the Government Approving Activity. Separate requisitions, covering a 3-month requirement, will be submitted for aircraft libraries and will be clearly marked "For Aircraft Libraries."

9-6.1.3   Contractor-operated AF base or organization TODOs (not assigned a SPTODOC according to paragraph 3-3) are authorized to establish ID requirements and request TO distribution as an AF activity.

9-6.2   TO Requests Related to Procurement and Competition Advocacy Announcements.

9-6.2.1   These TO requests must be submitted to the announcing contracting office and specify the solicitation and specific TO numbers. The announcing office must verify the bidder is an authorized contractor eligible to bid on the Request For Proposal (RFP). If so, and the TOs requested are required for the solicitation number quoted, the contracting office will print, sign and retain a copy of the TOPR. Approved requests shall be submitted to the responsible SM office for review of TO releasability and processing of the TO request. TOs releasable under provisions of AFI 61-204 shall be provided to the prospective bidders. TOs that are not releasable shall be made available for review in a bidder's library at the buying location.

9-6.2.2   While qualified US contractors may request TOs outside the procurement channel using paragraph 9-5 procedures, they are encouraged to submit these requests through the announcing office so it is aware of the need and can establish TO Manager response dates consistent with the announcement closing date. Paragraph 9-5 procedures are not subject to processing times tied to closing dates. TOs will be mailed only to US (including APO and FPO) addresses.

9-7   CONTRACTOR ACCESS TO USAF TO LIBRARIES.

Contractors may require access to USAF TO libraries when performing contract duties on Air Force installations. The contractors must be identified in a Government Approving Activity letter to the library custodian. When access is required, the following procedures must be followed.

9-7.1   Contractors must submit their contract related TO library access request, including a list of specific TOs to be accessed, through their Government Approving Activity. The Government Approving Activity is responsible for approving the access requests, after verification of the TO list with the responsible TO content managers and coordination with the library custodian. If access to export-controlled or classified TOs is required, the Government Approving Activity will also verify the contractor's security clearance and/or possession of a valid DD Form 2345, and require contractor personnel using a library containing export-controlled TOs to read and sign a copy of the "Notice to Accompany the Dissemination of Export-Controlled Technical Data" (AFI 61-204).

9-7.2   A copy of the access approval and authorized TO list will be maintained by the library custodian. TOs will not be removed from the work area served by the library by contractor personnel. The Government Approving Activity is responsible for notifying the custodian of any changes in access requirements or termination of the contract requiring access.

9-7.3   Access to limited rights or proprietary data in TOs is strictly forbidden without the express approval of the holder of the rights. When access to TOs with distribution statements other than "A" (unlimited distribution) is required, specific permission of the controlling Air Force office is required.

9-7.4   Access to distribution statement "A" TOs in the library will be limited to those required for contractual purposes and listed on the access approval list. Contractors may order distribution statement "A" TOs according to paragraphs 9-5 or 9-6.

9-7.5   The TO library custodian is responsible for controlling contractor access to TOs other than those approved in the access approval letter.

9-7.6   Contractor ID badges must be worn on an outer garment at all times while contractor personnel are in the library.

9-7.7   SETA contractors performing direct support of Air Force or other DoD activities shall be so identified in writing by their Government Approving Activity, including any authorization for access to classified and restricted distribution TOs if required. They will be provided the same access and privileges as government personnel for the duration of the SETA contract.

9-8   TOs TO SUPPORT NON-USAF-MANAGED CONTRACTS AND DIRECT SALES PROGRAMS.

Contractors may need USAF TOs to perform a service contracted directly with a SAP or other foreign country. This requirement must be established by the country and charged to the appropriate TO publications case. The country may obtain the required TOs through its TODO and furnish them to the contractor; or the country may designate the contractor as the country's agent and request OC-ALC/TILUF to assign a Foreign Military Sales (FMS) TODO code to the contractor and use the country's TO publications case for billing purposes. TOs will be shipped directly to the contractor when the second method is used.

9-8.1   When Country Standard TOs (CSTOs) are required for the support of a direct service contract with a country, the country should request the TO Manager that manages the CSTO contract to amend the Stock, Store, and Issue (SSI) contract as necessary to supply CSTOs to the service contractor. A copy of the request should be forwarded to the Air Force Security Assistance Center (AFSAC) case manager and to OC-ALC/ TILUF. If the SSI contractor wants OC-ALC/TILUF to supply shipping labels, an FMS TODO code must be assigned to the service contractor.

9-8.2   For a direct sales program, the country should establish its requirements for USAF TOs directly with OC-ALC/TILUF. An FMS TO publications case must be established if the country does not have one.

9-8.3   Under no circumstances will the contractor be authorized to requisition USAF TOs under a USAF contractor TODO code for the support of a non-USAF-managed service contract or direct sales program. This action could result in unauthorized disclosure of information and violate public law on recouping costs.

9-9   FREEDOM OF INFORMATION ACT (FOIA) REQUESTS FOR TOs.

These requests are submitted to the FOIA Office at the TO Manager's base. FOIA requests are processed according to the AF Supplement to DoD 5400.7-R.

9-10   RELEASE OF TOs IN SUPPORT OF LITIGATION.

The TO Manager may only release TOs in support of litigation when the US Government is a party to litigation, and by authority of the Judge Advocate (JA) office. Requests must clearly state that the government is a party to the litigation. When the government is not a party to the litigation, the TO Manager will follow normal release procedures. Data exempt from public disclosure is not required to be released unless under subpoena. However, if no significant purpose is served by withholding it, release may be authorized in coordination with JA, subject to use for and return at conclusion of the pending litigation according to AFI 51-301, Civil Litigation.

9-11   TOs FOR THE AIR FORCE REPOSITORY.

OC-ALC/TILU is responsible for the maintenance of the TO Repository, to comply with record retention requirements. A copy of all formal or preliminary TOs authorized for use by the Air Force or contractors will be provided to OC-ALC/TILUB, TODO Code 0086, TM Account number F*10SJ. Inactive TOs are retained for a limited period of time (usually six years).

9-12   SPECIAL REQUESTS FOR INACTIVE TOs.

Inactive TOs (rescinded, replaced, renumbered) may be requested from the TO Manager that was prime on the TO before it became inactive. The TO Manager will request a copy from the TO Repository, determine releasability in coordination with the previous content management activity, and provide the TO to the requester, or advise the requester of the reason for refusal.

9-13   CENTRALLY-SUPPORTED TODO FUNCTIONS.

In certain instances, units are assigned TODO codes, but are not required to perform all functions of a TODO. These units are normally in locations remote from a fully staffed TODO and require a code to receive direct distribution. In such cases the host base and OCALC/TILUB may agree to allow file maintenance and requisitioning by a designated fully-staffed BTODO, with distribution directly to the remote TODO.

9-14   DISTRIBUTION OF TO 00-105E-9 TO CIVILIAN FIRE DEPARTMENTS.

Civilian fire departments which might have to respond to military aircraft accidents may download the current issue of TO 00-105E-9, Aircraft Emergency Rescue Information, from the assigned web site, http:// 137.244.215.33/ ti/tilta/documents/to00-105e-9.htm. This site also provides a link to the Air Force Civil Engineering Support Agency (AFCESA)/CEXF web site hosting any current Interim Safety Supplements.

CHAPTER 10

DISTRIBUTION OF NONNUCLEAR EXPLOSIVE ORDNANCE

DISPOSAL (EOD) TOS

10-1   INTRODUCTION.

Nonnuclear Category 60 EOD TOs are joint service technical manuals. The Department of the Navy is Executive Manager of the joint service EOD program under DOD Directive 5160.62. The Naval Explosive Ordnance Disposal Technology Division (NAVEOD-TECHDIV), Indian Head MD, prepares, numbers, and distributes nonnuclear EOD publications in accordance with individual service requirements. Detachment 63, AAC/CC, 2008 Stumpneck Road, Indian Head MD 20640-5099 (hereafter referred to as Det 63) is tasked to provide management assistance to include joint service verification and determine Air Force usability of these TOs.

10-2   GENERAL.

This chapter contains policy and procedures for distribution of nonnuclear EOD TOs. Policy and procedures for nuclear (Category 60N) EOD TOs are described in chapter 7. Policy and procedures relating to Security Assistance Programs are set forth in TO 00-5-19.

10-2.1   Nonnuclear EOD TOs are distributed quarterly on CD-ROM as part of the Automated EOD Publications System (AEODPS).

10-2.2   EOD source data is developed by prime contractors according to Data Item Description (DID) DI-SAFT-80931, and delivered to Det 63 and/or the NAVEODTECHDIV. Contractors who require source data or nonnuclear EOD TO information should contact Commanding Officer, NAVEODTECHDIV (Attn: Code 60), 2008 Stumpneck Road, Indian Head MD 20640-5070.

10-2.3   Interim Operational and Safety Supplements (IOS and ISS) are issued to Category 60 TOs in message format. Those messages issued between quarterly CD distribution will be filed electronically in the message data field of the AEODPS.

10-3   EOD TODOS.

10-3.1   Nonnuclear EOD TOs will be distributed only to specialized EOD TODO accounts. The MAJCOM EOD staff will recommend approval or disapproval of all requests to establish new AF EOD TODOs. EOD TODO codes will be assigned only to activities using Category 60 EOD TOs.

10-3.2   EOD TODO account codes will be assigned by Det 63. The codes are assigned solely for submitting requests and receiving nonnuclear Category 60 EOD TOs. If other TOs are required, they must be ordered through a regular TODO account.

10-4   ESTABLISHMENT OR CANCELLATION OF EOD TODO ACCOUNTS.

EOD TODO accounts will not be established for contractors. Requests to establish EOD TODO accounts at deployment locations may be submitted by the responsible MAJCOM EOD office in advance of a unit move, to expedite processing. Once unit personnel are in place a follow-up AFTO Form 43 will be completed as specified below.

10-4.1   AFTO Form 43 requests to establish specialized EOD TODO accounts will be submitted through the parent MAJCOM EOD office to Det 63.

10-4.2   Complete AFTO Forms 43 according to chapter 3 of this TO. Complete justification for needing nonnuclear EOD TOs will be entered on the reverse side of the form. When all current and future Air Force nonnuclear EOD TOs are required, the phrase "Automatic distribution is required" will be in Part One, Block 2 of the AFTO Form 43, in the box marked "Other."

10-4.3   Upon receiving AFTO Forms 43, the responsible MAJCOM EOD representative will review and verify the completed forms.

10-4.3.1   The MAJCOM representative will sign approved requests and forward them to Det 63.

10-4.3.2   The representative will return disapproved forms to the initiator with a letter of explanation.

10-4.4   Upon receiving an approved AFTO Form 43, Det 63 will:

10-4.4.1   Establish distribution for the account with the NAVEODTECHDIV.

10-4.4.2   Provide the MAJCOM and requester a copy of the approved AFTO Form 43 which includes the specialized EOD account code.

10-4.5   EOD TODO account holders will submit revised AFTO Forms 43 directly to Det 63 as routine personnel and address changes occur. Deployment locations manned on a rotational basis may submit revised AFTO Forms 43 by the quickest means available (e.g., fax or e-mail). The MAJCOM will notify Det 63 by letter or message when changes to established ID requirements occur. Det 63 will use the information to update distribution to the affected EOD TODO account.

10-4.6   In order to fulfill MAJCOM mission requirements, they may direct the updating and redistribution of complete nonnuclear EOD TO sets that are within the command. The MAJCOM and all affected units will notify Det 63 by letter, e-mail or message of the transfer/receipt of sets between affected EOD TODO account holders.

10-4.7   MAJCOMs will notify Det 63 of any excess or shortage of EOD TO sets that cannot be readily balanced within the MAJCOM. Det 63 will authorize redistribution of excess EOD TO sets between MAJCOMs and/or other military services.

10-4.8   The TODO will submit an AFTO Form 43, completed according to chapter 3, through the MAJCOM EOD manager to Det 63 to cancel an account. Complete TO sets will be maintained until disposition instructions are provided by the MAJCOM or Det 63.

NOTE

> Det 63 is the only agency authorized to approve the non-emergency destruction of complete EOD TO sets.

10-5   DISTRIBUTION SYSTEM.

Due to the unique mission requirements of activities requiring nonnuclear EOD TOs, the TOs are distributed as complete sets on CD-ROMs. Each set will consist of one copy of all approved nonnuclear EOD TOs. These TOs are indexed in the "Search" function provided with the CD-ROM set.

APPENDIX A

LIST OF ACRONYMS

AAC	Air Armament Center
ACC	Air Combat Command
ACO	Administrative Contracting Officer
ADRL	Automatic Distribution Requirements List (Navy)
AEODPS	Automated EOD Publications System (EOD TOs only)
AETC	Air Education and Training Command
AFCA	Air Force Communications Agency
AFCESA	Air Force Civil Engineering Support Agency
AFI	Air Force Instruction
AFJI	Air Force Joint Instruction
AFMAN	Air Force Manual
AFMC	Air Force Materiel Command
AFMCMAN	AFMC Manual
AFMETCAL	Air Force Metrology and Calibration (Program)
AFRC	Air Force Reserve Command
AFSAC	Air Force Security Assistance Center
AFSC	Air Force Safety Center
AFSOC	Air Force Special Operations Command
AFSPC	Air Force Space Command
AFTO	Air Force Technical Order
AIG	Address Indicating Group (AUTODIN message system)
ALC	Air Logistics Center (AFMC): OC - Oklahoma City; OO - Ogden; SA - San Antonio; SM - Sacramento; WR - Warner Robins
AMARC	Aerospace Maintenance And Regeneration Center
AMC	Air Mobility Command
ANG	Air National Guard
APO/FPO	Army Post Office/Fleet Post Office
ARR	Account Reconciliation Report
ASC	Aerospace Systems Center
ASCC	Air Standardization Coordinating Committee
ASCII	American Standard Code for Information Interchange
ATOMS	Automated TO Management System
ATOS	Automated Technical Order System
BTODO	Base TO Distribution Office
CALS	Continuous Acquisition and Life-Cycle Support
CBT	Computer-Based Training
CBTO	Computer-Based TO
CD-ROM	Compact Disk - Read-Only Memory
C-E	Communications-Electronics
CENTO	Central Treaty Organization

CG	Computer-Generated (forms)
CNWDI	Critical Nuclear Weapons Design Information
COTR	Contracting Officer's Technical Representative
COTS	Commercial Off-the-Shelf (Hardware, Software or Manuals)
CPIN	Computer Program Identification Number
CSRL	Code Selected Reconciliation Listing
CSTO	Country Standard TO
CTOM	Centralized Technical Order Management (Committee - AF) (Group - AFMC)
DA	Department of the Army
DAAS	Defense Automatic Addressing System
DAPS	Defense Automated Printing Service
DCMC	Defense Contract Management Command
DI	Desktop Instructions (JCALS)
DID	Data Item Description
DISN	Defense Information Services Network
DLA	Defense Logistics Agency
DLSC	Defense Logistics Service Center
DMS	Defense Message System
DoD	Department of Defense
DODAAC	Department of Defense Activity Address Code
DSN	Defense Switched Network
DVD	Digital Video Disk
EDD	Estimated Delivery Date
EF	Electronic Form
EOD	Explosive Ordnance Disposal
ES	Equipment Specialist
ESC	Electronic Systems Center

GLOSSARY

A

Alphanumeric (A/N).--Term to define a data field or area consisting of lettersand numbers.

Annual Checks.--See paragraph 3-14.3.

Approving Agency.--An office responsible for monitoring and approving government or contractor requests for TOs and assignment/change/cancellation of NW TODO codes for NW (Category 11N) TOs or NW EOD (Category 60N) TOs.

B

Baseline TO File--The official, published file for a digital TO. It consists of the basic TO file merged (posted) with any published change files.

C

Canceled.--Removal of a TO number from a TO index because the TO will not be published.

Canceled Requirement.--Total cancellation of an established ID requirement.

Category.--A family group of TOs such as Aircraft, Engine, or Test Equipment. See TO 00-5-18 for a list of categories.

Changed Requirement.--Increase or decrease to an established quantity.

Classification or Proposed Classification.--One or two alpha characters listed in the TO index to denote the proposed classification of an unpublished TO or the actual classification of a published TO.

Country Validation Agency.--An office responsible for monitoring and validating foreign government requests for NW TOs. For European countries, OL-EL/ELO will act as the Country Validation Agency; all other foreign government requirements will be validated by the assigned Military Assistance Advisory Group (MAAG), Office of Defense Cooperation (ODC), US Defense Attache Office (USDAO) or similar activity.

D

Deleted.--Applicable to a TCTO series, removal of an item that is no longer required; requirements records may be destroyed.

E

Errata Sheets.--Cover sheets used to transmit TO pages either inadvertently omitted from or mis-printed in distributed TO increments. The pages being sent out via errata sheet must NOT include any TO changes, no matter how minor. The errata sheets will list the pages included and the actions to be taken to post them to the affected TO.

F

File Transfer Protocol (FTP) Application Program:--An FTP application is a software program that is installed on a PC and used to establish FTP connection via the Internet from the PC to a remote computer. An MS-DOS FTP application is part of Windows 95/98/NT operating system. It is started by selecting Start, Programs, MS DOS or Command Prompt and then typing ftp at the command (DOS) prompt. The prompt will change to TOPR File FTP document from the TO System Information, ATOMS Program Files web page for detailed instructions and for information to obtaining and using Windows FTP client application.

GLOSSARY - Continued

G

Government (DoD) Contractor.--A contractor working on a contract issued by a Government agency. A DoD contractor has a contract issued by a DoD component.

I

Initial Distribution (ID).--Defined as a requirement established by a TODO for a TO or a TCTO, to provide follow-on support (revisions, changes, and supplements) for established users. ID requirements may be established for unpublished TOs and they will be distributed when published. ID is considered to be completed when the printed TO is placed into the postal service or other carrier. The ID requirement is retained in JCALS system records until changed or deleted.

J

Joint Nuclear Weapons Publications System (JNWPS).--TOs and TMs used to support nuclear weapons and nuclear-related support systems, indexed in TOs 0-1-11N and 0-1-11N-C

L

Like Item Distribution (LID).--Distribution using a label deck based on ID for the parent or other similarly-used TO for the same weapon system, equipment and classification.

List of Effective Pages (LEP) Checks.--See paragraph 3-11.5.

Library Custodian:--Anyone who maintains TOs in a fixed or non-fixed library to include a TODO, TODA, or TO sub-account.

M

Master Requirements Listing (MRL).--A list of all NW TO requirements for a specific TODO.

N

New Requirement.--An ID quantity submitted to OC-ALC/TILUB when no requirement is currently established in OC-ALC records for the TODO submitting the requirement (chapter 4).

Nuclear Weapons (NW) TOs.--TOs, technical manuals (TMs) and related publications for support of the nuclear weapons program.

NW Videotapes.--Training or informational videotapes developed to supplement or provide further instruction on new or difficult procedures in JNWPS manuals.

NW TODO Code.--Assigned by SA-ALC/NWTD to identify an NW-TODO, an NW-EOD-TODO, or an NW-FMS-TODO.

NW-TODO.--An activity authorized to submit requirements for and to receive Category 11N TOs.

NW-EOD-TODO.--An activity authorized to submit requirements for and to receive Category 60N EOD TOs.

NW-FMS-TODO.--A USAF or other US government activity authorized to submit foreign government requirements for NW TOs. This activity is authorized to receive unclassified NW TOs and forward them to the foreign government.

R

Reclassified.--Change of a TO security classification or proposed classification.

GLOSSARY - Continued

R (Cont)

Release Approving Agency for Foreign Accounts.--The office authorized to approve release of NW data to foreign governments. The release approving agency for classified TOs is SAF/IADV, 1010 AF Pentagon, Washington DC 20330-1010 (acting for the Joint Atomic Information Exchange Group). For unclassified NW TOs, SA-ALC/NWTD will act as the release approving agency after coordination with SAF/IADV.

Renumbered.--Change of a TO number or TCTO series number.

Replaced.--Supersedure of one TO by one or more others.

Requisition Distribution.--A method of obtaining published TOs.

Rescinded for AF and SAP.--Code used when TOs are no longer authorized for use.

Rescinded for AF, Retained for Security Assistance.--Code used when TOs rescinded for USAF use are used to support a SAP (TO 00-5-19).

Routine Check.--See paragraph 3-14.2.

S

Supplemental Distribution.--Supplemental Distribution action is used to fulfill organizational requirements when only partial initial distribution was made due to insufficient stock.

Single Manager (SM).--The individual responsible for management of all aspects of a system, product group or materiel group.

T

Technical Manual (TM) Account Code.--Code automatically assigned to TODO accounts by the JCALS system.

Technical Order Distribution Account (TODA).--An authorized technical order distribution activity serviced by the TODO and assigned as a subaccount of the TODO. (AF) TO Catalog (Chapter 2). A database providing information and current status of TOs currently active in the TO system. The catalog is used for management of TO libraries, developing requirements and preparing orders.

TO Catalog (Chapter 2).--A database providing information and current status of TOs currently active in the TO system. The catalog is used for management of TO libraries, developing requirements and preparing orders.

TO Distribution Office (TODO).--An activity assigned a TO distribution code number. A Base TODO (BTODO) performs the same functions as a TODO and other functions specified in chapter 1.

TO Distribution Office Code.--A number assigned to identify a TODO.

TO Library.--One or more TOs constituting an authorized library (chapter 3).

U

User Organization.--An organization having a need for TOs.

TECHNICAL ORDER DISTRIBUTION SYSTEM

NOTICE: This publication is available digitally on the HQ AFMC WWW site at: https://www.afmc-mil/wpafb.af.mil/pdl/.

This supplement applies to Technical Order (TO) 00-5-2, dated 1 April 2001, and is published in accordance with the provisions of AFPD 21-3, *Technical Orders*, and TO 00-5-1, *AF Technical Order System*. This supplement provides Air Force Materiel Command (AFMC) direction for implementing those procedures listed in TO 00-5-2 as Major Command (MAJCOM) options. It applies to all AFMC units that use TOs. Annotate the title page and affected paragraphs in the basic TO, using the Adobe Acrobat **Notes** tool, IAW TO 00-5-2, paragraph 3-11.9.2. File this supplement behind the basic TO and retain until revised or rescinded by HQ AFMC. Pencil changes to this supplement are authorized to renumber paragraphs to align it to new TO 00-5-2 changes or revisions. Users will report any discrepancies other than paragraph realignment via e-mail to HQ AFMC/ENBP.

SUMMARY OF REVISIONS

This is the initial publication of AFMC Supplement 1, 00-5-2.

TO 00-5-2, 1 April 2001, is supplemented as follows:

3-14.4 Perform an Annual LEP check on all frequently-used paper TOs (used at least weekly), unless the TO has a 100 percent LEP check performed and documented within the last six months as part of posting a change or revision.
